Do You Suffer from **Chronic** **or Acute Knee Pain?**

SURGERY IS NOT ALWAYS THE ANSWER

KNEE PAIN AFFECTS MILLIONS OF PEOPLE IN THE U.S. IT'S ONE OF THE MOST COMMON REASONS PATIENTS VISIT THEIR PROVIDERS. WHETHER IT'S CAUSED BY ARTHRITIS, TRAUMA, OR INJURY, KNEE PAIN IS OFTEN DEBILITATING, AND IT'S PROGRESSIVE. BECAUSE THERE IS SO MUCH WEIGHT THAT IS PUT ON THE KNEE JOINTS, IN ORDER TO CORRECT THE ISSUE AND ROOT CAUSE OF THE PAIN, REGENERATIVE THERAPY IS HELPING NUMEROUS PEOPLE FIND RELIEF WITHOUT SURGERY.

KNEE SURGERY

In some cases, surgery may be necessary due to the severity of the disease, but unfortunately, it is often recommended to patients who would otherwise benefit from a more conservative treatment plan. Surgery is permanent, and once it is performed, there is no going back.

STANDARD MEDICINE

Traditional medicine often only masks pain and symptoms with addictive drugs and corticosteroid injections. What many people don't realize is that pain medications stop working overtime. This is called treatment resistance, and corticosteroid injections actually increase the degeneration of the joint over time.

REGENERATIVE MEDICINE

Regenerative, minimally invasive procedures can alleviate pain and also restore and regenerate tissue internally at the site of the condition. Biological Treatments can help soft tissue and joint function by rebuilding and growing new cells, which promotes the healing and repair of cartilage and bone tissue.

In the case of knee conditions, if regenerative therapies are not implemented, the joint integrity will worsen by significant percentages.

QC Kinetix specializes in treating knee and joint pain. They customize a treatment plan specific to each patient's condition, health, and medical history. Many of the procedures are covered under major insurance carriers.

QC Kinetix's comprehensive approach to knee pain management provides long-term relief without the need for surgery. They work with you to incorporate a treatment plan that is right for you, and they also teach patients various lifestyle changes and plans to help them avoid reinjury and to decrease the progression of their condition.

If you've been told invasive surgery is your only option, or you've exhausted your pain coping mechanisms, contact QC Kinetix today. They will provide a comprehensive regenerative medicine plan. With such a wide array of natural biological, medical treatments available, QC Kinetix makes sure to discuss all the therapeutic options with each of their patients.

They treat everyone from weekend warriors and professional athletes to aging patients who want to stay active. We have extensive experience with regenerative medicine therapies and don't just mask your symptoms – We are dedicated to maximizing your body's ability to help heal and repair itself from the inside out for vastly improved function and overall quality of life.

QC Kinetix treats multiple conditions of the knee, shoulder, elbow, wrists, ankles, feet, low back, and hips.

If you are living in pain, contact QC Kinetix today to start your journey towards regeneration and living a life that's no longer ruled by pain but by your ability to enjoy the activities you love.

THE HOLIDAYS ARE HAIR!

...Just What the Doctor Ordered for Optimum Hair & Scalp Health

by Alan J. Bauman, MD, ABHRS

Have you ever thought about doing your holiday shopping at a doctor's office? Probably not, but it might be time to shake up your routine a bit, especially if someone you love is concerned about their hair health.

Bauman Medical has a host of stocking stuffer supplements as well as the best high-tech gadgets ever developed for hair growth, and luxurious hair enhancing services that just about anyone concerned with hair health would love to receive.

And best of all, they're all available right now on our website from our warehouse (no stuck barges keeping our shelves bare).

SUPPLEMENTS

Let me start by telling you about our brand-new line of proprietary nutritional supplements, developed at my direction for maximum hair health. These bottles of cheer won't cause hangovers (and may reduce combovers).

THE RECRUITER: This special blend of probiotic, plant extract, and Vitamin D3 promotes the release of stored stem cells. Stem cells assist in healing damaged tissues due to aging, injury, and stress. It increases the number of circulating stem cells in your body to promote healthy hair growth and overall health.

THE GOOD GUYS: This hair probiotic complex infuses the gut with elements needed to optimize the digestive process and maximize overall health and wellness. This formula supports a robust scalp and strengthens follicles for optimal hair growth.

THE BODYGUARD: This formula contains a unique blend of herbs and mushrooms shown to support a healthy immune system and defend against environmental toxins and stress-related weakness of the immune system. Scientific research confirms the benefits of the immune-enhancing herbs within the formula, together with the fungi, especially Asian mushrooms.

A-LIST HAIR VITAMIN COMPLEX: I call this my "strategic supplement," because it contains top-tier ingredients that've been shown to strengthen hair and support skin elasticity. It contains antioxidants and trace minerals that protect hair and skin, promote collagen renewal for hair, skin hydration and wound healing.

My oldies but very, very goodies...

NUTRAFOL: A nutraceutical that targets the main triggers for hair loss before the follicle is beyond repair. It's the only nutritional that targets all four stages of hair health to help prevent thinning hair and hair loss, and to help grow thicker, healthier hair.

VIVISCAL PROFESSIONAL: This 100% natural food supplement is specifically designed to nourish thinning hair and create a healthy environment for existing hair and hair follicles.

(Feel free to contact us to discuss which of the products would be best for you or your gift recipient).

LASER THERAPY

Make your season "bright." Light up his, her (or your) life with the award-winning Bauman Turbo LaserCap®,

the fastest, most portable, most advanced, hands-free, cordless, rechargeable medical grade low-level laser therapy device. The FDA cleared Turbo LaserCap was designed for men and women to deliver effective laser therapy for hair regrowth to the widest scalp treatment area possible, conveniently in the privacy of your home.

Bauman Medical has a host of stocking stuffer supplements and the best high-tech gadgets ever developed for hair growth, including the Award-winning Bauman TURBO LaserCap, perfect holiday gifts that just about anyone concerned with hair health would love to receive.

Give yourself or someone you know a "Scalp Makeover" for the holidays. It's the ultimate pampering for your scalp, providing stress-reducing and circulation-stimulating scalp massage, scalp steaming and application of highly advanced topical therapeutic products to boost the health of the scalp and follicles.

Consistent use of drug-free, medical-grade, low-level laser therapy treats hair loss, hair thinning and has been scientifically proven to improve the appearance of hair quality, hair strength, and hair thickness as well as promote hair regrowth.

THE SCIENTIFIC SCALP MAKEOVER™

The Scientific Scalp Makeover™ is for him or for her. Lots of people come just for the chance to relax and unwind with an indulgent (and therapeutic) 90-minute-to-three-hour session in our "head-spa" room. We dim the lights and provide a variety of soothing services including an aromatherapy session, customized scalp mask treatment for optimum scalp health and hair beauty, a deep scalp massage to stimulate and purify the scalp and increase circulation, a deep cleansing shampoo, and a customized conditioner or hair mask. (Ahhh...)

These sessions are indulgent but can be more than an indulgence. They're a necessity for people whose hair isn't growing like it used to. Your scalp is skin, too, so treat it like skin.

CONSULTATION

And finally, perhaps the greatest gift of all (for yourself or someone else concerned about hair loss) is a virtual or in-person hair loss consultation with me. Your consultation includes a review of your challenges and goals, a deep dive into your medical risk factors, and more. We'll design a personalized treatment plan together, then assign a dedicated patient advocate to you who'll guide you through the treatment process.

Ready to start shopping? Contact us at **561-220-3480** or visit our website.

About Dr. Alan J. Bauman

Alan J. Bauman, MD, ABHRS, IAHRS
Hair Loss Expert

Dr. Alan Bauman is a full-time board-certified hair restoration physician who has treated over 30,000 patients, has performed more than 10,000 hair transplant procedures and over 8000 PRP's since starting his medical hair loss practice, Bauman Medical in 1997.

Dr. Bauman is one of approximately only 200 physicians worldwide to achieve the certification from the esteemed American Board of Hair Restoration Surgery (ABHRS). Dr. Bauman is known for pioneering numerous technologies in the field of hair restoration including minimally-invasive FUE Follicular Unit Extraction, VIP|FUE™, Low-Level Laser Therapy, PRP Platelet Rich Plasma, PDOgro™, eyelash Transplants and others.

Dr. Bauman was voted "#1 Top Hair Restoration Surgeon" in North America by Aesthetic Everything for the 5th consecutive year, "Top Hair Restoration Surgeon of the Decade", and was recently named by Forbes as one of "The 10 CEOs Transforming Healthcare in America."

GENETICS AND HAIR LOSS

- There are now over 200 known DNA locations (genes and SNPs) that contribute to genetic baldness.
- Hair loss genes can be inherited from either your mother's or father's side of the family, or a combination of the two.
- Hair loss can start as soon as puberty begins, depending on your hereditary sensitivity to DHT.
- Color quality, texture, length of growth cycles, balding patterns, the speed of balding – all of those put together will determine how quickly you see loss occur, how quickly it progresses, and how long it will occur later in life.
- Because it is a recessive gene, hair loss can skip generations, skip siblings, etc.
- Many consumer DNA tests (e.g. 23andMe) include a prediction of whether you are likely to experience hereditary hair loss.

THE TUBCUT[®]

- Improve Accessibility
- Complete in One Day
- Reversibility Available
- Satisfaction Guarantee

Save 90% on Replacement Cost!

We convert your tub to a walk in shower in just one day. No plumbing or demolition. Little to no disruption. A simple shower curtain, the same used on a shower stall, stops any water concerns. Shower doors optional.

It's Like Having A Walk In Shower Without The Cost!

We create the opening that fits your needs. Unlike a cap system, The TubcuT[®] adapts to you. With our exclusive process, you dictate where we create the opening, how wide and how low, typically just 4" off the floor.

The TubcuT[®] System is 100% REVERSIBLE

If you sell your home we can reverse The TubcuT[®] back to a regular tub again, just like brand new! The removed section of the tub can be replaced restoring it to original condition. Save thousands on resale!

Reducing Your Risk of Cancer for Healthier Holidays

Diet, exercise and getting recommended screenings are some of the ways to lessen your risk of getting cancer.

As we close out 2021, many of us will be making resolutions to get healthier in the coming year. Even though most Americans know that we should make healthy choices, such as quitting smoking, protecting skin from sun damage, eating a healthy diet, exercising more and getting the recommended screenings, following these recommendations can often be difficult. Getting healthy is definitely worth the effort because, according to the National Institutes of Health, certain lifestyle choices can lessen the chances an individual has of developing cancer.

Each year, over half a million Americans die of cancer; the startling news is that about one-third to one-half of these deaths are linked to lifestyle choices and, potentially, could have been prevented. Start reducing your risk of cancer by making these choices in your life:

- Get recommended screenings such as colonoscopies, Pap smears and mammograms.
- Maintain a healthy weight throughout life.
- Be physically active on a regular basis.
- Make healthy food choices with a focus on plant-based foods.
- Stop smoking – or better yet, never start.
- Wear sunscreen with an SPF of at least 30.
- Let your doctor know if there is a family history of cancer.

CANCER SCREENINGS ARE MORE IMPORTANT THAN EVER

Throughout the pandemic, many people have chosen to postpone or even skip recommended cancer screenings, such as mammograms, prostate exams, PSA testing or colonoscopies, among others, for various types of cancer, causing a substantial delay in diagnosis and treatment for senior adults and Medicare beneficiaries. Because of this, some patients are being diagnosed with more advanced stages of cancer, and there have been delays in beginning treatment, resulting in poorer outcomes for patients. Early diagnosis and treatment is a substantial factor in surviving cancer; please do not skip or delay your recommended screenings.

SKIN CANCER AFFECTS 1 IN 5 AMERICANS - TAKE IT SERIOUSLY

Skin cancer is the most common form of cancer in the United States. The two most common types of skin cancer, basal cell carcinoma and squamous cell carcinoma, are highly curable. Melanoma, the third most common skin cancer, is much more dangerous.

By now, most people know a sunscreen should be used when you are going to be outdoors, even for a short period of time. However, not all sunscreens are created equally. For maximum protection, oncologists recommend a sun protection factor (SPF) of 30 or greater, regardless of skin color or ethnicity. Other recommendations include avoiding tanning beds or sunlamps and examining your skin, head to toe, every month for any changes. You should also have a doctor examine your skin annually.

SMOKING AND CANCER

According to the Centers for Disease Control and Prevention (CDC), cigarette smoking is the number one risk factor for lung cancer. It's estimated that in the United States smoking causes about 90% of lung cancers; smokers are 15-20% more likely to get lung cancer than nonsmokers. Tobacco products such as cigars or pipes also increase the risk for lung cancer, as well as throat and mouth cancers. Even smokeless tobacco has been proven to increase the risk of oral cancer, throat cancer, stomach cancer and pancreatic cancer.

THE ROLE OF DIET IN PREVENTING CANCER

Although no particular food or diet product can prevent cancer, there is growing evidence that diet can play a significant role in some types of cancer. For example, studies have found a higher incidence of prostate cancer in men whose diets are high in fats, particularly animal fats, and low in vegetables. Likewise, 30-40% of certain types of breast cancer have been linked to what we eat, especially if our diet is a contributing factor to obesity. A diet that is high in fruits, vegetables, legumes and whole grains, and low in animal fat, processed foods and sugar, is generally considered healthier and can boost your immune system to help fight diseases such as cancer.

WORLD-CLASS CANCER TREATMENT CLOSE TO HOME

Florida Cancer Specialists & Research Institute (FCS) has a statewide network of expert, board-certified physicians who bring world-class cancer treatments to local communities, both large and small, in locations throughout Florida. FCS is also a strategic partner with Sarah Cannon, one of the leading research and clinical trial organizations in the world. This alliance provides FCS patients access to the newest, most innovative and most promising new treatments.

Florida Cancer Specialists treats patients with all types of cancer and offers a number of services, including an in-house specialty pharmacy, an in-house pathology lab, financial counselors at every location and 24/7 access to care managers, who help deliver the most advanced and personalized care in your local community.

Navigating the Medicare Puzzle

DOES MEDICARE CONFUSE YOU? YOU ARE NOT ALONE. MEDICARE IS A COMPLICATED PROGRAM. WISELY MANAGING YOUR MEDICARE BENEFITS STARTS WITH UNDERSTANDING THE FACTS. AGE 65 IS AN EXCITING TIME IN YOUR LIFE. IT'S THE BEGINNING OF A WHOLE NEW CHAPTER THAT ENCOMPASSES THE WHOLE YOU (BODY, MIND AND SPIRIT).

Aetna Medicare is more than a typical insurer; we are a health company and we are devoted to helping you realize your health ambitions, big and small. We hope to join you in your health journey by turning your ambitions into achievements so you can age actively.

HOW DO YOU KNOW YOU'RE GETTING THE BEST ADVICE?

Guidance and support go a long way towards achieving your best health. That's why Aetna representatives help simplify Medicare and connect you to the right coverage, resources and care.

WHAT DO I NEED TO KNOW ABOUT MEDICARE?

Medicare is a sophisticated system, but maneuvering your way through the maze is the tricky part. You'll want to have the best coverage based on what your income will allow.

MEDICARE HAS SEVERAL PARTS:

- Part A (hospital)
- Part B (physician & out-patient services)
- Part C (Medicare Advantage Plan)
- Part D (prescription drug coverage)

Because (Original) Medicare only covers approximately 80% of Part B expenses, most individuals will need to enroll in supplemental coverage to cover the cost associated with outpatient services. We understand that a total

approach to health and wellness may be different for each of our members. That's why we offer a choice of Medicare Advantage, Medicare Supplement and Prescription Drug Plans (PDP) for supporting your unique health ambitions.

Having the right amount of coverage is key to taking care of the whole you. That's why we offer Medicare Advantage plans that cover your doctors (Part B), hospitalization (Part A) and prescription drugs (Part D) in one simple plan – some with added benefits for dental, vision care and fitness. Medicare Advantage includes PPO & HMO plans, which have co-pays or deductibles instead of the 20% balance that Medicare does not cover. The benefits depend upon the plan you select.

A Medicare Supplement plan (sometimes called, MediGap) may help protect your savings and peace of mind. Aetna Medicare Supplement plans are designed to fill the coverage gaps left by Original Medicare and place a firm limit on how much you pay each year. One of the benefits of pairing a Medicare supplement insurance plan with Medicare is the flexibility. You can use any doctor or hospital that accepts Medicare, and a network does not limit you. We have

several plan options in Palm Beach county for you to choose from, including plans with dental benefits such as fillings, crowns, dentures, implants, X-rays, cleanings and more.

If you do choose a Medicare Supplement, it is important to add an additional PDP to cover your Prescriptions. Medicare Supplement plans do not include prescription drug coverage.

Sometimes feeling your best requires the right combination of prescription drugs. Since Medicare has no coverage for Part D, Aetna Medicare has a range of PDPs to support your health ambitions. They include a 60,000-strong pharmacy network. And, with a broad list of covered drugs – changes are good yours are on it.

HOW DO I FIND OUT MORE?

At Aetna Medicare, we understand the more you learn the more you know. In fact, Aetna has a legacy of caring for the whole person, providing care, trust and access to Medicare coverage since 1966. And, Aetna representatives advocate for our members' best health by helping them get the most from their benefits, building trust and always providing a clear path to care.

Lisa Sachs

Lisa Sachs is a licensed Field Sales Representative in Palm Beach County and has been a proud Aetna employee for ten years. She loves working with the senior community and is passionately dedicated to her clients. Lisa assists people with Medicare parts A and B, with enrollment in the HMO, PPO, POS and SNP (special needs plans for those with Medicaid) offered by Aetna. Her duties don't stop there though as she also specializes and assists members to see if they possibly qualify for additional government programs offered by the state of Florida such as Medicaid and the Extra Help program through Social Security. She believes in always being as available as possible and insists upon the highest level of customer service. "Sometimes just picking up your phone and sincerely showing that you care, is all someone might need at the moment", she says. "She makes a point to do just that by keeping her phone close to her at all times and even taking calls on weekends and holidays. "I feel the need to treat my clients the way I would want someone to treat my Mother or Father. Medicare can be a bit confusing and she prides herself on taking as much time as needed to fully explain the benefits of each plan and the enrollment process. For a phone or in house appointment Lisa can be reached at your convenience seven days a week at **(561) 818-4205**

SILHOUETTE INSTALIFT™

A GAME CHANGER FOR NON-SURGICAL FACIAL CONTOURING AND BODY CONTOURING

LOOKING FOR A NATURAL LOOKING WAY TO COMBAT SAGGING SKIN WITHOUT SURGERY? CONSIDER THE SILHOUETTE INSTALIFT™.

More and more patients prefer to avoid or at least postpone surgery, or simply are not a candidate for surgery due to medical reasons. This is a good alternative for those patients.

First let's discuss what aging really is in order to understand how we can combat it effectively. Aging consists of volume loss and sagging skin. If we want to "naturally" rejuvenate our face and body we need to address both these issues. The Silhouette Instalift™ is the only non-surgical procedure that addresses both issues.

This Silhouette technology is in a class of its own, it's not a filler and it's not your typical thread. It is both, "dual action" means it lifts and volumizes at the same time. It is an advanced micro-suspension technology that uses small (3D) 360 degree cones made from PLLA (also known as "Sculptra") to simultaneously lift skin and build collagen. The lifting effect is immediate while collagen production is gradual and peaks at about 8-12 weeks.

After the patient's needs are assessed, and the entry points are marked, a local anesthetic is injected and the sutures are placed. There is very little discomfort during and after the treatment.

Medical Director, Daniela Dadurian M.D.

- * Board Certified Anti- Aging Medicine
- * Board Certified Laser Surgery

Daniela Dadurian, M.D. received her medical degree from the University of Miami School of Medicine. She is certified by the Board of Anti-Aging & Regenerative Medicine and the Board of Laser Surgery. Dr. Dadurian has also completed a fellowship in Stem Cell Therapy by the American Board of Anti-Aging Medicine. She is a member of the International Peptide Society, the American Academy of Anti-Aging Medicine and the Age Management Medicine Group. Dr. Dadurian is the medical director of several medical spa and wellness centers in palm beach county with locations in West Palm Beach and on the island of Palm Beach. She is a leading expert in anti-aging & aesthetic medicine. Her state of the art facilities offer an array of anti-aging, functional medicine, cosmetic and laser therapies.

The specialty recognition identified herein has been received from a private organization not affiliated with or recognized by Florida Board of Medicine.

Complimentary Consultation / Gift Cards Financing Available

The patient and any other person responsible for payment has the right to refuse to pay, cancel payment, or be reimbursed for payment for any other service, examination or treatment that is performed as a result of and within 72 hours of responding to the advertisement for the free, discount fee, or reduced fee service, examination or treatment.

mdbeautylabs.com

Once the sutures are placed, the skin will be repositioned to obtain the desired lifting effect. The ends of the suture are then cut. The number of sutures applied depends on each individual patient's skin elasticity and condition of the skin. Possible side effects are, as with any procedure that involves needles, bruising and minor pain and swelling. This is an office procedure that takes about 45 minutes and lasts about 18-24 months. The Silhouette Instalift™ was FDA approved in April 2018 for use in the mid-face and was awarded the prestigious 2018 New Beauty Magazine breakthrough award. It has been popular in both South America and Europe for many years.

Silhouette Instalift™ now has different sutures with varying numbers of cones, depending on where on the body it is being used. The 8 cone suture is used on the face, whereas the 12 and 16 cone sutures can be used to lift butts, saggy skin above the knees, elbows and saggy belly skin. It also works well for cellulite.

Why choose Silhouette Instalift™?

- Non-surgical procedure
- Minimally invasive
- Minimal recovery time/no down time
- Immediate lifting effects
- Volumizing in addition to lifting effects due to PLLA collagen stimulation
- Sutures are entirely re-absorbable
- Natural looking

I am so excited to be able to perform this procedure right here in my office. Call today to see if you are a candidate for the Silhouette Instalift™. MD Beauty Labs (561) 655-6325.

USE YOUR TIME WISELY

You get one life, make the best use of your time by making memories and doing something you enjoy. How we use our time every day, eventually defines our lives. It can take a lot for you to take time off to visit a doctor in person. You may have to call out of work or school to see a medical provider, taking away money, time, and energy. If a virtual solution that is just as effective is available, why not try it? Don't let life pass you by standing in lines for your meds, let AllMedRx deliver them right to your door. Tick Tock the countdown to saving money starts now. As the year comes to an end and the clock ever so quickly launches us into next year remember your time is valuable.

AllMedRx.Org provides the convenience of telehealth visits to their Florida neighbors. You simply speak with an experienced doctor face-to-face virtually via your smartphone and receive care tailored to your individual needs.

Fortunately, the new widespread use of telehealth and virtual care technologies has made it easier for people to get medical care. The COVID-19 pandemic has made virtual healthcare a necessity to help keep everyone healthy. AllMedRx has done the same as we now have an online pharmacy.

AllMedRx Specialty Pharmacy is a Brick-and-Mortar independently owned compounding pharmacy, proudly licensed in 44 states. We have been servicing our community locally and nationally since 2013. Our mission is to make generic FDA-approved prescription medications accessible to all at an affordable cost without compromising quality.

All our medications are sourced from the most reputable wholesalers in the United States. We love our patients and see them as an extension to our family.

Our facility is equipped with a state-of-the-art USP <797> compliant Sterile Clean Room. AllMedRx pharmacists and pharmacy technicians are highly trained in sterile and non-sterile compounding.

Specializing in sterile eye drops. We are passionate and dedicated to providing premier customer service to our patients.

Our patients' security and privacy are of utmost importance. To us, confidentiality is imperative to all parties involved. While many online pharmacies are illegitimate our HIPPA compliant pharmacy is LegitScript certified. This badge provides our patients with a trusted and recognized stamp of approval for legitimate and safe health merchants. AllMedRx eliminates the need to order medications from outside of the United States by offering cost-effective prices. Medications that you can trust at a price that will help you confidently apply your healthcare dollars in a safe and secure environment. AllMedRx will guarantee the authenticity of all of our prescription medications ensuring the medication ordered is the medication dispensed.

**I'm sure at this point you're asking yourself,
"How do I place my order?"**

Rest assured, you can drop off your prescription in-store or order online at Allmedrx.org. You can pick up your medication in-store or have it shipped to your doorstep in a discrete unmarked package, the option is yours!

Have any questions? No worries, give us a call today at **561-557-1645** and one of our pharmacist or pharmacy technicians will be more than happy to better assist you!

561-557-1645

AllergywoRx™

In today's busy, fast-paced world where everyone has loads of commitments and responsibilities, it can be difficult to carve time out for yourself – especially when it comes to your health. People often neglect getting the medical care they need, especially for nonemergency issues like allergies.

December brings in the winter months and exposure to different allergens that could be aggravating your skin. Don't fall victim to what this season brings, go to AllergywoRx.org and schedule your allergy test today!

Gone are the days when you had to get an in-office allergy test to find the culprit of your symptoms. While an in-office allergy test is effective, it can be costly and time-consuming. Fortunately, now you can find the culprit of your itchy, puffy eyes and nose, shortness of breath, or sneezing without leaving your home with the help of at-home allergy testing.

At-home allergy testing is an economical, convenient, and equally accurate alternative allergy testing method. You can perform testing right from the comfort of your home while being virtually supervised by your provider.

If you are one of the millions of Americans who want to pin down and treat their allergies once and for all, book yourself for a consultation with one of our highly qualified general practitioners. To set up a telehealth appointment with one of our providers, call us today at **(888) 508-5110**.

Your comfort and relief are our highest priorities! AllergywoRx provides personalized allergy medication therapies that cater to the unique needs of patients suffering from allergies, throughout the nation. By working directly with the physician and the patient, we strive to develop the best action plan for each individual.

Per The Cochrane Library Sublingual immunotherapy allergic rhinitis, 2010 "[Immunotherapy] is the only known treatment that modified the immune response and treats the cause rather than the symptoms". If you are one of the millions of Americans who is wanting exceptional quality of care look no further.

Don't want to leave the comfort of your home to talk to a doctor about your allergy symptoms? Schedule a telehealth visit at AllergywoRx.org and a telehealth physician can better assist you.

Today, the convenience of home delivery has become an integral part of our lives. AllergywoRx delivers your medication right to your doorstep. Physicians Become a Provider!

In just 3 easy steps you could be on your way to generating additional revenue and with a turn-key allergy program while also providing positive patient outcomes! Our allergenic extracts are exclusively handled at AllMedRx Specialty Pharmacy's state-of-the-art USP <797> sterile compounding lab.

1. Complete our contact form at AllergywoRx.org or call us at **888-508-5110** to learn the simple steps to prescribe allergy immunotherapy.

2. Screen & test your patients: use our easy-to-administer, turn-key allergy test program (Environmental, Food, or Ocular Allergy Test Kit)

3. Prescribe allergy treatment. Your patient's allergy therapy will be prepared at AllMedRx Specialty Pharmacy's state-of-the-art USP <797> sterile compounding lab.

**HAVE A MERRY, SNIFFLE-FREE HOLIDAY!
FROM OUR TEAM HERE AT ALLERGYWORX.**

Little-Known VA PENSION

Can Be a LIFE-SAVER

Written By
Thomas Gregory –
U.S. Navy Veteran

Established in 1952 under Title 38 of the United States Code, Congress created two types of benefits for war Veterans and their survivors within the Department of Veteran Affairs. The first is “compensation for service-related disability or death” and second, “a pension for non-service connected disability or death”. A little-known VA pension, which falls under the non-service connected section of Title 38, is called **Aid & Attendance**. The **Aid & Attendance** Pension pays for a caregiver to assist with activities of daily living such as meal preparation, bathing, dressing/undressing, transportation, light-house keeping, laundry and various others.

If you are a war veteran or surviving spouse of a war veteran 65 years of age or older, who served 90 days or more on active duty, with one of those days occurring during a declared period of war, you may qualify for Aid & Attendance. In addition to the war service requirements, to qualify, you must have the medical need (i.e. assist with activities of daily living) and meet certain financial requirements. In general, Aid & Attendance is intended to pay for homecare or assisted living care and in some rare cases, independent living facilities. This significant monthly benefit can pay as much as \$25,000 per year toward your care. Very few war veterans know about this benefit and even fewer surviving spouses are aware of this help available from the VA.

There are approximately 600,000 war veterans currently living in Florida that are 65 years of age or older. If we include surviving spouses of war veterans, the number is easily in excess of one million. Conservative estimates indicate that at least 25% of these veterans and spouses would qualify for Aid & Attendance Pension, if they only knew it existed. Maybe that's you.

If you are veteran of foreign war or the surviving spouse of a war veteran, and you feel you may qualify, please **call Attorney Andrew Curtis at 561-998-6039** and his staff will review your situation with you and determine if you qualify.

By Aaron Rosenblatt, MD

AVOID BACK AND SPINE SURGERIES!!!

Back surgeries can fail for a devastatingly simple reason; the operation was not the right treatment, because the surgeon never pinpointed the source of the pain. As a result, patients may be just as miserable as they were before, or worse off. Unfortunately a desperate number choose to try surgery again. This is usually the wrong decision as well and this should be avoided. Statistics show also that by two years after a patient's first surgery, about 8% of patients have had another operation and by 10 years after, the rate jumps to 20%, an analysis of Washington State hospital data found.

There is no one best way to treat everyone. But the chance of finding relief for ongoing pain unquestionably lies in understanding what has gone wrong. This is not an easy task. Then seeing the most appropriate specialist for your problem and asking the right questions is quite important. With back problems, perhaps more than with any other medical condition, getting the best care at the utmost importance. The most important doctor you can see, at this point, is an Interventional Pain Management Specialists like Dr. Aaron Rosenblatt. A well qualified and certified doctor like him can evaluate a patient completely. He will order the appropriate scans and or test needed in order to come up with a plan to properly diagnose and the treat the issues WITHOUT SURGERY.

Once all of the appropriate tests are done Dr. Rosenblatt can see what diagnostics need to be completed in his state-of-the-art pain management facility. That's why it's critical to have a thorough workup. To get a sense of the cause of your pain X-rays and MRI/CT scans can be helpful but just because these scan say you have a disc problem here and or an arthritic problem there does not mean that this is where your pain is generated from.

As an interventionalist, Dr. Rosenblatt will take this information and set up diagnostic tests within his office to properly pinpoint the exact regions of the spine which require any type of treatment. Without these diagnostic tests, the wrong diagnoses can be made and then ineffective treatment with

surgery becomes likely. That's because high-tech images routinely uncover bulging discs and other "abnormalities." Dr. Rosenblatt will use this information and interventional techniques to avoid surgery.

Trouble is, many findings on scans often have nothing to do with what's hurting. If you take 100 people off the street and give them MRI's or Cat Scans, 33% of them, even if they had no back pain whatsoever, would have obvious structural problems. Data also points out that less the 5% of all patients who experience back pain will EVER require surgery but, unfortunately, a much higher percent of patients wind up with an operation. We will help avoid this situation.

Here's the real problem... Patients tend to think of back surgery as the BIG CURE or consider it the treatment that will work successfully. Sometimes, in our desperation to get our lives back, it may seem like a good idea to jump over those less invasive procedures and go right to the big one. This is rarely true.

Dr. Rosenblatt says, "Per my experience, it is rarely the case that a patient I see in my office will ever require surgery for pain. I also see too many patients who have already had 1 or more back surgeries without any relief." Surgery should NEVER be seen as worth trying for pain. This approach usually fails to help patients overcome their pain and now their spines are complicated and worse off due to after effect of surgery.

If a doctor recommends an operation, get a second opinion as soon as possible. A good surgeon should understand that you need to be comfortable with any decision and prior to having a surgery other opinions are necessary. For a truly useful second look, Dr. Rosenblatt can fully evaluate this situation and give what options exist.

Dr. Rosenblatt explains, "There have been too many times where patients were scheduled for one type of surgery and something totally different was causing their pain. Specifically, issues with sacroiliac

joints, hips and other regions of the body can mimic pain which would also NOT require surgery."

Dr. Rosenblatt continues, "I'm always trying to help a patient fully understand what is causing them a pain issue. This is usually pinpointed easily, diagnosed properly and then treated successfully without the need for any type of surgery."

Avoiding surgery is our number one goal to help to treat a growing older and active community. At Dr. Rosenblatt's beautiful freestanding interventional pain management building in Delray Beach, FL, he serves at the medical director and is board certified. Every patient is evaluated by Dr. Rosenblatt himself and a comprehensive treatment plan is always tailor made for each individual. Patients are NOT seen by PA's (physician assistants) or NP's (nurse practitioners). You will see the doctor at each and every visit. Dr. Aaron Rosenblatt specializes in performing Interventional Pain Management procedures and also in the field of Physical Medicine and Rehabilitation. His knowledge encompasses each region of the body which can cause pain. He runs on time and does not make patients wait hours in his office to see him. He is not only a pleasure to talk to regarding pain issues, but also enjoys every day topics such as sports, movies, entertainment and current events. Please look forward to more articles about Dr. Aaron Rosenblatt and the vast number of procedures he performs to help people with all types of pain. His main focus is to help individuals avoid surgery, eliminate pain medications and to ultimately feel much better on a daily basis and enjoy life!

Early Pain Treatment CAN PREVENT Prolonged Suffering!

TubcuT® Can Help Alleviate Slip and Falls and trouble getting in and out of the Bath

Wisdom may come with age but getting older has its set of challenges. People are living longer but not necessarily healthier. From diminished eyesight, arthritis, immobility, to cognitive decline, some conditions make it high-risk and unsafe for seniors living on their own or with limited supervision.

Some of the biggest hurdles for seniors are tripping, slips and falls, slippery bathtubs, and getting in and out of the bath or shower. These can be extremely hazardous for those with arthritis, dementia, fibromyalgia, cardiac conditions, Parkinson's and many other conditions that cause stiffness, pain, lack of coordination, immobility and failure to be able to follow direction.

BEFORE

AFTER

Whether from injury or aging, getting in and out of a bathtub can be challenging. Instead of spending thousands of dollars on a bathroom renovation, you can easily convert your tub into a walk-in shower with the TubcuT® Company.

The TubcuT® is the original tub to shower conversion, and it helps to improve accessibility, reduce accidents, serious injuries and help people remain in their homes longer. And the good news is, you will save on average, 90% of replacement costs with TubcuT® as they convert your tub into a walk-in shower in just one day. There is no plumbing or demolition required, and there is little to no disruption. A regular shower curtain is all that's needed to stop any water overspray concerns; they can also install shower doors if you'd prefer.

IT'S LIKE HAVING A WALK IN SHOWER WITHOUT THE COST!

TubcuT® creates an opening that fits your needs. Unlike cap systems, The TubcuT® adapts to you and what your lifestyle requires. With TubcuT's® exclusive process, you dictate where they create the opening, how wide it will be, and how low.

The TubcuT® threshold is typically 4" above the floor giving you more accessible, safer access, the same as a typical shower pan. TubcuT® Follows the same exact contour of your tub there, and there is no ledge on the

threshold or bulky plastic inserts. Those inferior plastic inserts are just caulked in and are subject to leaking and will need service down the road. The TubcuT® is custom fitted to your tub creating a seamless, waterproof shower with a professional factory appearance that's unlike anything else available. The TubcuT® is the only tub to shower conversion that can be reversed! If you save the cutout section of the tub, they can easily restore your bathtub to its original condition if needed.

The TubcuT® changes lives, but many dismiss it as something only for the elderly. However, there is another class of customer that it suits just as well, those with health and mobility issues. People with multiple sclerosis, Parkinson's disease, arthritis, fibromyalgia, muscular dystrophy, cerebral palsy to name a few, will benefit significantly from The TubcuT®.

For accident victims, anyone in chronic pain, people with knee or hip replacements or any neuro-muscular disease, the TubcuT® can be a life-changing product. To find out more, contact them today!

About Accepting Death

By Ernest Morgan, from *Dealing Creatively with Death*

If we were to walk across the fields in summertime to some undisturbed spot and mark off a piece of ground say four feet square then examine this little area minutely, we would find an astonishing variety of life. There would be many species of plants; possibly a mouse's nest, and other small creatures. Then resorting to a microscope, we would observe an incredible host of microorganisms functioning in association with the larger life forms.

In that little square of ground we would have seen an interdependent community of life in which

birth and death were continuously taking place and in which diverse life forms were sheltering and nourishing one another. Written in the rocks beneath was a story of a similar process going back through eons of time.

Humankind is part of the ongoing community of nature, on a world scale, subject to the same cycle of birth and death which governs all other creatures and, like them, totally dependent on other life. Sometimes we tend to forget this. Birth and death are as natural for us as for the myriad of creatures in that little square of ground.

ANYONE CAN SUFFER FROM ANXIETY NEUROFEEDBACK CAN HELP

By Renee Chillcott, LMHC

It's human nature to seek out the reasons why we feel anxious. Very often we look at external factors for the root cause; the current pandemic, being unhappy in a job, unhappy with living situation, or conflict with family or significant others tend to be our "go to". We may also look at our past experiences, upbringing, or past trauma, to explain this unrelenting uneasy feeling we have inside.

The truth is that anxiety is a pattern of neuron firing in the brain that can be present from birth and life situations can exacerbate it to the point of dysfunction. Brain neural patterns don't necessarily dictate how we will behave, however, trying to change the environment, situation or behavior won't alter the patterns. Therefore, you can't talk someone out of anxiety. Anxiety is also not reserved for adulthood, it can cause dysfunction and issues in life regardless of age. Adults are unable to "change" their way out of anxiety and for children and young adults, you can't change their routines or discipline them from feeling anxious.

In babies and infants, anxiety neural patterns in the brain may present as:

- Colic
- Fussiness
- Not a good sleeper
- Tantrums
- Sensitive

As a child gets older into the toddler years it may present as:

- Terrible two's, three's, and four's
- A spirited child
- Cranky, fussy, and not a good sleeper or napper
- Tantrums
- Picky or sensitive
- Difficulty with separation

I know what you are thinking. These symptoms are normal for children this age. And you are correct; they are perfectly normal, developmental behaviors for infants and toddlers. This is why diagnosing anxiety in young children is very difficult and not usually done unless symptoms are severe. In most cases, anxiety manifests at an older age when the symptoms are abnormal for the age or stage of development. And even then, parents tend to want to attribute what they observe to behavioral, personality or social causes.

"She didn't study for her test and that is why she's refusing to go to school today". "He's unmotivated to do anything except play video games and that is why his stomach hurts all of the time and he sleeps

all day". "She just has too many activities scheduled and that's why she's overwhelmed". "He has too much homework and is up all night studying which explains why he doesn't sleep well".

The reality of the situation is that neither your child's personality nor their hectic schedule is the culprit. It's their brain, or rather, the neural patterns in their brain, that is not allowing them to handle the workload at school, pressure with friends, feeling good, making good food choices, having a normal sleep schedule, and so on. And to make it even harder to diagnose or differentiate, anxiety patterns can look different but produce the same results.

Here is an example of one type of anxiety pattern. Increased BETA and High BETA is located in the central and frontal lobes. This could cause anxiety symptoms that range from OCD, anger control issues, irritability and impulsivity, poor judgement, excessive worrying, feelings of being overwhelmed and depressed, among others.

Very often, we contribute anxiety to traumatic events. As in the case of PTSD (Post-Traumatic Stress Disorder). Therefore, it becomes difficult to recognize the early symptoms of anxiety in children who haven't experienced a traumatic event. However, as mentioned previously, these neuron firing patterns can be present from birth and may not have a root or cause in emotional or physical trauma. It's a pattern in the brain that they are born with.

As a child reaches school age, anxiety may look like:

- Worrying about performance, grades
- Worrying about parents or loved ones dying
- More separation anxiety
- Fear of getting sick (vomiting is most popular)
- Fear of getting sick at school
- Social anxiety, difficulty with friends
- Feeling overwhelmed
- Nightmares or unable to sleep/fall asleep alone
- Sleep walking, talking or restless sleep
- Fatigue
- Refusal to go to school or meltdowns when going to school
- Frequent trips to the clinic
- Vocal or motor tics
- Loss of appetite or poor diet
- Somatic symptoms such as stomachaches, headaches, diarrhea, or digestive problems
- Poor grades usually due to missing school or falling behind

As they reach the teenage and adult years, the problem can become more apparent and more severe:

- Continued worry and difficulty handling traumatic events
- Dropping out of extra-curricular activities
- More social interaction difficulties or isolation
- Depression, suicidal or homicidal ideations
- Poor choices when confronted with life decisions (drugs, alcohol, sex)
- Beginning to develop dysfunctional coping skills or self-medicating
- Poor school performance/ failing classes, suspensions or expulsions
- Poor conduct: lying, stealing, violence
- Onset of panic attacks
- Continued somatic symptoms and fluctuation in weight (gain/loss)
- Manifestation into other anxiety disorders such as: Obsessive-compulsive Disorder, Eating Disorders, Trichotillomania, PICA, Body Dysmorphic Disorders, Phobias, Panic Disorders, Addiction, Social Anxiety, Performance Anxiety, etc.

According to The Anxiety and Depression Association of America, “Anxiety and depression are treatable, but 80 percent of kids with a diagnosable anxiety disorder and 60 percent of kids with diagnosable depression are not getting treatment, according to the 2015 Child Mind Institute Children’s Mental Health Report.”

Many health professionals believe that anxiety is a normal part of childhood and symptoms are not cause for alarm. Others believe that parenting and discipline need to be improved or implemented to treat the symptoms. In severe cases, medication is introduced as a treatment, but unfortunately, many children who suffer with symptoms, are medication resistant or not severe enough to medicate.

Adults can experience similar frustration when treating anxiety with medication. The diagnosis is a broad one and there may be very different neuron patterns causing the anxious feelings. This can cause treatment to be somewhat of a guessing game. Others struggle with side effects and dependency.

Neurofeedback can help. Neurofeedback can not only help reduce the anxiety symptoms specific to you, but it can “retrain” the neural patterns in the brain so that anxiety is better managed or controlled throughout your life. Through Neuroplasticity, Neurofeedback becomes a permanent correction of the anxiety patterns in the brain.

WHAT IS NEUROFEEDBACK?

Neurofeedback, also known as EEG biofeedback, has been studied and practiced since the late 60’s. It is exercise for your brain; allowing you to see the frequencies produced by different parts of your brain in real-time and then through visual and auditory feedback, teaches the brain to better regulate itself. Neurofeedback can be used to help detect, stimulate, and/or inhibit activity in the brain safely and without medication. It can help restore a wider “range of motion” in brain states, much like physical therapy does for the body.

While the client sits comfortably watching a movie or pictures appear on the screen (a calm and focused state), the EEG equipment measures the frequency or speed at which electrical activity moves in the areas where electrodes have been placed. This information is sent to the therapist’s computer. The therapist is then able to determine what frequencies are out of balance. For example, when the EEG shows that you are making too many “slow” or “sleepy” waves (delta/theta) or too many “fast” waves (high beta), the therapist adjusts a reward band to encourage more balanced activity. This encouragement or “reward” happens through an auditory reinforcement of “beeps” and sometimes through visual reinforcement of changes on the screen.

WHAT TYPES OF CONDITIONS DOES NEUROFEEDBACK HELP?

Symptoms of these conditions, among others, can improve through neurofeedback training:

- Anxiety • Sleep disorders • Depression • ADD/ADHD
- Sensory processing disorder • Bipolar disorder

- Seizure disorders • Auditory/visual processing
- Chronic pain/Fibromyalgia • Migraines/headaches
- Traumatic brain injuries • Stroke • Cognitive decline
- Peak performance • Oppositional defiant disorder
- Rages/mood swings • Attention/focus/concentration
- Reactive attachment disorder • Autism/Asperger’s
- Learning disabilities • Obsessive compulsive disorder

WHAT IS AN EXAMPLE OF IMPROVEMENTS I MAY SEE?

At our center, our goal is to teach you how to tune into your own functioning. With children, we also teach the parents how to look at overall functioning rather than piecing together events or moments. We help you open your mind to possibilities with Neurofeedback rather than give too many examples that confuse the process or feel like a placebo. Changes you may experience or observe after a session are indicative of a learning process that will lead to improved functioning. **Examples of those positive changes may be:**

- Sleep patterns/quality of sleep
- Energy levels, calmer or more activated
- Ability to focus or concentrate
- Physical symptoms such as pain, headaches, migraines, tics, balance issues
- Mood or emotions
- Motivation and organization
- Feelings of Well Being
- Obsessive behaviors or thoughts
- Memory/cognitions
- Anxiety patterns or trauma patterns
- Coping
- Regulation
- Learning, communicating, and/or performance

WHAT IS AQEEG (QUANTITATIVE EEG) OR BRAIN MAP?

The QEEG is a quantitative EEG. It’s also called a brain map and does just that...it gives us a map of what is going on with the entire brain at one time. We attach electrodes to the whole head, 19 spots, and then record the brain waves with eyes open for 5 minutes and with eyes closed for 10 minutes. This recording is then sent to an independent specialist be read and analyzed. They are able to not only give us a summary of significant findings but the report also shows the results of analyzing the data several different ways. The brain activity is not only compared spot by spot over the entire head, but we can also look at connections, symmetry, how different parts are communicating and all of this data is compared to a database of peers (same sex, handedness and age). It can help us see what areas need to be addressed more efficiently than just training spot by spot.

We don’t always need this data to make improvements in symptoms but we do recommend it in certain situations. A QEEG can also be helpful information when diagnosing and/or trying to decide the best medication/supplement recommendations.

IS THERE ENOUGH RESEARCH?

Neurofeedback has been researched since the 60’s. Here are some resources for research. We have several

journal articles, studies and books in our office for you to enjoy, however because of the amount of information out there, we cannot possibly have everything. Here are a few resources.

Look up the work of:

Dr. Joe Kamiya and Dr. Barry Sterman (Credited for earliest development of Neurofeedback).

Look for specific researched conditions:

Cure Erectile Dysfunction and Peyronie's

Simply Men's Health, the # 1
ED clinic established in 2014,
brings their World-Renowned
RejuvaWAVE®, the Gold-Standard in WAVE
therapy for ED, to Boca Raton.

Serving West Palm Beach, Boca Raton and Miami, Simply Men's Health is quickly grabbing attention as the leader in Men's Sexual Health for introducing the most advanced, cutting-edge treatments to CURE ED and Peyronie's Disease. Even when all else has failed, Simply Men's Health has over 90% success rate in restoring your sexual vitality.

Turn back the clock with Simply Men's Health, RejuvaWAVE® and RejuvaEnhancement™ P-Shot® Treatments. Men of all ages can enjoy a spontaneous, active sex life once again, as they did when they were much younger.

Why Medicate When You Can CURE?

Simply Men's Health has revolutionized the standard of care by introducing and developing the ground breaking RejuvaWAVE® and RejuvaEnhancement™ Procedure to CURE ED and Peyronie's. Traditional ED Treatments such as the "blue pill" just offer a "band aid" approach to mask the condition, while the underlying disease and degenerative age-related erectile dysfunction continues to progress until eventually the

RejuvaWAVE® only available at Simply Men's Health

- 100% SAFE
- Non-invasive
- No Down Time
- No Side Effects
- 10-15 minutes per session
- Over 80% Patient Satisfaction

pills stop working. Their exclusive, state-of-the-art RejuvaWAVE® (acoustic-pressure wave) combined with RejuvaEnhancement™ Procedure (PRP Pshot®) repairs damaged tissues and stimulates the regrowth of new blood vessels. Thereby helping to REVERSE and CURE the underlying cause of Erectile Dysfunction and Peyronie's.

Simply Men's Health is the leader and pioneer in the field of Men's Sexual Health, and changed the way Erectile Dysfunction was treated in the United States. Simply Men's Health was the first to introduce Acoustic Pressure Wave therapy (shockwave) for erectile dysfunction (ED) in South Florida. And now Simply Men's Health is revolutionizing the field of men's sexual health by combining RejuvaWAVE® with the state-of-the-art RejuvaEnhancement™ P-Shot® Procedure to help reverse the inevitable aging process and treat ED and Peyronie's Disease. Peyronie's is a build up of scar tissue in the penis that causes a curvature or bend in the erected penis. This disorder typically causes a great deal of pain during intercourse.

Is RejuvaWAVE® Safe? Instead of Medicating – Cure with RejuvaWAVE®?

Yes RejuvaWAVE® is an FDA cleared technology, originally developed in Europe and used world-wide and has virtually no risk and no side effects. Although acoustic pressure wave technology has been used in Europe for almost 20 years, it is relatively new to the US for ED and Peyronie's. RejuvaWAVE® uses state-of-the-art, scientifically proven technology that uses Acoustic Pressure Waves to stimulate cellular metabolism, enhance blood circulation, and to stimulate tissue renewal, which creates new blood vessels in treated areas. As the leader in men's sexual health, Simply Men's Health introduced their exclusive RejuvaWAVE® technology in 2015, and the results have been nothing short of amazing!

The RejuvaWAVE® is revolutionary, non-invasive, and HEALS THE UNDERLYING CAUSES OF ED.

Traditional treatments for ED, such as pills or injections, lose effectiveness over time and have to be used every time a man wants to engage in sexual activity. Our treatment is about helping men return to their younger healthier selves, and enabling a spontaneous, active sex life.

RejuvaEnhancement™ PRP P-Shot®

RejuvaWAVE® stimulates your body's own healing response and stimulates the growth of new blood vessels and renews tissue in the area treated. The RejuvaEnhancement™ Procedure uses the growth factors from your own body to activate your own body's stem cells and restorative healing capacity.

Enhance Size as well with the P-Shot®

The RejuvaEnhancement™ Procedure works synergistically with and exponentially magnifies the restorative effects of RejuvaWAVE® to restore one's sexual vitality. Imagine be able to enjoy a spontaneous and active sex life again. No more pills. Also, this procedure can increase both the length and girth of the penis by up to one inch.

Journal of Sexual Medicine publishes new study June 2021:

**It's True!
The P-Shot®
Procedure
Helps Men
with Erectile
Dysfunction**

Simply Men's Health is a certified provider of the P-Shot®

P-Shot® procedure — which uses PRP improves the circulation, nerve conduction, and collagen production and so to improve the health of tissue in over thirteen thousand research papers in multiple tissue types.

Re-ignite the SPARK in your bedroom with just one visit – results guaranteed

Imagine enjoying sex again with your loved one in just one visit. Simply Men's Health has customized Intracavernous Pharmacotherapy (ICP) which can give you back you love life in ONE VISIT. 98% success rate Results guaranteed or the visit is free!

How to Get Started?

At Simply Men's Health, we respect your time and privacy. You receive individualized care with our experienced staff of physicians. We pinpoint the exact cause of your sexual health and create a customized treatment plan. Almost everyone will experience a decline in sexual functioning. But with the advent of the new direction in medicine, Erectile Dysfunction is no longer an inevitable part of aging. Simply Men's Health's innovative approach can restore your sexual confidence and allow you to enjoy a Spontaneous and Active Sex life again!

WHAT OUR PATIENTS ARE SAYING:

Testimonial: "I am celebrating my second anniversary since being treated at Simply Men's Health and I am maintaining the high level of performance I achieved with RejuvaWAVE® treatment. My spontaneity and stamina is back and my frustration and performance anxiety that goes along with it is gone. I am performing like I did decades ago. It's like magic! There are a lot of copycats out there, but Simply Men's Health was the first to provide this treatment and they are the best!" – Steve, Wellington.

Testimonial: "I'm a 70 year old widow and have had ED for over twenty years. Unexpectedly, I met a wonderful lady and when we wanted to take our relationship to the next level, I couldn't perform. I came to Simply Men's Health and after several months I started to notice improvements... and after about six months ED is no longer a problem. I have sex regularly without any pills or needles." – Joseph, M.

Testimonial: "I am in my 70's and have diabetes, high cholesterol, and had prostate removed for cancer several years ago. I had tried everything, and thought my sex life was over. I have been coming to Simply Men's Health for about six months, and the results have been amazing. They have restored my ability to enjoy a spontaneous sex life again. The RejuvaWAVE® and RejuvaEnhancement™ procedures are remarkable. I feel like Superman." – E.M.

All the Rage with Celebrities, The Vampire Facelift and Facial Can Give You Your Youthful Appearance Back

As we age skin can become dull, lose elasticity and droop. There are of course surgical options and hyaluronic acid fillers, but the procedures that are topping everyone's wish list are the Vampire facelift and the vampire facial.

Naturally found in your blood, platelets are a rich source of proteins called growth factors, which promote healing and regeneration. Platelet-rich plasma (PRP) contains a higher concentration of platelets than the amount normally found in your blood. To create PRP a sample of your blood is drawn and placed in a centrifuge, which separates out the platelets. These concentrated platelets are recombined with your blood plasma to make PRP. Platelet Rich Plasma (PRP) is then reinjected into the problem areas.

PRP injections are an alternative to Botox and fillers. Platelet Rich Plasma is taken from the patient's own blood, spun down and reintroduced into the face just like a filler to create and stimulate your body's own growth factors. PRP produces collagen, hyaluronic acid, elastin, and plumps the skin. PRP injections with the vampire facelift maintain the facial contours of the natural look of the patient.

With just four to six PRP treatments over a two to four-week period, patients are seeing results that last for up to 2 years, so over the long-term, it's very cost effective and 100% safe. You don't have to be concerned about toxins or chemicals with your own PRP.

Vampire Facelift

For the "facelift", the PRP is injected into various areas of the face to create a plumping effect. The procedure is safe because it's utilizing the patient's own blood and it's free of toxins. The body begins to "repair" itself and regenerates collagen, elastin and healing properties, which create a youthful appearance.

Vampire Facial

The facial works in much the same way as the "facelift", but with tiny perforations in the skin as opposed to injections. The tiny perforations allow the PRP to penetrate into the dermal layers, and the results continuously improve the glow of the skin within two to three months. Many patients report plumped skin, a brighter complexion and seeing less noticeable dark circles.

Bring out your inner beauty naturally. Your beauty will be revived with a natural face shape, increased collagen, smoother skin, increased blood flow, youthful glow, and a younger appearance.

The O-Shot

Non-surgical procedure to treat sexual dysfunction and improve orgasms in women.

P-Shot®

Penile rejuvenation for peyronie's disease & erectile dysfunction.

Vampire Breast Lift

The Vampire Breast Lift is a non-surgical way of enhancing the breasts, and giving them a lift, without causing the downtime and pain that implants or even a standard breast lift would involve. It can give fullness, lift and enhance cleavage.

Aesthetic Treatment Centers

As a leader in the industry, ATC always offers the latest technology in skin and body care. By combining their expertise through industry leaders, innovative procedures, and cutting-edge products, you will always receive remarkable results within the serene, inviting atmosphere of the Aesthetic Treatment Centers.

My Partial Denture is Moving... What Can Be DONE?

Partial dentures have long been used to help fill in the spaces where people are missing teeth. These types of appliances are “removable”, meaning they can be taken in out of the mouth. Partials have served an important function over the years, allowing patients to chew and smile when other options are not possible either due to lack of remaining/supporting teeth or financial limitations.

Although these appliances are very useful, they do not come entirely free of potential problems. Partial dentures typically rest on the gums in the empty spaces and usually have metal clasps that grab onto the adjacent teeth for support. In many cases, the clasps are visible when patients speak or smile. In addition, the clasps can put tremendous strain on the remaining teeth which could ultimately lead to additional loss of teeth.

Another common complaint with partial dentures is the “rocking” or “movement” that can occur during chewing. This is a possible issue due to the fact that our gum and bone continually changes over time, which alters the way the prosthesis sits in the mouth. In addition, rocking can occur if the teeth supporting the partial denture are loose. Ultimately, partials can serve patients well, but some do feel that the movement, pressure on the remaining teeth or impact on chewing and speech are problematic.

STABILIZING THE PARTIAL:

An alternative does exist that can help remove some of the areas patients most complain about with their partial. If sufficient bone is present in

the areas where teeth are missing, dental implants may be used to help support and stabilize the prosthesis.

Dental implants serve as “root replacements” that can be placed in the mouth where your previous roots lived in the bone (before the teeth were removed). Under most circumstances the roots will bond with the bone over a number of months. Typically we hear how crowns can be connected to the healed implants to replace teeth. We also have the ability to use these implants in different ways. In the example of stabilizing a denture, connections similar to a trailer hitch or ball can be attached to the implant. Snaps that lock onto these balls are incorporated into the denture on the underside (where the partial rests on the gums).

This allows a patient to “snap” the partial into place and limits movement considerably. In most occasions, metal clasps can be avoided. The benefits of this procedure are often considered the elimination of rocking or movement, improved chewing ability and improved esthetics.

This often simple treatment offers patients the ability to improve issues they may have related to partial dentures. A thorough evaluation of the bone using a 3D CT Scan can help determine if this therapy is appropriate. It is important to remember that no one treatment is suitable for all cases.

Lee R. Cohen, D.D.S., M.S., M.S.

Lee R. Cohen, D.D.S., M.S., M.S., is a Dual Board Certified Periodontal and Dental Implant Surgeon. He is a graduate of Emory University and New York University College of Dentistry.

Dr. Cohen completed his surgical training at the University of Florida / Shands Hospital in Gainesville, Florida. He served as Chief Resident and currently holds a staff appointment as a Clinical Associate Professor in the Department of Periodontics and Dental Implantology. Dr. Cohen lectures, teaches and performs clinical research on topics related to his surgical specialty.

The focus of his interests are conservative approaches to treating gum, bone and tooth loss. He utilizes advanced techniques including the use of the Periolas Dental Laser (LANAP procedure) to help save teeth, dental implants, regenerate supporting bone and treat periodontal disease without the use of traditional surgical procedures. Additionally, Dr. Cohen is certified in Pinhole Gum Rejuvenation, which is a scalpel and suture free procedure to treat gum recession with immediate results.

Dr. Cohen uses in-office, state of the art 3D Green 2 CT imaging which offers Hi Resolution 5 Second Low Dose Scans to develop the least invasive dental implant and bone regeneration treatment options. Dr. Cohen and his facility are state certified to perform both IV and Oral Sedation procedures. Botox® and Dermal Fillers are also utilized to enhance patients' cosmetic outcomes.

Dr. Cohen formerly served on the Board of Trustees for the American Academy of Periodontology and the Florida Dental Association. He is past president of the Florida Association of Periodontists and the Atlantic Coast District Dental Association. Dr. Cohen is a member of the American College of Maxillofacial Implantology and the American Academy of Facial Esthetics. In addition, he has been awarded Fellowship in the American College of Dentists, International College of Dentists and the Pierre Fauchard Academy.

THE CORNEA

By David A. Goldman MD

Although people may have heard the word ‘cornea’ in reference to the eye, many are unaware of what it really refers to. While diseases such as glaucoma and macular degeneration affect the back of the eye, the cornea is in the front of the eye.

In fact, the cornea is the most anterior structure of the eye. It is the clear part responsible for much of the focusing of light waves which enter the eye. When patients place contact lenses on their eye, they are placing them on their corneas. When patients develop an abrasion (scratch) or infectious ulcer of the eye, it is typically in the cornea.

The cornea consists of several layers, but it is simplest to break it down into three: epithelium,

stroma, and endothelium. The epithelium is the superficial outer layer of cells. When a scratch occurs on the cornea, the epithelium acts quickly to fill in the scratch. In cases of severe dry eye, tiny dried out “holes” can also appear in the epithelium.

The stroma is the central portion of the cornea, and comprises the bulk of it. It provides the majority of structural support to the cornea. When patients undergo LASIK surgery, it is the stroma that is affected. In LASIK, a laser creates a flap within the stroma. That flap is then lifted and a laser then reshapes the cornea under the flap. For patients who are myopic (nearsighted), the laser flattens the center of the cornea. For patients who are hyperopic (farsighted), the laser removes tissue in a circular pattern to steepen the cornea. The endothelium is

the most posterior layer of the cornea. Consisting of a layer of cells, these endothelial cells work as microscopic pumps to pump fluid out of the cornea to keep it clear. As we age the number of endothelial cells decline. Typically this is asymptomatic. In conditions such as Fuchs Dystrophy, however, patients are born with a lower number of endothelial cells and at some point may require surgery. Fortunately, the surgical options have improved greatly – less than ten years ago a new procedure was developed called DSAEK. In the past, corneal swelling which did not respond to topical eye drops required a full thickness corneal transplant. With the DSAEK procedure, solely the posterior layer of cells is transplanted. With this newer technique, vision can be restored in weeks instead of months.

This is not to say that a full thickness corneal transplant does not have its place in eye care. Conditions such as keratoconus, where the cornea becomes irregularly cone shaped, and scars of the cornea can significantly limit visual acuity. In these cases, replacing all layers of the cornea can work well to restore vision. In many cases, laser vision correction can be performed over a corneal transplant so that the patient can see well without glasses.

While problems of the cornea, whether inherited or environmental, can significantly disturb vision, there are multiple procedures available to improve vision. As opposed to posterior eye pathology such as glaucoma and macular degeneration, the overwhelming majority of vision problems related to the cornea can be fixed.

DAVID A. GOLDMAN

Prior to founding his own private practice, Dr. David A. Goldman served as Assistant Professor of Clinical Ophthalmology at the Bascom Palmer Eye Institute in Palm Beach Gardens. Within the first of his five years of employment there, Dr. Goldman quickly became the highest volume surgeon. He has been recognized as one of the top 250 US surgeons by Premier Surgeon, as well as being awarded a Best Doctor and Top Ophthalmologist.

Dr. Goldman received his Bachelor of Arts cum laude and with distinction in all subjects from Cornell University and Doctor of Medicine with distinction in research from the Tufts School of Medicine. This

was followed by a medical internship at Mt. Sinai – Cabrini Medical Center in New York City. He then completed his residency and cornea fellowship at the Bascom Palmer Eye Institute in Miami, Florida. Throughout his training, he received multiple awards including 2nd place in the American College of Eye Surgeons Bloomberg memorial national cataract competition, nomination for the Ophthalmology Times writer’s award program, 2006 Paul Kayser International Scholar, and the American Society of Cataract and Refractive Surgery (ASCRS) research award in 2005, 2006, and 2007. Dr. Goldman currently serves as councilor from ASCRS to the American Academy of Ophthalmology. In addition to serving

as an examiner for board certification, Dr. Goldman also serves on committees to revise maintenance of certification exams for current ophthalmologists.

Dr. Goldman’s clinical practice encompasses medical, refractive, and non-refractive surgical diseases of the cornea, anterior segment, and lens. This includes, but is not limited to, corneal transplantation, microincisional cataract surgery, and LASIK. His research interests include advances in cataract and refractive technology, dry eye management, and internet applications of ophthalmology.

Dr. Goldman speaks English and Spanish.

THE ARRIVAL

Do you ever find yourself in what seems like a hopeless situation? Is your life so hectic that you wish for just a moment of peace? Do you wish you laughed more, stopped to smell the roses, and enjoyed life more easily? Are relationships in your life broken – do you long for love?

If you answered “yes” to any of the above, then I have the answer for you. If you answered “no” then still read this article, commit it to memory, and bring it back to mind when need it.

Here is the answer: Christmas. Christmas is the season in which we can find all of the things we want (and need): hope, peace, joy, and love.

Many times Christmas is referred to as the Advent Season. In simplest terms, “advent” means “arrival”. But when speaking of Christmas, what exactly has arrived?. Sure, we celebrate the arrival of a baby born to a virgin in a small village in the Middle East. The baby’s name? Jesus.

But the arrival of Jesus means a lot more than just another birth. You see Christmas is the season when we celebrate the arrival of hope, peace, joy, and love because Jesus brings all those things in a relationship with Him.

We can have hope in a relationship with Jesus. No matter what may come, we anchor ourselves to the truth of Who Jesus is and what He’s done for us. The Scriptures remind us of the hope Jesus brings: “The people who walked in darkness have seen a great light; those who dwelt in a land of deep darkness, on them has light shone.” And we see it fulfilled: “She will bear a son, and you shall call his name Jesus, for he will save his people from their sins.”

Matthew 1:21

We can know peace because of the life we can have in Him. The prophets of old wrote: “For to us a child is born, to us a son is given; and the government shall be upon his shoulder, and his name shall be called Wonderful Counselor, Mighty God, Everlasting Father, (the) Prince of Peace”. Isaiah 9:6 And on the night in which Jesus was born, the angels proclaimed: “Glory to God in highest heaven, and peace on earth to those with whom God is pleased.” Luke 2:14

We can have joy in an abundant life in Christ. The angels also said: “Fear not, for behold, I bring you good news of great joy that will be for all the people. For unto you is born this day in the city of David a Savior, who is Christ the Lord.” Luke 2:8-14

And we can experience an unconditional love that never runs out. “For God so loved the world, that he gave his only Son, that whoever believes in him should not perish but have eternal life. For God did not send his Son into the world to condemn the world, but in order that the world might be saved through him.” John 3:16-17

So during this Advent Season as we celebrate The Arrival, think about all that means for us in our daily lives. As the carols play on the radio, as you see the “The Reason for the Season” bumper stickers, as you drop coins in the red buckets on the way into the store, remember that it’s about Jesus and the hope, peace, joy, and love that comes in a relationship with Him.
