# The Top 10 Benefits of DENTAL IMPLANTS

**W**hen it comes to replacing teeth that are missing or damaged, you have several options. However, one option stands out above the rest is dental implants. Dental implants offer benefits that other tooth replacement options, like dentures or bridges, just can't offer. Here are the top benefits of this innovative option:

1

## **PREVENTS BONE LOSS**

When you lose teeth, you also tend to lose bone mass in your jaw. Your jawbone needs the stimulation it gets when your teeth connect to maintain its mass. Dental implants are the only tooth replacement option that also replaces that jaw bone stimulation, helping to prevent bone loss.

2

## **MATCHES YOUR NATURAL TEETH**

Dental implants come in a wide variety of shapes and sizes. Your dentist will work with you to design implants that match the color of your surrounding teeth and fit perfectly in the gap. No one but you and your dentist will know which teeth are implants.

3

## **RESTORES BITE FORCE**

Because dental implants are anchored into your jaw with a titanium post that replaces the tooth root, they allow you to bite with more or less the same amount of force you could use with your natural teeth. Other tooth replacement options do not restore nearly as much of your bite force because they sit on top of the gums and aren't anchored in place.

**4**  
**PREVENTS CHANGES  
IN THE SHAPE OF YOUR FACE**

Your teeth help support your facial structure. When you lose teeth, you lose that support, which eventually causes your face to change shape, making you appear older. Dental implants provide similar support for your face as your natural teeth, preventing it from changing shape.

**5**  
**ENABLES NATURAL SPEECH**

Some tooth replacement options, like dentures, can impact your ability to pronounce words correctly. Missing teeth can also alter your speech. Because dental implants feel and function just like natural teeth, they enable you to speak easily and naturally.

**6**  
**WON'T GET CAVITIES**

Artificial teeth still need to be cared for to prevent bacteria from building up in your mouth and causing infections, but the material that dental implants are made of can't decay. You'll never have to worry about getting cavities in your dental implants!

**7**  
**EASY TO CARE FOR**

Taking care of dental implants is easy! Just brush and floss like you normally would. Dental implants don't require you to buy any special products to clean or care for them. There's no need for cups, cleansing tablets, adhesive, or special flossers. You just brush and floss, just the way you would with your natural teeth.

**8**  
**NO EMBARRASSING SLIPPAGE**

Patients with dentures sometimes feel self-conscious about speaking, laughing, or eating in public, as dentures can visibly shift or slip inside your mouth. Dental implants are firmly anchored in place and will never embarrass you.

**9**  
**SUPPORTS ADJACENT TEETH**

A gap in your mouth caused by a missing tooth can cause the teeth on either side of the gap to shift positions, leading to misalignment. Dental implants fill the gap, allowing you to maintain a straight, even smile.

**10**  
**PREVENTS BONE LOSS**

Other tooth replacement options will need to be repaired or replaced periodically, but dental implants are designed to last for the rest of your life.

If you're in need of a tooth replacement option, you should definitely consider dental implants. To find out if you're a good candidate for dental implants, you can schedule a complimentary consultation and 3D CT scan with our specialist team. Please call **(561) 205-5000** to reserve your visit! We look forward to meeting you.

**Dr. Forrest** is the Clinical Director of **5th Avenue DENTAL**. For 20 years, Dr. Forrest has been one of Florida's leading dentists treating some of the most challenging cases. # ARE YOU FOOLING YOURSELF ABOUT YOUR HAIR LOSS?

## We Can Help – and That’s No Joke

By Alan J. Bauman, MD, ABHRS

April’s known for pranks – a jokester pins a silly sign on your back or puts salt in your sugar bowl, with everyone in on the joke but you.

But let’s face it – if you’re ignoring or trying to hide thinning hair, you might be pulling the biggest prank of all this month on yourself – and that’s no laughing matter.

Thinning hair isn’t likely to reverse itself without professional intervention. And that bald spot sporting a comb-over? For many men, that hair’s not coming back on its own, no matter how much you want it to.

But you likely already knew that.

Fortunately, you have a “secret weapon” at your disposal – actually lots of secret weapons. Hair problems in April or in any of the other months of the year are no match for Bauman Medical, where helping your hair look better than you thought it ever could again is no joke.

We’re internationally famous for our hair transplants (more about those below), but there’s so much more we can do. No kidding.

If there’s a way to regenerate your hair, we offer it. Here are three of our most popular regenerative technologies:

### BAUMAN TURBO LASERCAP®

In just five minutes a day, you can achieve improved hair growth at home with our medical grade Bauman TURBO LaserCap® which provides low-level laser therapy (also known as red light therapy). It’s FDA-cleared, portable, hands-free, cordless and rechargeable. It’s also drug and chemical-free with no risk of side effects.

Proper and consistent use of medical-grade low-level laser therapy has been scientifically proven to improve hair quality, strength, and thickness, as well as promote hair regrowth.

### PRP (PLATELET-RICH PLASMA)

PRP is a comfortable in-office procedure that takes about an hour with no recovery time, downtime, or significant risk. Derived from a small blood sample, platelets and plasma are separated from other components of the blood, concentrated, and then painlessly applied into the scalp under local anesthesia where weak hair follicles exist. When performed using the appropriate concentration of platelets and proper application techniques, you can expect hair growth improvements that last a year or more from a single treatment.

### PDOgro™

Researched and developed right here at Bauman Medical, we were the first hair restoration clinic in the U.S. to use PDO threads to enhance hair growth. PDO, or polydioxanone, is a synthetic absorbable FDA-cleared material. Used for decades in surgery, and more recently in aesthetic procedures to reverse the appearance of skin aging, PDO threads placed into the scalp have been shown to stimulate hair regrowth. Typically performed in combination with PRP in a no-downtime “lunch-break” procedure, the threads are comfortably applied into the scalp. They dissolve and are absorbed over time, safely stimulating collagen production, new blood vessel formation, and a release of powerful rejuvenating growth factors.

### FUE HAIR TRANSPLANTS

Some people’s hair loss is too advanced for our regenerative approaches. Your hairline may be receded, your crown just too thin, or your hair follicles severely depleted or gone.

No time to fool around.

It’s time to harness the *power of the transplant*.

Luckily, hair transplant procedures have become more effective, comfortable, and 100% natural-looking in recent years due to major innovations in techniques and technology. The latest type is known as FUE (follicular unit extraction).

FUE hair transplantation allows for the harvesting of follicles without leaving behind a telltale linear scar and with the added benefits of a shorter, less restricted, and more comfortable recovery. Results are natural looking, not like the old-fashioned “plugs” that your father or grandfather may have had decades ago.

Bauman Medical employs several types of FUE depending on your particular need or situation. Among our most popular FUE procedures is the “No-Shave Long-Hair Preview” VIP/FUE™.

This breakthrough minimally invasive hair transplant procedure offers patients all the advantages of traditional FUE, including no staples, no stitches and no-linear-scar, and a more comfortable and less restricted downtime compared to outdated invasive linear FUT “strip” harvesting.

Before and 12 months after

Before and after FUE Hair Transplant by Dr. Alan Bauman

What makes it different? It's the only transplant procedure not requiring any trimming or shaving of the donor area. That means no dramatic change in your hairstyle after the procedure (such as looking like you had a buzzcut), making it totally discreet. It includes the unique benefit of the "long hair preview," which allows you to see the results of your transplant immediately after your procedure – making it the ultimate experience in minimally-invasive hair transplantation.

#### LEARN MORE

We take your situation very seriously, but it doesn't mean we won't try as hard as we can to fool other people into thinking that the hair we help you grow is completely natural.

Don't wait another day to find out about all we have to offer a man (or woman) who wants to restore their hair. Call **561-220-3480** or point your camera at the QR code below to schedule your private one-on-one in-person or virtual consultation at [www.baumanmedical.com](http://www.baumanmedical.com).

### WHAT DO HAIR TRANSPLANT CREDENTIALS MEAN?

I know I'm not the only hair restoration surgeon you'll discover in your research, but I believe I'm one of the most well-qualified and experienced ones you'll encounter. Before choosing someone for this important decision, I encourage you to only settle for someone who meets all of these credentials:

- Certification from ABHRS – American Board of Hair Restoration Surgery. After more than 20 years, only approximately 200 doctors worldwide have received this certification through a rigorous written and oral board examination process. It is the only recognized certification in the field of Hair Restoration Surgery.
- A fellow of the International Society of Hair Restoration Surgery (FISHRS). Less than 10% of all ISHRS members worldwide have achieved the coveted "Fellow" status recognizing their continuing commitment to excellence and having met exceptional educational criteria.
- Membership in the International Alliance of Hair Restoration Surgeons (IAHRS). This elite group was hand-selected by the premier consumer organization dedicated exclusively to protecting hair restoration patients through their commitment to excellence. IAHRS members represent only the best in the discipline and the true leaders in surgical hair restoration.
- Membership in the American Hair Loss Association (AHLA). The AHLA is committed to educating and improving the lives of those affected by hair loss. They are the authoritative source of information for people with hair loss and the healthcare professionals that care for them.

### About Dr. Alan J. Bauman

#### Alan J. Bauman, MD, ABHRS, IAHRs Hair Loss Expert

Dr. Alan Bauman is a full-time board-certified hair restoration physician who has treated over 33,000 patients, has performed more than 10,000 hair transplant procedures and over 10,000 PRP's since starting his medical hair loss practice, Bauman Medical in 1997.

Dr. Bauman is one of approximately only 200 physicians worldwide to achieve the certification from the esteemed American Board of Hair Restoration Surgery (ABHRS). Dr. Bauman is known for pioneering numerous technologies in the field of hair restoration including minimally-invasive FUE Follicular Unit Extraction, VIP|FUE™, Low-Level Laser Therapy, PRP Platelet Rich Plasma, PDOgro™, eyelash Transplants and others.

Dr. Bauman was voted "#1 Top Hair Restoration Surgeon" in North America by Aesthetic Everything for the 6th consecutive year, "Top Hair Restoration Surgeon of the Decade", and received the 2022 "Lifetime Achievement Award in Hair Restoration". He was also recognized by Forbes as one of "10 CEOs Transforming Healthcare in America."

# Pain Management for Sciatica

## SCIATICA TREATMENT

By Aaron Rosenblatt, MD

**S**ciatica refers to pain that radiates along the path of the sciatic nerve, which branches from your lower back through your hips and buttocks and down each leg. Typically, sciatica affects only one or both sides of your body.

Sciatica most commonly occurs when a herniated disk, bone spur (arthritis) on the spine or narrowing of the spine (spinal stenosis) compresses part of the nerve. This causes inflammation, pain and often some numbness in the affected leg(s).

Although the pain associated with sciatica can be severe, most cases resolve with non-operative treatments in a few weeks with

treatment that Dr. Rosenblatt can easily perform.

Pain that radiates from your lower (lumbar) spine to your buttock and down the back of your leg is the hallmark of sciatica. You might feel the discomfort almost anywhere along the nerve pathway, but it's especially likely to follow a path from your low back to your buttock and the back of your thigh and calf.

The pain can vary widely, from a mild ache to a sharp, burning sensation or excruciating pain. Sometimes it can feel like a jolt or electric shock. It can be worse when you cough or sneeze, and prolonged sitting or walking can aggravate symptoms. Some people also have numbness, tingling or muscle weakness in the affected leg or foot. You might have pain in one part of your leg and numbness in another part. You do not have to have low back pain to have sciatic pain.

Please call Dr. Rosenblatt when self-care measures fail to ease your symptoms or if your pain lasts longer than a week, is severe or becomes progressively worse. **Get immediate medical care if:**

- *You have sudden, severe pain in your low back or leg and numbness or muscle weakness in your leg*
- *The pain follows a violent injury, such as a traffic accident*
- *You have trouble controlling your bowels or bladder*

Sciatica occurs when the sciatic nerve becomes pinched, usually by a herniated disk in your spine or by an overgrowth of bone (bone spur) on your vertebrae. More rarely, the nerve can be compressed other tissue or damaged by a disease such as diabetes. Shingles is another common cause that would require treatment.

During the physical exam, Dr. Rosenblatt will check your muscle strength and reflexes. For example, you may be asked to walk on your toes or heels, rise from a squatting position and, while lying on your back, lift your legs one at a time. Pain that results from sciatica will usually worsen during these activities.

any people have herniated disks or bone spurs that will show up on X-rays and other imaging tests but have no

symptoms. So doctors don't typically order these tests unless your pain is severe, or it doesn't improve within a few weeks.

- **X-RAY.** An X-ray of your spine may reveal an overgrowth of bone (bone spur) that may be pressing on a nerve.
- **MRI.** This procedure uses a powerful magnet and radio waves to produce cross-sectional images of your back. An MRI produces detailed images of bone and soft tissues such as herniated disks. During the test, you lie on a table that moves into the MRI machine.
- **CT SCAN.** Can also be used for a faster imaging result or when an MRI is not allowed.

After evaluation, Dr. Rosenblatt might recommend injection of a medication into the area around the involved nerve root(s). This can help reduce and or eliminate pain by suppressing inflammation around the irritated nerve. This can greatly improve the pain and discomfort from the multiple causes of sciatica and help improve an individuals overall function. There are several different types of nerve root treatments to consider based on the location and severity of the impingement of the nerve. Usually treatment takes no longer than 5-6 minutes and can provide immediate relief!

Dr. Rosenblatt explains, "This procedure is simple and helps people of all ages to help feel less pain and function at a higher level. It is great for neck and lumbar spine pain. It will also help to avoid unnecessary spine surgery."

In Dr. Rosenblatt's beautiful freestanding interventional pain management building in Delray Beach, FL, thousands of individuals have been able to benefit from this technique. Dr. Rosenblatt has been performing this procedure for more than 17 years with great success. Please look forward to more articles about Dr. Aaron Rosenblatt and the vast number of procedures he performs to help people with all types of pain. His main focus is to help individuals avoid surgery, eliminate pain medications and to ultimately feel much better on a daily basis and enjoy life!

**Early Pain Treatment CAN PREVENT Prolonged Suffering!**

# Colorectal/Colon Cancer

**W**hen it comes to colorectal cancer, the facts can be scary. Fortunately, the availability of effective early screening and the ease of making simple lifestyle changes brighten the outlook.

Overall, in the U.S., 1 in 23 men (4.3%) and 1 in 25 women (4%) are at risk of developing colorectal cancer in their lifetime. It is the third most common form of the disease and the second leading cause of cancer death in the nation.

Colorectal, or colon, cancer encompasses cancer of the colon and the rectum, which are parts of our digestive system that process and help pass foods, water and waste material out of the body. The colon, or large bowel, is the first part of the large intestine and is about five feet long. The rectum and anal canal make up the last part of the large intestine, at six to eight inches long. The anal canal ends at the anus, the opening of the large intestine to the outside of the body.

This form of cancer occurs when cells grow out of control. These abnormal growths, called polyps, can over time become cancerous.

## Few Early Warning Signs

There are often no signs or symptoms of colorectal polyps or cancer, which is why screening is so important. As a tumor grows, it may bleed or block the intestine. The most common warning signs include blood in the stool or in the toilet after a bowel movement, dark or black stools, or bleeding from the rectum. Any symptoms should be reported to your primary health care provider right away.

## Early Screening Tests Matter

Screening tests can detect polyps at an early stage, so they can be removed before turning into cancer. According to the Colon Cancer Coalition, when detected in its early stages, colon cancer is more likely to be cured, treatment is less extensive, and recovery is much faster. The five-year survival rate when colon cancer is diagnosed at early stages (Stage 1 and Stage 2) is 90 percent.

## Know Your Screening Options

The risk of developing colorectal cancer increases with age. The majority of cases occur in adults age 50 and older. For colon cancer, the average age at diagnosis is age 68 for men and age 72 for women. For rectal cancer, it is age 63 for both men and women.

The American Cancer Society recommends regular screenings beginning at age 45. The five most common tests are summarized here by the National Cancer Institute:

- 1. Fecal occult blood test** checks for blood in the stool that can only be seen with a microscope.
- 2. Sigmoidoscopy** uses a thin, tube-like instrument to look inside the rectum and lower colon for polyps, abnormal areas or cancer. Polyps or tissue samples can be removed and checked under a microscope for signs of cancer.
- 3. Colonoscopy** is a procedure that looks inside the colon and can remove polyps or tissue samples to be checked for cancer.
- 4. Virtual colonoscopy** takes a series of x-ray images to show polyps or other abnormalities on the inside surface of the colon.
- 5. DNA stool test** checks DNA for genetic changes that may signal cancer.

Decisions about screening tests and preparing for them may cause anxiety. It's best to consult your doctor to gain a full understanding of the benefits and any risks, and determine which test is recommended for you and how often you should be screened.

## Know Your Risks and How to Reduce Them

If you have Crohn's disease, ulcerative colitis or other inflammatory bowel disease or a family history of colorectal polyps or cancer, you may be at higher risk. Radiation to the abdomen or pelvic area to treat prior cancers can also increase risk.

A lack of regular physical activity, being overweight or obese, a diet high in fat and lacking fruits and vegetables, as well as tobacco use and alcohol consumption, can also contribute.

A cancer diagnosis at any age can be life changing. Colorectal cancer treatments can include surgery, chemotherapy and radiation therapy. Your physician will personalize treatment options for your unique needs. Increasingly, thanks to ongoing clinical advancements, a growing number of patients diagnosed with colon cancer will go on and live a normal life.

## World-Class Cancer Treatment Close to Home

About Florida Cancer Specialists & Research Institute, LLC: (FLCancer.com)

Recognized by the American Society of Clinical Oncology (ASCO) with a national Clinical Trials Participation Award, Florida Cancer Specialists & Research Institute (FCS) offers patients access to more clinical trials than any private oncology practice in Florida. In the past four years, the majority of new cancer drugs approved for use in the U.S. were studied in clinical trials with Florida Cancer Specialists' participation.\* Trained in prestigious medical schools and research institutes, our physicians are consistently ranked nationally as Top Doctors by *U.S. News & World Report*.

Founded in 1984, Florida Cancer Specialists has built a national reputation for excellence that is reflected in exceptional and compassionate patient care, driven by innovative clinical research, cutting-edge technologies and advanced treatments, including targeted therapies, genomic-based treatment and immunotherapy. Our highest values are embodied by our outstanding team of highly trained and dedicated physicians, clinicians and staff.

# Imagine **Fat Reduction** and **Muscle Toning** in One:

## Check Out **truBody** by **Cutera**

**F**or so long we have been told that a proper diet and consistent exercise was the only way to meet our lifestyle goals or create a perfect body. In some ways, like valuing a healthy lifestyle in terms of diet and exercise, this still holds true; however, there is a protocol developed recently to not only blast away fat but tone and build muscle definition at the same time. For the first time in the aesthetics arena, two technologies, truSculpt iD and truSculpt Flex by Cutera were combined to create truBody, a protocol that targets fat and muscle in the same treatment plan. truBody is a solution for those hoping to achieve a specific appearance when dieting and exercise is simply not enough. This protocol is ideal for those who are already in shape or are enthusiastic in their workout routines and dedicated to a healthy diet and lifestyle; hoping to address those pesky areas that they continue to struggle with.

For so long we have been told that a proper diet and consistent exercise was the only way to meet our lifestyle goals or create a perfect body. In some ways, like valuing a healthy lifestyle in terms of diet and exercise, this still holds true; however, there is a protocol developed recently to not only blast away fat but tone and build muscle definition at the same time. For the first time in the aesthetics arena, two technologies, truSculpt iD and truSculpt Flex by Cutera were combined to create truBody, a protocol that targets fat and muscle in the same treatment plan. truBody is a solution for those hoping to achieve a specific appearance when dieting and exercise is simply not enough. This protocol is ideal for those who are already in shape or are enthusiastic in their workout routines and dedicated to a healthy diet and lifestyle; hoping to address those pesky areas that they continue to struggle with.

Recently, many body sculpting technologies have been introduced to the medical aesthetic industry. However, no treatment has shown results such as those of truSculpt iD. truSculpt iD provides a hands-free and customizable fat-reducing treatment through non-invasive, Monopolar radio frequency platforms that use Real-Time Temperature Control. Real-Time Temperature Control works to treat an entire fat layer, which has been clinically proven to safely and permanently reduce an average of 24% of fat in an area, with no downtime. Because truSculpt iD has no downtime or required recovery, it makes the perfect first step in the truBody protocol. Additionally, truSculpt iD uses this industry disrupting radio frequency instrument to tailor each treatment to the patient's long-term body aesthetic goals. The radio frequency works to break apart and destroy fat through Apoptosis, which is a medical system that literally kills fat cells. Over the next 12 weeks,

patients' bodies will naturally remove these dead cells from the area and of the body. Another benefit of this treatment is that depending on which area the patient wants to address, it can be performed quickly; sometimes receiving the treatment in less than 15 minutes. truSculpt iD is tailorable but also incredibly versatile as the design of the technology allows for treatments on small areas and large areas of stubborn fat. Unlike competing body sculpting technologies like CoolSculpting, the applicators and devices used with truSculpt iD allow even more specific or rounded areas to be targeted, in combination with larger or flatter areas, all at once. truSculpt iD is almost completely pain free, with little discomfort ever disclosed by patients. While it is not a system for weight loss, truSculpt iD provides an option to patients hoping to truly meet their body sculpting needs, before proceeding with the next step in the protocol, truSculpt Flex.

truSculpt Flex is the second technology used to create a lean and defined appearance that is typically hard to achieve. A muscle defining and sculpting device, truSculpt Flex has the ability to perform personalized treatments on patients following their truSculpt iD experience, customizing the second treatment in the protocol based on the patient's fitness levels, goals, and current physique. Using Multi-Directional Stimulation (MDS),

truSculpt Flex produces a method of electrical stimulation of the muscles using three treatment modes, which replicate intensified crunch, squat, and twisting actions. Only truSculpt Flex has been able to achieve fast results and treat multiple areas of the body at the same time; unlike its competitor, Emsculpt. This technology can treat up to three areas of the body at once, making it more convenient for patients who want to sculpt more than one part of the body. Over a 45-minute treatment session and using two to sixteen applicators, the treatment is completed. As previously noted, there are three unique modes used during these 45 minute treatments: Prep, Tone, and Sculpt. Patients will have a customized experience based on their specific needs, but mainly, their current fitness levels. Prep Mode is the recommended and best choice for starting this treatment cycle, as it works to elongate and stretch muscles, preparing them for toning and sculpting in the following sessions. It is

important to note however, that Prep Mode may only be used in a cycle once for someone who is already lean and defined versus an individual who needs a muscle memory refresher. Regardless of the timeline of each patients' protocol, the results over the next few weeks will be successful, as the technology is multifaceted.

As a standalone treatment, truSculpt Flex is the only technology available that can perform a non-surgical buttlift by strengthening the gluteus muscles.

Initially, two treatments per week are performed. There is a recommended amount of six treatments in the protocol in order to establish the type of results patients hope to see. Therefore, it is recommended that patients receive 4 treatments in a time frame of 2 weeks, no closer together than two days and no further apart than seven. Following the consecutive weeks of treatment, a maintenance program will be designed by Dr. Dadurian for each patient and their individual goals and needs.

Together, these truSculpt iD and truFlex iD have the ability to burn fat and define muscle in even the most stubborn places, with quick results and no downtime. Spend less time in the gym and call MD Beauty Labs today to book a complimentary consultation.

# Senior Information Centers

## Helps Seniors **PRESERVE AND PROTECT ASSETS**

**D**eveloping a comprehensive plan for financial preservation is essential to help seniors avoid costly mistakes and prevent financial devastation.

Senior Information Centers, an umbrella network of licensed Florida professionals, provides comprehensive estate planning services that help seniors preserve and protect their assets. The company, with offices in Boca Raton, Sarasota and Ocala, serves seniors and their families throughout Florida.

“It’s never too late or too early for seniors to plan for protecting their assets,” said Stephen D. Wolfe, Elder Planning Specialist and Certified Senior Advisor, who founded Senior Information Centers in 2001 along with his business partner Bryan Plonsky. “They should educate themselves so they can understand their options. Many seniors may mistakenly believe that planning is very expensive, but Senior Information Centers provides an affordable way for them to preserve their valuable assets.”

The company brings together a team of experts including elder care attorneys, Medicaid and Veteran’s Administration (VA) specialists, paralegals, certified financial planners and accountants who provide a wealth of information and help seniors and their families develop comprehensive plans for asset preservation. They provide services in four major areas of concern to seniors: legal, illness, taxes and investments.

Legal services include the development of tools such as a Living Will, Durable Power of Attorney, Healthcare Surrogate Designation or HealthCare Power of Attorney (which are only \$33 each) and Deeds and Trusts.

Services related to illness help seniors reposition their estates properly to preserve assets and help them qualify for government benefits, whether for home care, assisted living facilities or nursing homes.

Tax advisors review portfolios to eliminate unnecessary taxes on investments and IRAs. While Senior Information Centers professionals are not stockbrokers with securities licenses, they deal with no-risk, tax-deferred secure investments that keep seniors’ assets fixed, guaranteed and insured.

The firm’s target clients are primarily seniors in their 70s, spouses, adult children and other family members. Senior Information Centers markets its services throughout the community to assisted living facilities,

nursing homes, caseworkers and hospital discharge managers.

“Sometimes after a medical crisis involving a hospital stay, seniors end up in rehabilitation centers with no plan of attack,” said Wolfe. “Senior Information Centers can show them all their options, rough out a plan and give them hope that assets can be preserved and benefits attained.”

Wolfe noted that the company’s professional’s turn over every rock from “today until death” to make sure an action taken today will not negatively impact their financial future.

“For example, achieving Medicaid qualifications can be a daunting task,” he said. “Giving away assets to children may trigger the five-year look back, which means the senior will not qualify for Medicaid benefits. Veterans also make mistakes with improper planning that makes them ineligible for Medicaid.”

Veterans, their spouses and their widows may be entitled to VA benefits to help offset their out of pocket medical expense. Senior Information Centers helps clients regardless of their level assets or income. The attorney offers reasonable fees for development of legal documents or planning services. There is

no cost or obligation for consultations. Telephone consultations are available for clients’ families who live out of state.

Currently, Senior Information Centers serves 8,000 clients in Florida. Frequently, business comes from word-of-mouth referrals.

“Your involvement with us through the various challenges we faced, which extended even beyond our father’s ultimate passing, was most exemplary and supportive,” wrote a client’s adult children. “We are truly thankful that someone who has a caring attitude, knowledge and resources to help manage elder-care issues is available for families struggling with these emotionally charged issues.”

Stephen and Bryan stress the importance for seniors to have a full, comprehensive plan to preserve and protect their assets – not just piecemeal documents here or there. “In every area, there’s a way seniors can be robbed of their dollars.” “We show them how to protect their assets in every aspect of their life.”

# About Accepting Death

By Ernest Morgan, from *Dealing Creatively with Death*

If we were to walk across the fields in summertime to some undisturbed spot and mark off a piece of ground say four feet square then examine this little area minutely, we would find an astonishing variety of life. There would be many species of plants; possibly a mouse's nest, and other small creatures. Then resorting to a microscope, we would observe an incredible host of microorganisms functioning in association with the larger life forms.

In that little square of ground we would have seen an interdependent community of life in which

birth and death were continuously taking place and in which diverse life forms were sheltering and nourishing one another. Written in the rocks beneath was a story of a similar process going back through eons of time.

Humankind is part of the ongoing community of nature, on a world scale, subject to the same cycle of birth and death which governs all other creatures and, like them, totally dependent on other life. Sometimes we tend to forget this. Birth and death are as natural for us as for the myriad of creatures in that little square of ground.

# WHAT DOES NEUROFEEDBACK DO? AND CAN IT HELP ME?

## IS IT BIOFEEDBACK?

Biofeedback is a very broad term that is used to describe a technique that allows you to learn information about your body. With Neurofeedback, we zero in on the neuron firing in the brain. So, Neurofeedback is a technique that allows you to learn information about your brain. Or more specifically, the neuron patterns in your brain. At times, Neurofeedback can be referred to as EEG Biofeedback or Brain Training.

Brain Training can teach your brain to be more balanced and more regulated. When this improved balance and regulation happens, you feel better and function better. Training your brain can help clients of all ages, as everyone can benefit from balancing and regulating their brain better.

## Do you suffer from any of these?

- Anxiety
- Sleep Disorders
- Depression
- ADD/ADHD
- Sensory Processing Disorder
- Bipolar Disorder
- Seizure Disorders
- Auditory/Visual Processing
- Chronic pain/Fibromyalgia
- Migraines/Headaches
- Traumatic Brain Injuries
- Stroke
- Cognitive Decline
- Peak Performance
- Oppositional Defiant Disorder
- Rages/Mood Swings
- Attention/Focus/Concentration
- Reactive Attachment Disorder
- Autism/Asperger's
- Learning Disabilities
- Obsessive Compulsive Disorder

If you do suffer from any of the above, or anything not listed that is brain related, Neurofeedback can help. But what is it?

## WHAT IS NEUROFEEDBACK?

Neurofeedback has been studied and practiced since the late 60's. It is exercise for your brain; allowing you to see the frequencies produced by different parts of your brain in real-time and then through visual and auditory feedback, teaches the brain to better regulate itself. Neurofeedback can be used to help detect, stimulate, and/or inhibit activity in the brain safely and without medication. It can help restore a wider "range of motion" in brain states, much like physical therapy does for the body.

While the client sits comfortably watching a movie or pictures appear on the screen (a calm and focused state), the EEG equipment measures the frequency or speed at which electrical activity moves in the areas where electrodes have been placed. This information is sent to the therapist's computer. The therapist is then able to determine what frequencies are out of balance. For example, when the EEG shows that you are making too many "slow" or "sleepy" waves (delta/theta) or too many "fast" waves (high beta), the therapist adjusts a reward band to encourage more balanced activity. This encouragement or "reward" happens

through an auditory reinforcement of "beeps" and sometimes through visual reinforcement of changes on the screen.

It is important to understand that the neuro-feedback approach does not "cure" or "fix" your brain. We teach and guide your brain to produce frequencies which help it relax and/or focus. We provide the brain with gentle "challenges" and encouragement in a user-friendly, stress-free format so it learns to regulate or shift to healthier states more smoothly on its own at the appropriate time.

## HOW DOES A "BEEP" OR SOUND TRAIN MY BRAIN TO WORK BETTER?

The auditory or sound reward that corresponds to an increase or decrease in desired brainwave activity is able to affect the brain on a neurological level. Auditory reward stimulates auditory pathways, impacts the vestibular system, and has many connections to the reticular activating system, which modulates wakefulness and attention. These systems operate in our brains without conscious effort. Therefore, neurofeedback teaches your brain through automated learning with little or no behavioral effort. Another way to say this is that neurofeedback involves operant conditioning or learning. This type of learning teaches us through

a reinforced reward system. The auditory reward (beep) is delivered on a schedule of reinforcement that promotes optimal learning; not too hard and not too easy. This schedule of reinforcement or reward provides just the right amount of resistance to evoke a positive learning pattern.

### WHY TRAIN YOUR BRAIN?

Mental clarity improves when you operate a calmer, more efficient brain. As you learn to slow down “inner chatter” or activate a “sleepy” brain, you become more effective at responding to stress and adapt more readily to different situations, both psychologically and physically. Parenting becomes less exhausting, appointments are more easily kept, decision-making improves, and mood swings and depression often lift.

Neurofeedback has also been shown to be of remarkable value with school-age children who experience focus and learning problems. Through brain training, children can learn to better concentrate on schoolwork, increase their frustration tolerance level, and are less prone to be overwhelmed with sensory overload while seated in a noisy classroom. With their thoughts more organized, they can focus more clearly on what others say to them and can begin to develop friendships and learn effectively.

### HOW MANY SESSIONS ARE NEEDED TO BEGIN SEEING RESULTS?

As the brain learns, you will see the changes. However, everyone learns at different speeds, so it cannot be determined how quickly someone will learn. On average, children take about 10-20 sessions to see changes and we can discuss what to expect during the intake appointment. For adults changes are usually noticed within 10 sessions. Total treatment is an average of 40 sessions; however we individualize treatment – some people need more and some less.

### NEUROFEEDBACK AND MEDICATION

As your brain begins to work more efficiently, medications also work better. For those who cannot take or are only marginally responsive to medication, neurofeedback can offer an alternative or supportive role to drug therapy by stimulating or inhibiting brain activity at the same basic neurological level as medication. Eventually with training, many people find they can reduce the dosages or cease taking some prescription drugs, but only after careful consultation and planning with the prescribing physician. For this reason, neurofeedback practitioners advocate consistent communication between clients and their physicians during training and encourage

discussion of their neurofeedback experience with therapists and doctors so accommodations can be made as training progresses.

### WHAT IS A QEEG (QUANTITATIVE EEG) OR BRAIN MAP AND DO I NEED ONE?

The QEEG is a quantitative EEG. It's also called a brain map and does just that...it gives us a map of what is going on with the entire brain at one time. We attach electrodes to the whole head, 19 spots, and then record the brain waves with his eyes open for 5 minutes and with his eyes closed for 10 minutes. This recording is then sent to Advanced Psychological Services in North Carolina to be read and analyzed. They are able to not only give us a summary of significant findings, but the report also shows the results of analyzing the data several different ways. The brain activity is not only compared spot by spot over the entire head, but we can also look at connections, symmetry, how different parts are communicating, and all of this data is compared to a database of peers (same sex, handedness and age). It can help us see what areas need to be addressed more efficiently than just training spot by spot.

We don't always need this data to make an improvement in symptoms, but we do recommend it in certain situations. A QEEG can also be helpful information when diagnosing and/or trying to decide the best medication/supplement recommendations.

### DOES NEUROFEEDBACK HURT?

Neurofeedback is a non-invasive, non-medication, and most importantly a non-painful approach. Your experience will be very relaxing and positive. We gently teach your brain how to regulate more efficiently and do not force your brain into a brain state that is not comfortable.

### IS THERE ENOUGH RESEARCH?

Neurofeedback has been researched since the 60's. Here are some resources for research. We have several journal articles, studies, and books in our office for you to enjoy, however because of the amount of information out there, we cannot possibly have everything. Here are a few resources.

#### Look up the work of:

Dr. Joe Kamiya and Dr. Barry Sterman (Credited for earliest development of Neurofeedback).

#### Look for specific researched conditions:

<https://www.eeginfo.com>

<https://www.isnr.org>

<http://www.eegspectrum.com>

#### Print Resources:

*Journal of Neurotherapy*

*NeuroRegulation Journal*

*Applied Psychophysiology and Biofeedback*

#### Books:

*A Symphony in the Brain* by Jim Robbins

*Healing Young Brains* by Robert Hill & Eduardo Castro

*The Healing Power of Neurofeedback* by Stephen Larsen

*Neurofeedback in the Treatment of Developmental Trauma* by Sebern Fisher

*Neurofeedback 101: Rewiring the Brain for ADHD, Anxiety, Depression and Beyond (without medication)* by Michael P. Cohen

### HOW DO I GET STARTED?

Getting started is easy, just give us a call. The Brain and Wellness Center staff will answer all of your questions, and help you get scheduled. If you are wondering what services are best for you? We can help determine that at the time of the intake or in a FREE scheduled telephone consultation. Call, email or message us today! Brain and Wellness Center, 7301 W. Palmetto Park Rd., Suite 102A, Boca Raton, FL 33433. **(561) 206-2706**, e-mail us at [info@bocabraincenter.com](mailto:info@bocabraincenter.com), or text us at **(561) 206-2706** or visit our website at [www.BocaBrainCenter.com](http://www.BocaBrainCenter.com).

#### Renee Chillcott, LMHC

Renee Chillcott is a Licensed Mental Health Counselor that has been practicing Neurofeedback training since 2005. Renee holds a BA degree from The University of Central Florida and a Master's Degree in Psychology/Mental Health Counseling from Nova Southeastern University. She is a Licensed Mental Health Counselor and is the owner/operator of The Brain and Wellness Center, located in Boca Raton. At the Brain and Wellness Center, adults, teens, children and families enjoy a variety of services from multiple providers. Neurofeedback, Brain Mapping, SSP, EMDR, Learning Programs, and counseling are among a few of the services offered.

# TubcuT® Can Help Alleviate Slip and Falls and trouble getting in and out of the Bath

**W**isdom may come with age but getting older has its set of challenges. People are living longer but not necessarily healthier. From diminished eyesight, arthritis, immobility, to cognitive decline, some conditions make it high-risk and unsafe for seniors living on their own or with limited supervision.

Some of the biggest hurdles for seniors are tripping, slips and falls, slippery bathtubs, and getting in and out of the bath or shower. These can be extremely hazardous for those with arthritis, dementia, fibromyalgia, cardiac conditions, Parkinson's and many other conditions that cause stiffness, pain, lack of coordination, immobility and failure to be able to follow direction.

**BEFORE**

**AFTER**

Whether from injury or aging, getting in and out of a bathtub can be challenging. Instead of spending thousands of dollars on a bathroom renovation, you can easily convert your tub into a walk-in shower with the TubcuT® Company.

The TubcuT® is the original tub to shower conversion, and it helps to improve accessibility, reduce accidents, serious injuries and help people remain in their homes longer. And the good news is, you will save on average, 90% of replacement costs with TubcuT® as they convert your tub into a walk-in shower in just one day. There is no plumbing or demolition required, and there is little to no disruption. A regular shower curtain is all that's needed to stop any water overspray concerns; they can also install shower doors if you'd prefer.

## IT'S LIKE HAVING A WALK IN SHOWER WITHOUT THE COST!

TubcuT® creates an opening that fits your needs. Unlike cap systems, The TubcuT® adapts to you and what your lifestyle requires. With TubcuT's® exclusive process, you dictate where they create the opening, how wide it will be, and how low.

The TubcuT® threshold is typically 4" above the floor giving you more accessible, safer access, the same as a typical shower pan. TubcuT® Follows the same exact contour of your tub there, and there is no ledge on the

threshold or bulky plastic inserts. Those inferior plastic inserts are just caulked in and are subject to leaking and will need service down the road. The TubcuT® is custom fitted to your tub creating a seamless, waterproof shower with a professional factory appearance that's unlike anything else available. The TubcuT® is the only tub to shower conversion that can be reversed! If you save the cutout section of the tub, they can easily restore your bathtub to its original condition if needed.

The TubcuT® changes lives, but many dismiss it as something only for the elderly. However, there is another class of customer that it suits just as well, those with health and mobility issues. People with multiple sclerosis, Parkinson's disease, arthritis, fibromyalgia, muscular dystrophy, cerebral palsy to name a few, will benefit significantly from The TubcuT®.

For accident victims, anyone in chronic pain, people with knee or hip replacements or any neuro-muscular disease, the TubcuT® can be a life-changing product. To find out more, contact them today!

# All the Rage with Celebrities, The Vampire Facelift and Facial Can Give You Your Youthful Appearance Back

**A**s we age skin can become dull, lose elasticity and droop. There are of course surgical options and hyaluronic acid fillers, but the procedures that are topping everyone's wish list are the Vampire facelift and the vampire facial.

Naturally found in your blood, platelets are a rich source of proteins called growth factors, which promote healing and regeneration. Platelet-rich plasma (PRP) contains a higher concentration of platelets than the amount normally found in your blood. To create PRP a sample of your blood is drawn and placed in a centrifuge, which separates out the platelets. These concentrated platelets are recombined with your blood plasma to make PRP. Platelet Rich Plasma (PRP) is then reinjected into the problem areas.

PRP injections are an alternative to Botox and fillers. Platelet Rich Plasma is taken from the patient's own blood, spun down and reintroduced into the face just like a filler to create and stimulate your body's own growth factors. PRP produces collagen, hyaluronic acid, elastin, and plumps the skin. PRP injections with the vampire facelift maintain the facial contours of the natural look of the patient.

With just four to six PRP treatments over a two to four-week period, patients are seeing results that last for up to 2 years, so over the long-term, it's very cost effective and 100% safe. You don't have to be concerned about toxins or chemicals with your own PRP.

## Vampire Facelift

For the "facelift", the PRP is injected into various areas of the face to create a plumping effect. The procedure is safe because it's utilizing the patient's own blood and it's free of toxins. The body begins to "repair" itself and regenerates collagen, elastin and healing properties, which create a youthful appearance.

## Vampire Facial

The facial works in much the same way as the "facelift", but with tiny perforations in the skin as opposed to injections. The tiny perforations allow the PRP to penetrate into the dermal layers, and the results continuously improve the glow of the skin within two to three months. Many patients report plumped skin, a brighter complexion and seeing less noticeable dark circles.

Bring out your inner beauty naturally. Your beauty will be revived with a natural face shape, increased collagen, smoother skin, increased blood flow, youthful glow, and a younger appearance.

## The O-Shot

Non-surgical procedure to treat sexual dysfunction and improve orgasms in women.

## P-Shot®

Penile rejuvenation for peyronie's disease & erectile dysfunction.

## Vampire Breast Lift

The Vampire Breast Lift is a non-surgical way of enhancing the breasts, and giving them a lift, without causing the downtime and pain that implants or even a standard breast lift would involve. It can give fullness, lift and enhance cleavage.

## Aesthetic Treatment Centers

As a leader in the industry, ATC always offers the latest technology in skin and body care. By combining their expertise through industry leaders, innovative procedures, and cutting-edge products, you will always receive remarkable results within the serene, inviting atmosphere of the Aesthetic Treatment Centers.

Headquartered in Naples, FL, Aesthetic Treatment Centers is located in the Advanced Medical Building at 720 Goodlette-Frank Road, Suite 300 Naples, Florida.

## problems & answers

**T**here may be nothing on the planet men want to talk about less than an erection problem, but if your partner is one of the estimated 30 million men affected by erectile dysfunction, encouraging him to open up about it may make him – and you – happier. Men who confided in their spouses and close friends about their sexual issues were less stressed than those didn't, according to research from Oregon State University.

The finding just goes to show that impotence, of maintaining a healthy relationship while finding the treatment that will work for you and your partner. The options to treat ED are vast, as specialists in treating ED we offer many options, this is not a one stop fits all practice. Not every case of ED has the same root cause, each person is individual & treatment is just as tailored to be effective.

### Why Communication Is Crucial When You Have ED

Men who experience erectile dysfunction may feel inadequate, and it's often a blow to their self-confidence. ED is also tough on partners, and can make them feel unattractive, undesirable, or like they're doing something wrong. It's very important for couples to discuss their feelings, and work together to find a solution.

"There are many very effective options to treat ED, if the treatments you or your partner have tried have been ineffective don't give up. Maintain lines of communication with your partner and let us help you get back in the bedroom with confidence." Encourages Dr. Fletcher at Simply Men's Health in Boca Raton.

### Ways Couples Can Stay Intimate

Both partners should be open-minded about finding ways to be intimate while trying to resolve issues surrounding ED. This maintains intimacy and creates a team approach to treating ED. Couples may find new ways they relate sexually & build trust and emotional intimacy.

**Be playful with each other.** Try to have a light and playful attitude while still being supportive of each other. "Be in the moment and focus on pleasing the other person. Don't worry about what will happen," Dr. Fletcher advises. "Enjoy one another's company & let us work to find the

solution that best works for you & your partner." "There really are so many options for treatment, not every treatment works for every person, but we have an arsenal of effective treatments and will help find the solution for your specific ED challenge"

# SEEKING A SECOND OPINION ABOUT YOUR EYE CARE

By David A. Goldman MD

**T**hroughout my career I have seen patients come to me for second opinions, and I have also had patients ask me if I would ‘mind’ if they saw another specialist for a second opinion.

For the patient, seeking a second opinion is a difficult thing to do. To begin, he or she may not know who is a reputable person to seek for second opinion. Furthermore, they may have a good relationship with their ophthalmologist and may feel they are betraying their doctor’s confidence by seeking another MD. Finally, they may be concerned whether their insurance will cover a visit for second opinion.

For the doctor, discovering a patient has seen another physician may make them feel that they are not trusted or even felt to be incompetent. In some cases, when a patient seeks second opinion it may completely end their care with the first physician.

It has always been my belief that second opinions are an excellent idea. If the care rendered to date is appropriate, the second physician can confirm that and set the patient’s mind at ease. In some cases, the physician may actually find something that the first doctor missed, and in these cases both the physician and patient still benefit. This is because at the end of the day, doctors want their patients to do well. If I am unable to treat a patient completely, I am thankful that another doctor could. On the other side, I am happy to help out my colleagues when they have gotten stuck, or just to tell their patients that everything is going well. Medicine is not performed in a vortex - referrals to subspecialists are very common place. While intra-subspecialty referrals are less common, I am always comfortable recommending the patient seek second opinion if they have any questions or concerns. In this way, doctor-patient relationships are strengthened rather than weakened and care can be given the best way possible.

DAVID A. GOLDMAN

Prior to founding his own private practice, Dr. David A. Goldman served as Assistant Professor of Clinical Ophthalmology at the Bascom Palmer Eye Institute in Palm Beach Gardens. Within the first of his five years of employment there, Dr. Goldman quickly became the highest volume surgeon. He has been recognized as one of the top 250 US surgeons by Premier Surgeon, as well as being awarded a Best Doctor and Top Ophthalmologist.

Dr. Goldman received his Bachelor of Arts cum laude and with distinction in all subjects from Cornell University and Doctor of Medicine with distinction in research from the Tufts School of Medicine. This was followed by a medical internship at Mt. Sinai – Cabrini Medical Center in New York City. He then completed his residency and cornea fellowship at the Bascom Palmer Eye Institute in Miami, Florida. Throughout his training, he received multiple awards including 2nd place in the American College of Eye Surgeons Bloomberg memorial national cataract competition, nomination for the Ophthalmology Times writer’s award program, 2006 Paul Kayser International Scholar, and the American Society of Cataract and Refractive Surgery (ASCRS) research award in 2005, 2006, and 2007. Dr. Goldman currently serves as councilor from ASCRS to the American Academy of Ophthalmology. In addition to serving as an examiner for board certification, Dr. Goldman also serves on committees to revise maintenance of certification exams for current ophthalmologists.

Dr. Goldman’s clinical practice encompasses medical, refractive, and non-refractive surgical diseases of the cornea, anterior segment, and lens. This includes, but is not limited to, corneal transplantation, micro-incisional cataract surgery, and LASIK. His research interests include advances in cataract and refractive technology, dry eye management, and internet applications of ophthalmology.

Dr. Goldman speaks English and Spanish.

# *I Have* **A Wait Problem**

Brent Myers

**Y**ou're reading a health and wellness magazine and you're thinking: that guy can't spell. But the truth is that you read it correctly: I have a wait problem: I don't like to wait. But who does?

Think about it... do you like to wait? Do you love sitting in the waiting room at the doctor's office? Do you look for the longest line at the grocery store so you can spend more time waiting? When the light turns green, does it make you happy when the car in front of you just sits there? Do you keep your fingers crossed that wait times are an hour at the amusement park? If you answered "no" to the questions above, then you have a wait problem too.

It's been estimated that we spend ten percent of our lives waiting. That comes out to be over two hours of everyday. I have a wait problem: I'm not very good at it. But I don't have a choice. Waiting is a part of our lives.

And waiting isn't just a part of everyday menial tasks, but big things in life too. Things like waiting for Mr. Right or Miss Perfect; waiting for your first grandchild; waiting for retirement; waiting on test results; waiting to hear back about the interview; waiting...

From a spiritual perspective, waiting is very important. So important, in fact, that God talks about it including these words: *"Even youths shall faint and be weary, and young men shall fall exhausted; but they who wait for the LORD shall renew their strength; they shall mount up with wings like eagles; they shall run and not be weary; they shall walk and not faint."* (Isaiah 40:30-31, ESV)

## **Waiting is expected by God.**

Notice what he says... "...they who wait for the LORD..." Isaiah doesn't single out an individual

or use the word "if". God – the creator and controller of time and all circumstances – knows we will have seasons of waiting. And He expects us to wait on Him.

## **God uses waiting to build our character.**

Look at the different stages of development: flying high (wings), running, and walking. Waiting gets us to a place where we learn to take in the highest highs, but at the same time realize that slow and steady gets us where we need to go. Waiting helps us grow into constant and consistent forward movement in our lives... even when we are waiting.

## **Waiting is rewarded by God.**

Isaiah shows us that waiting has its rewards. Tired of being tired? Close to giving up? Don't want to wait anymore? Read the passage again: "...and not be weary..." "...and not faint..." God honors us when we wait. God rewards our faithfulness in the midst of our waiting.

## **Waiting is the fruit of our faith.**

Finally look at this: "...but they who wait for the LORD..." When we learn to trust our circumstances to God, we show that we really believe that He is in control. We demonstrate that we actually believe that He knows best and that He works all things together for good. When we wait on the LORD, we show the depth of our faith. So... how do I get better at waiting? The ability to wait on the Lord stems from being confident and focused on who God is and in what God is doing. It sounds simple – and it is – but simple is not the same as easy (because it's not).

But look at it like this... I heard the other day, "there are no problems, only opportunities". So at least now I know I don't have a wait problem after all – just a wait opportunity (and lots of them)!
