The Top 10 Benefits of DENTAL IMPLANTS

missing or damaged, you have several options. However, one option stands out above the rest is dental implants. Dental implants offer benefits that other tooth replacement options, like dentures or bridges, just can't offer. Here are the top benefits of this innovative option:

> When you lose teeth, you also tend to lose bone mass in your jaw. Your jawbone needs the stimulation it gets when your teeth connect to maintain its mass. Dental implants are the only tooth replacement option that also replaces that jaw bone stimulation, helping to prevent bone loss.

> Dental implants come in a wide variety of shapes and sizes. Your dentist will work with you to design implants that match the color of your surrounding teeth and fit perfectly in the gap. No one but you and your dentist will know which teeth are

Because dental implants are anchored into your jaw with a titanium post that replaces the tooth root, they allow you to bite with more or less the same amount of force you could use with your natural teeth. Other tooth replacement options do not restore nearly as much of your bite force because they sit on top of the gums and aren't anchored in place.

Your teeth help support your facial structure. When you lose teeth, you lose that support, which eventually causes your face to change shape, making you appear older. Dental implants provide similar support for your face as your natural teeth, preventing it from changing shape.

5

ENABLES NATURAL SPEECH

Some tooth replacement options, like dentures, can impact your ability to pronounce words correctly. Missing teeth can also alter your speech. Because dental implants feel and function just like natural teeth, they enable you to speak easily and naturally.

WON'T GET CAVITIES

Artificial teeth still need to be cared for to prevent bacteria from building up in your mouth and causing infections, but the material that dental implants are made of can't decay. You'll never have to worry about getting cavities in your dental implants!

EASY TO CARE FOR

Taking care of dental implants is easy! Just brush and floss like you normally would. Dental implants don't require you to buy any special products to clean or care for them. There's no need for cups, cleansing tablets, adhesive, or special flossers. You just brush and floss, just the way you would with your natural teeth.

SUPPORTS ADJACENT TEETH

place and will never embarrass you.

A gap in your mouth caused by a missing tooth can cause the teeth on either side of the gap to shift positions, leading to misalignment. Dental implants fill the gap, allowing you to maintain a straight, even smile.

Patients with dentures sometimes feel self-

conscious about speaking, laughing, or eating in

public, as dentures can visibly shift or slip inside your mouth. Dental implants are firmly anchored in

PREVENTS BONE LOSS

Other tooth replacement options will need to be repaired or replaced periodically, but dental implants are designed to last for the rest of your life.

If you're in need of a tooth replacement option, you should definitely consider dental implants. To find out if you're a good candidate for dental implants, you can schedule a complimentary consultation and 3D CT scan with our specialist team. Please call (561) 205-5000 to reserve your visit! We look forward to meeting you.

Dr. Forrest is the Clinical Director of **5th Avenue DENTAL**. For 20 years, Dr. Forrest has been one of Florida's leading dentists treating some of the most challenging cases. Using a multi-specialist approach, his team is composed of four advanced trained dentists who focus on general, cosmetic, orthodontic, and implant dentistry. HAIR FOR THE HOLIDAYS

GREAT GIFT IDEAS for Anyone in Your Life

Who Has Hair (or Would Like To)

by Alan J. Bauman, MD, ABHRS

Oh, boy. Now what?

Well, I have the perfect solution for that. One you might not have thought of until now.

Anyone who has great hair wants to keep it that way. Anyone who doesn't have great hair probably wishes they did.

See where I'm going here?

Luckily, Bauman Medical has a wide range of exceptional products and services that address just about any hair goal a person could have, with something for every budget. Below are some ideas for the best holiday gifts ever for that special someone.

LOW-LEVEL LASERCAPS

A favorite of gift givers year-after-year are our low-level laser light caps. Laser caps—we offer five of them—are drug-free, chemical-free, non-invasive, FDA-cleared, and scientifically proven to improve the appearance of hair quality, strength, and thickness of thinning hair and to promote hair growth.

Our newest and most hi-tech LaserCap, the TURBO LaserCap™ is especially popular.

Here are some of the features our patients love about the Bauman TURBO LaserCap:

- Usage requires just five minutes per day.
- Its 300 high-quality laser diodes deliver more energy and power to 25% more area of the scalp than any other portable hands-free laser hair regrowth device on the market.
- It's easy to travel with. Its flexible spine lets you fold it flat.
- It has a long battery life, requiring fewer recharges.
- It's adjustable for a perfect fit for you and someone else you'd like to share it with.
- It has a lifetime warranty.

SCIENTIFIC SCALP MAKEOVER

Doing something "healthy" never felt so good. The gift of a Scientific Scalp Makeover™ in the "head spa" at my SalonB will help anyone relax after the frantic holiday season while improving their hair health at the same time

It's a favorite of both men and women, by the way, and is for anyone concerned about their hair quality or growth or who simply wants to enjoy an indulgence. Don't let the indulgent quality of the experience fool you, however. A scalp makeover is more than an indulgence. Improving the health of your scalp has been shown to lead to better hair health.

Here's what to expect from this makeover in our spa, complete with dimmed light and soothing music:

- Aromatherapy treatment
- A scalp mask treatment for optimum scalp health and hair beauty
- A deep scalp massage to stimulate and purify the scalp, and increase circulation
- A deep cleansing shampooing
- Application of a customized conditioner or hair mask
- Optional addition of the Keravive scalp treatment with peptides and growth factors

BOOST SHAMPOO AND BOOST CONDITIONER

Bauman | MD BOOST Shampoo and BOOST Conditioner are designed for daily use for all types of hair, and especially good for anyone with thinning, transplanted, or laser-treated hair.

BOOST products are sulfate-free, color-safe, and include no parabens or artificial fragrances. Used in combination, they:

- Inhibit DHT production (DHT is a by-product of testosterone metabolism that can cause hair loss in people sensitive to it)
- Stimulate hair growth

A "Scalp Makeover" is the ultimate pampering for your scalp, providing stress-reducing and circulation-stimulating scalp massage, scalp steaming and application of highly advanced topical therapeutic products to boost the health of the scalp and follicles. It makes the perfect holiday gift. Gift E-cards are available on our eStore.

- Prolong the anagen (active) phase of the hair growth cycle
- Enhance blood flow to the scalp to keep follicles nourished and healthy
- Reduce dryness, dandruff, and itching
- Help moisturize the scalp and soothe inflammation and irritation via its infusion of CBD

NUTRA-TEAM BAUMAN – Nutraceuticals for Healthy Hair

These products will help your gift recipient feel good from the inside out.

My superb line of seven *proprietary* nutritional supplements is for anyone experiencing hair loss or thinning, or who just wants thicker-looking hair.

• The Recruiter™: This special blend of probiotics, plant extract, and Vitamin D3 promotes the release of stored stem cells (stem cells promote healing of damaged tissues due to aging, injury, and stress). It increases the number of circulating stem cells in your body to promote hair growth and overall health.

Dr. Bauman has created Nutra-Team Bauman, a team of hair-healthy supplements that work together in a dynamic way because he believes that hair grows best when your system is balanced. These make great holiday gifts and are available on our eStore.

- The Good Guys™: This hair probiotic complex infuses the gut with elements needed to optimize the digestive process and maximize overall health and wellness. It supports a robust scalp and strengthens follicles for optimal hair growth.
- The Bodyguard™: A unique blend of herbs and mushrooms, The Bodyguard™ supports a healthy immune system and defends against environmental toxins.

Scientific research confirms the benefits of the formula's immune-enhancing herbs, together with the fungi, which include Asian mushrooms.

- A-List™ Hair Vitamin Complex: It's called our "strategic supplement" because it's compounded with top-tier ingredients shown to strengthen hair and support skin elasticity. It contains antioxidants and trace minerals that protect hair and skin, and promote collagen renewal for hair, skin hydration, and wound healing.
- The Hero™ Super-Biotin Mega Hair Support Caps. Biotin creates enzymes that strengthen hair and nails and assist digestion and cellular metabolism.
- The Zenmaster™: Contains the herb ashwagandha which helps reduce stress and its byproduct, cortisol. Cortisol negatively affects the hair follicle as well as other organs in the body.
- The Builder™ Hair Multi-Collagen Complex Peptide Protein Powder: Contains three proprietary ingredients that deliver vital proteins that multiply natural collagen levels, providing a boost to hair productivity, follicle strength, and a youthful shine.

Give the Gift of a Bauman E-Gift Card

- With so many options at Bauman Medical, maybe too many for you to choose, you might want to consider one of our e-gift cards instead. These can be applied to any product or service, in-person, remotely, or for purchases in our eStore.
- Here are a few ways of the many ways your e-gift card recipient might want to use it (in addition to what you read about above):
- Consultations with me or Trina Arce, our nurse practitioner
- Hair transplantation
- **Trichotest™** (identifies the exact hair loss treatments that will perform best for you based on your genetics)
- High-density Platelet Rich Plasma (PRP) "Vampire" hair regrowth therapy
- Compounded Formula 82F Topical Finasteride + Minoxidil (designed to reduce the risk of side effects from oral finasteride/Propecia)
- **TED** (TransEpidermal Delivery) Non-invasive technology that uses ultrasonic sound waves and air pressure to enhance the penetration of a specialized topical hair growth serum into the scalp
- Non-surgical 3D-printed hair systems or cranial prostheses

OK. So now that you have a lot of ideas of what to buy that hard-to-buy-for person, here's your next step (and you don't even have to drive to the mall to do it).

About Dr. Alan J. Bauman

Alan J. Bauman, MD, ABHRS, IAHRS
Hair Loss Expert

Dr. Alan Bauman is a full-time board-certified hair restoration physician who has treated over 33,000 patients, has performed more than 12,000 hair transplant procedures and over 12,000 PRP's since starting his medical hair loss practice, Bauman Medical in 1997.

Dr. Bauman is one of approximately only 200 physicians worldwide to achieve the certification from the esteemed American Board of Hair Restoration Surgery (ABHRS). Dr. Bauman is known for pioneering numerous technologies in the field of hair restoration including minimally-invasive FUE Follicular Unit Extraction, VIP|FUE™, Low-Level Laser Therapy, PRP Platelet Rich Plasma, PDOgro™, eyelash Transplants and others.

Dr. Bauman was voted "#1 Top Hair Restoration Surgeon" in North America by Aesthetic Everything for the 6th consecutive year, "Top Hair Restoration Surgeon of the Decade", and received the 2022 "Lifetime Achievement Award in Hair Restoration". He was also recognized by Forbes as one of "10 CEOs Transforming Healthcare in America."

ADVANCED TREATMENTS. EXCEPTIONAL RESULTS. THE ULTIMATE HAIR RESTORATION EXPERIENCE.

Hair Restoration for Men and Women

AVOID BACK AND SPINE SURG

By Aaron Rosenblatt, MD

surgery becomes likely. That's because hightech images routinely uncover bulging discs and other "abnormalities." Dr. Rosenblatt will use this information and interventional techniques to avoid surgery.

Trouble is, many findings on scans often have nothing to do with what's hurting. If you take 100 people off the street and give them MRI's or Cat Scans, 33% of them, even if they had no back pain whatsoever, would have obvious structural problems. Data also points out that less the 5% of all patients who experience back pain will EVER require surgery but, unfortunately, a much higher percent of patients wind up with an operation. We will help avoid this situation.

Here's the real problem... Patients tend to think of back surgery as the BIG CURE or consider it the treatment that will work successfully. Sometimes, in our desperation to get our lives back, it may seem like a good idea to jump over those less invasive procedures and go right to the big one. This is rarely true.

Dr. Rosenblatt says, "Per my experience, it is rarely the case that a patient I see in my office will ever require surgery for pain. I also see too many patients who have already had 1 or more back surgeries without any relief." Surgery should NEVER be seen as worth trying for pain. This approach usually fails to help patients overcome their pain and now their spines are complicated and worse off due to after effect of surgery.

If a doctor recommends an operation, get a second opinion as soon as possible. A good surgeon should understand that you need to be comfortable with any decision and prior to having a surgery other opinions are necessary. For a truly useful second look, Dr. Rosenblatt can fully evaluate this situation and give what options exist.

Dr. Rosenblatt explains, "There have been too many times where patients were scheduled for one type of surgery and something totally different was causing their pain. Specifically, issues with sacroiliac

simple reason; the operation was not the right treatment, because the surgeon never pinpointed the source of the pain. As a result, patients may be just as miserable as they were before, or worse off. Unfortunately a desperate number choose to try surgery again. This is usually the wrong decision as well and this should be avoided. Statistics show also that by two years after a patient's first surgery, about 8% of patients have had another operation and by

10 years after, the rate jumps to 20%, an analysis of

Washington State hospital data found.

ack surgeries can fail for a devastatingly

There is no one best way to treat everyone. But the chance of finding relief for ongoing pain unquestionably lies in understanding what has gone wrong. This is not an easy task. Then seeing the most appropriate specialist for your problem and asking the right questions is quite important. With back problems, perhaps more than with any

and asking the right questions is quite important. With back problems, perhaps more than with any other medical condition, getting the best care at the utmost importance. The most important doctor you can see, at this point, is an Interventional Pain Management Specialists like Dr. Aaron Rosenblatt. A well qualified and certified doctor like him can evaluate a patient completely. He will order the appropriate scans and or test needed in order to

Once all of the appropriate tests are done Dr. Rosenblatt can see what diagnostics need to be completed in his state-of-the-art pain management facility. That's why it's critical to have a thorough workup. To get a sense of the cause of your pain X-rays and MRI/CT scans can be helpful but just

come up with a plan to properly diagnose and the

treat the issues WITHOUT SURGERY.

X-rays and MRI/CT scans can be helpful but just because these scan say you have a disc problem here and or an arthritic problem there does not mean that this is where your pain is generated from.

As an interventionalist, Dr. Rosenblatt will take this information and set up diagnostic tests within his office to properly pinpoint the exact regions of the spine which require any type of treatment. Without these diagnostic tests, the wrong diagnoses can be made and then ineffective treatment with

joints, hips and other regions of the body can mimic pain which would also NOT require surgery."

Dr. Rosenblatt continues, "I'm always trying to help a patient fully understand what is causing them a pain issue. This is usually pinpointed easily, diagnosed properly and then treated successfully without the need for any type of surgery."

Avoiding surgery is our number one goal to help to treat a growing older and active community. At Dr. Rosenblatt's beautiful freestanding interventional pain management building in Delray Beach, FL, he serves at the medical director and is board certified. Every patient is evaluated by Dr. Rosenblatt himself and a comprehensive treatment plan is always tailor made for each individual. Patients are NOT seen by PA's (physician assistants) or NP's (nurse practitioners). You will see the doctor at each and every visit. Dr. Aaron Rosenblatt specializes in performing Interventional Pain Management procedures and also in the field of Physical Medicine and Rehabilitation. His knowledge encompasses each region of the body which can cause pain. He runs on time and does not make patients wait hours in his office to see him. He is not only a pleasure to talk to regarding pain issues, but also enjoys every day topics such as sports, movies, entertainment and current events. Please look forward to more articles about Dr. Aaron Rosenblatt and the vast number of procedures he performs to help people with all types of pain. His main focus is to help individuals avoid surgery, eliminate pain medications and to ultimately feel much better on a daily basis and enjoy life!

Early Pain Treatment CAN PREVENT Prolonged Suffering!

PANCREATIC CANCER

ancreatic cancer is the 10th most commonly diagnosed cancer in the United States, accounting for about 3% of all cancers and 7% of all cancer deaths, according to the American Cancer Society. Due to various factors, the disease is difficult to detect at an early stage, when it is more treatable.

Understanding Pancreatic Cancer

The pancreas gland, about 6 inches long and located in the abdomen, is surrounded by the stomach, small intestine, liver, spleen and gallbladder. Its two main functions are to aid in digestion and help regulate blood sugar.

Pancreatic cancer begins when abnormal cells within the gland grow out of control and form a tumor. These abnormal cells, or tumors, known as either exocrine (90%) or endocrine, can often spread to other areas of the body, including the liver, abdominal walls, lungs, bones and lymph nodes.

Because the pancreas is located deep in the abdomen, diagnosis is complicated. Tumors of the pancreas can only be seen on imaging studies, such as a computer tomography (CT) scan, magnetic resonance imaging (MRI) or ultrasound. If detected, a tissue biopsy and/or blood test can help to confirm an exact diagnosis.

Signs and Symptoms

There may only be vague signs or symptoms, if any, in the early stages of pancreatic cancer, and some may mimic those of other illnesses. Warning signs can include:

- Jaundice (yellowing of the skin and and/or whites of the eyes) with or without itching
- Change in stools (light-colored stools and/or dark urine)
- Pain (usually in the upper or middle abdomen and back)
- Loss of appetite, weight loss and/or nausea

See your primary care doctor if you experience one or more of these symptoms.

Know Your Risk Factors

Pancreatic cancer does seem to run in some families due to inherited gene changes (mutations) that can be passed from a parent to children. In fact, about 10% of pancreatic cancers are hereditary. Talk with your physician if a first-degree relative (parent, sibling or child) has been diagnosed with pancreatic cancer; genetic testing may be recommended.

The chance of getting pancreatic cancer increases with age; most people diagnosed are over age 60. While the exact cause of pancreatic cancer is not well understood, the Pancreatic Cancer Action Network® cites common risk factors:

• People who have had diabetes for more than five years are more likely to develop pancreatic cancer.

- People who smoke cigarettes are two times more likely to develop pancreatic cancer than those who have never smoked. The risk of pancreatic cancer begins to drop as soon as a person stops smoking.
- Being very overweight increases the chances of developing pancreatic cancer. The risk is even higher in people who are obese during early adulthood.
- People with chronic pancreatitis are more likely to develop pancreatic cancer. Inflammation of the pancreas is common in people who consume large amounts of alcohol for many years.
- Gum disease or tooth loss appear to be linked to the disease.
- Exposure to certain heavy metals and environmental chemicals, including benzidine, pesticides, asbestos, chlorinated hydrocarbons and benzene, among others, may increase risk.
- Black Americans have a higher incidence of pancreatic cancer than other ethnicities.

It is important to note that many risk factors for developing the disease can be reduced by making positive lifestyle choices, such as eating a plant-based diet and staying physically active. Talk with your health care provider for direction on reducing your risks.

Promising Treatment Advances

Surgery, chemotherapy and radiation are standard treatments for the disease, but treatments are determined based on the unique needs of each patient.

Because there is no screening test to detect pancreatic cancer, most patients are diagnosed at later stages, which can limit treatment options because the cancer can no longer be removed with surgery or it may have spread to other parts of the body. If pancreatic cancer is detected at an early stage, when surgical removal of the tumor is possible, the five-year survival rate is 42%.

Scientists are learning more about the genetic changes that cause cancer at a rapid pace. Targeted treatments and new combinations of chemotherapy drugs used with traditional therapies are being studied in clinical trials and continue to show great promise for improving detection, diagnosis and patient survival rates.

World-Class Cancer Treatment Close to Home

About Florida Cancer Specialists & Research Institute, LLC: (FLCancer.com)

Recognized by the American Society of Clinical Oncology (ASCO) with a national Clinical Trials Participation Award, Florida Cancer Specialists & Research Institute (FCS) offers patients access to more clinical trials than any private oncology practice in Florida. The majority of new cancer drugs recently approved for use in the U.S. were studied in clinical trials with Florida Cancer Specialists participation.* Trained in prestigious medical schools and research institutes, our physicians are consistently ranked nationally as Top Doctors by U.S. News & World Report.

Founded in 1984, Florida Cancer Specialists has built a national reputation for excellence that is reflected in exceptional and compassionate patient care, driven by innovative clinical research, cutting-edge technologies, and advanced treatments, including targeted therapies, genomic-based treatment, and immunotherapy. Our highest values are embodied by our outstanding team of highly trained and dedicated physicians, clinicians, and staff.

THE LATEST EUROPEAN PEEL WITH NO DOWNTIME

PRX DERM PERFEXION IS A TREATMENT THAT HAS BEEN USED SUCCESSFULLY FOR YEARS IN EUROPE AND IS FINALLY AVAILABLE TO US HERE IN THE UNITED STATES. OVER 4 MILLION TREATMENTS HAVE BEEN PERFORMED WORLDWIDE IN OVER 52 COUNTRIES, AND WE ARE SO EXCITED TO FINALLY HAVE IT AVAILABLE HERE TO OUR PATIENTS. THIS TREATMENT GIVES THE BEAUTIFUL RESULTS OF A PEEL, BUT WITHOUT ANY DOWNTIME! THE TREATMENT IS QUICK, PAINLESS, NON-INVASIVE, AND WORKS ON ALL SKIN TYPES AND ETHNICITIES. IT SMOOTHS AND TIGHTENS THE TREATED SKIN (THE FACE, NECK, DECOLLETE, AND BODY), REDUCES PORE SIZE, MINIMIZES APPEARANCE OF FINE LINES AND WRINKLES, DIMINISHES AGE SPOTS AND HYPERPIGMENTATION, AND EVEN IMPROVES SCARRING SIZE AND DEPTH. IT'S ALSO BEEN BENEFICIAL IN REDUCING THE APPEARANCE OF REDDENED STRETCH MARKS.

The PRX Derm Perfexion treatment is made up of hydrogen peroxide, trichloroacetic acid, and kojic acid to provide immediate and lasting improvement to the look and feel of skin without any peeling effects. We use it to target aging skin, texture, laxity, wrinkles, and dull skin for complete rejuvenation of the face and body. Patients love this procedure because it provides immediate firming, hydration, and tightening that can be noticed after just the first treatment. There is no peeling or photosensitivity afterward, so it can be done any time of year, even in summer months! There is no discomfort, no needles or lasers involved, and ZERO downtime.

PRX Derm Perfexion is a quick procedure that can be done in your lunch hour. We suggest a minimum of 4 treatments done weekly, with each subsequent treatment building upon the last, further enhancing your results. Come schedule a complimentary consult with our offices to see how this new treatment can be the perfect enhancement for your skin.

SENIORS AGING IN PLACE

or today's seniors, the desire to stay at home is strong. In fact, the modern elderly population is much different from its past counterparts. Almost 90% of people over 65 want to live in their home and community as long as possible, according to a report by the AARP Public Policy Institute and the National Conference of State Legislatures. A whopping 80% believe they will stay in their home for the remainder of their life. Aging in place allows seniors to enjoy all the comforts their familiar home has to offer. Today's options to support seniors in their home offer seniors and their families the peace of mind and support to make staying at home a healthy option.

AGING IN PLACE PROVIDES A SENSE OF COMMUNITY

Seniors have spent a lifetime building family relationships and likely years bonding with neighbors. Removing older adults from their long-time homes can make them feel like those connections have weakened. According to research published in The Gerontologist, the majority of seniors want to age in place because of the attachment and familiarity they feel with their home and communities.

IT FIGHTS ISOLATION

That sense of community provided through aging in place does more than make seniors feel comfortable. It is also integral for fighting feelings of isolation, a dangerous trend among seniors. Researchers from the University of Chicago found a link between loneliness and high blood pressure in older adults. The study authors noted that feelings of loneliness can occur even when a senior is surrounded by people. This further demonstrates the importance of the familiarity and sense of community provided through aging in place.

Besides being preferred by seniors, aging in place offers another benefit: savings.

While it may seem that aging at home would be more expensive than moving to a nursing or assisted living home, the opposite is actually true. With help from a home healthcare worker, staying in your home costs about 20% of what a nursing home costs on a monthly basis.

HOME HEALTH CARE CAN HELP

For many families and seniors, home health care is a beneficial choice – a safe and affordable solution that supports the family, while allowing seniors to stay in the comfort of their own homes and communities.

HERE ARE TEN WAYS HOME HEALTH CARE CAN SUPPORT YOU:

1. Home health care professionals can be there when needed. If family and loved ones are a distance away, home health care can give you peace of mind. Trained and qualified professionals

can assess safety risks and make simple corrections in the home – from placing a rug on a slippery floor, to recommendations for ambulatory assistance.

- 2. Home care supports activities of daily living (ADLs). In-home services allow adults to receive day-to-day help with the personal care they need, preserving their dignity and maintaining a good quality of life. Assistance with activities of daily living can include bathing, grooming, and medication reminders.
- 3. Access to skilled nursing care at home. Skilled medical care can be delivered at home by thoroughly supervised nurses, certified, licensed and knowledgeable about high-technology medical equipment. Home health care can ensure that your loved one's complex medical needs are met.
- 4. Support with diet and nutrition. Adults age 65 and older, people with chronic conditions, and those recently discharged from a hospital or nursing facility are likely to be nutritionally at-risk. Aging, bed rest, illness, and injury can all contribute to the loss of lean body mass. Home care may include nutritional counseling and home-cooked meals to protect against malnutrition.
- 5. Medication management. Multiple prescriptions it can be confusing to manage. Home health care professionals can ensure the right medications are being taken at the right times to control health conditions and prevent harmful drug interactions.
- 6. Home health care professionals provide caring companionship. Research shows that aging adults stay healthier with social interaction. Home health aides can become trusted friends for walks, reading, cards, games, movies, meals, and other social activities. Accompaniment on errands such as grocery shopping, medical appointments, and other activities are also added benefits.
- 7. Home care helps with light household chores. When aging adults struggle the daily demands of housework, such as laundry, vacuuming, dishes, and simple chores home care helps to consistently maintain a safe and healthy living environment.

- 8. Home health care clients have comparable or better health outcomes. Research has shown that clinical results are comparable or better with fewer complications when home care is provided to individuals with chronic conditions such as pneumonia, diabetes, or COPD.
- 9. One-on-one focus and support. Home health care services are truly unique, providing meaningful, one-on-one personal and skilled care that builds strong bonds between professionals and their clients. According to the Cleveland Clinical Journal a person who is seen by a clinician in the comfort of home more readily trusts that the health care team places their needs first.
- 10. An affordable alternative to facility or hospital care. According to the National Association of Home Care, the average cost of care from a skilled nursing facility is \$544 dollars per day, while the average cost of home health care is \$132 dollars.

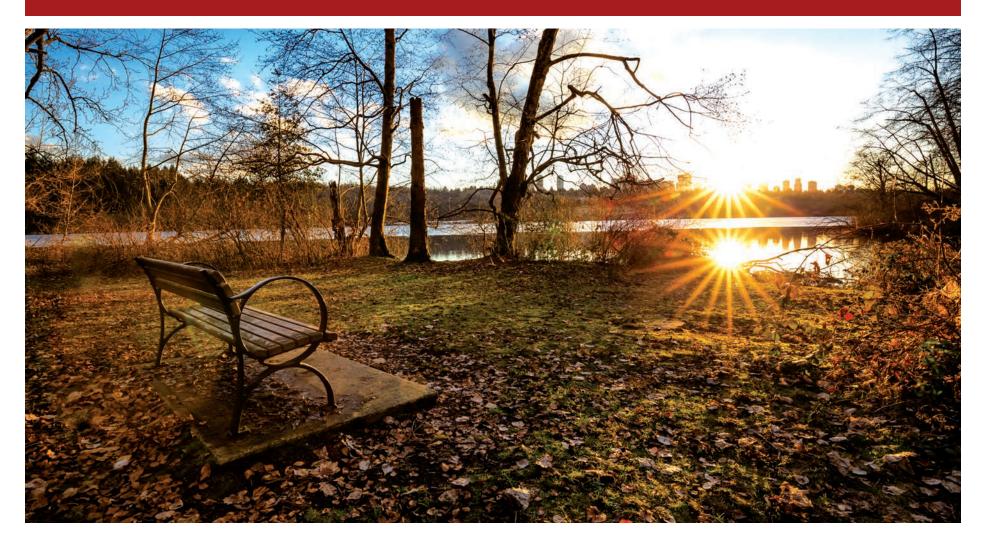

OUR PROMISE

Through Trusted HomeCare Home Care Services, you can rest assured that your loved one and family will be safe and secure in a positive environment right at their home. Even if you simply have questions or want to understand how to better care for your elderly loved one experiencing the inevitable process of aging, we are able to help with that.

TRUSTED HOMECARE SERVICES MISSION STATEMENT

As a whole group, our mission statement says that we are here to access the needs of each client to help them maintain their independence while living in their own homes and communities.

Contact our team at
Trusted HomeCare and let's discuss
how we can support
you or your loved one

About Accepting Death

By Ernest Morgan, from Dealing Creatively with Death

f we were to walk across the fields in summertime to some undisturbed spot and mark off a piece of ground say four feet square then examine this little area minutely, we would find an astonishing variety of life. There would be many species of plants; possibly a mouse's nest, and other small creatures. Then resorting to a microscope, we would observe an incredible host of microorganisms functioning in association with the larger life forms.

In that little square of ground we would have seen an interdependent community of life in which

birth and death were continuously taking place and in which diverse life forms were sheltering and nourishing one another. Written in the rocks beneath was a story of a similar process going back through eons of time.

Humankind is part of the ongoing community of nature, on a world scale, subject to the same cycle of birth and death which governs all other creatures and, like them, totally dependent on other life. Sometimes we tend to forget this. Birth and death are as natural for us as for the myriad of creatures in that little square of ground.

TubcuT® Can Help Alleviate Slip and Falls and trouble getting in and out of the Bath

isdom may come with age but getting older has its set of challenges. People are living longer but not necessarily healthier. From diminished eyesight, arthritis, immobility, to cognitive decline, some conditions make it high-risk and unsafe for seniors living on their own or with limited supervision.

Some of the biggest hurdles for seniors are tripping, slips and falls, slippery bathtubs, and getting in and out of the bath or shower. These can be extremely hazardous for those with arthritis, dementia, fibromyalgia, cardiac conditions, Parkinson's and many other conditions that cause stiffness, pain, lack of coordination, immobility and failure to be able to follow direction.

Whether from injury or aging, getting in and out of a bathtub can be challenging. Instead of spending thousands of dollars on a bathroom renovation, you can easily convert your tub into a walk-in shower with the TubcuT® Company.

The TubcuT® is the original tub to shower conversion, and it helps to improve accessibility, reduce accidents, serious injuries and help people remain in their homes longer. And the good news is, you will save on average, 90% of replacement costs with TubcuT® as they convert your tub into a walk-in shower in just one day. There is no plumbing or demolition required, and there is little to no disruption. A regular shower curtain is all that's needed to stop any water overspray concerns; they can also install shower doors if you'd prefer.

IT'S LIKE HAVING A WALK IN SHOWER WITHOUT THE COST!

TubcuT® creates an opening that fits your needs. Unlike cap systems, The TubcuT ® adapts to you and what your lifestyle requires. With TubcuT's® exclusive process, you dictate where they create the opening, how wide it will be, and how low.

The TubcuT® threshold is typically 4" above the floor giving you more accessible, safer access, the same as a typical shower pan. TubcuT® Follows the same exact contour of your tub there, and there is no ledge on the threshold or bulky plastic inserts. Those inferior plastic inserts are just caulked in and are subject to leaking and will need service down the road. The TubcuT® is custom fitted to your tub creating a seamless, waterproof shower with a professional factory appearance that's unlike anything else available. The TubcuT® is the only tub to shower conversion that can be reversed! If you save the cutout section of the tub, they can easily restore your bathtub to its original condition if needed.

The TubcuT® changes lives, but many dismiss it as something only for the elderly. However, there is another class of customer that it suits just as well, those with health and mobility issues. People with multiple sclerosis, Parkinson's disease, arthritis, fibromyalgia, muscular dystrophy, cerebral palsy to name a few, will benefit significantly from The TubcuT®.

For accident victims, anyone in chronic pain, people with knee or hip replacements or any neuro-muscular disease, the TubcuT® can be a life-changing product. To find out more, contact them today!

The Tub Cut Company 877-882-2887 www.TUBCUT.COM VA APPROVED

These 5 Sectors Are Rising on the Tides of War

"War is the health of the state." ~ Randolph Bourne

The guy who said that could as easily have said... "War is the health of the stock market"... which is true, if you're in the right sectors.

Today you're going to get 5 ways to buy the sectors benefiting most from the war in Ukraine.

Right now (late October) all of these sectors are ranked in the top 13 out of 45 groups we track.

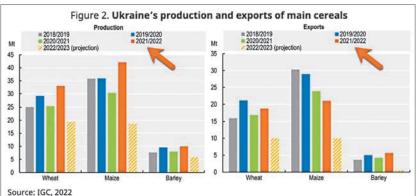

If this feels like "war profiteering," remember – we can't say for sure these sectors are strong because of the Ukraine war.

And if I showed you why Apple, Walmart or Nike have generated their billions in profits, you'd probably feel the same. This is about making money and not about anything else.

What we do know for certain is that money managers at giant institutions are accumulating positions in these 5 groups.

Sector #1 - Agriculture/Chemicals

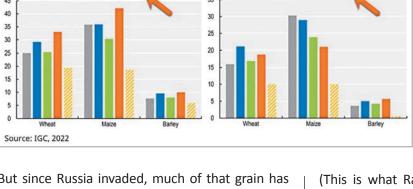

Ukraine is the fourth-largest exporter of wheat, with export volume reaching over 24 million metric tons.

But since Russia invaded, much of that grain has been stuck in the war-torn country, thanks to crippled railways and closed ports in the Black Sea. This graphic shows how exports have been affected in 2022 (see the orange bars).

A sector closely tied to agriculture is Chemicals. This is because chemicals figure heavily in fertilizers and pesticides.

Right now the Chemicals sector is ranked #6 of the 45 sectors we track on our Sector Prophets Pro platform. (The arrows point to the 5 sectors we'll be discussing. I'll only flash this image once. But I want you to see where the sectors rank.)

To gain bullish exposure to this sector, you can buy the Invesco Water Resources ETF (PHO).

Sector #2 - Aerospace **Airlines**

It's practically a cliche that war is great for the defense industry and related industries. In fact, the Pentagon has a multi-year plan to rearm Ukraine and integrate it into NATO.

(This is what Randolph Bourne meant when he called war "the health of the state.")

Right now the Aerospace Airlines sector is ranked 13th on our Sector Relative Strength Matrix.

Like with the Chemicals sector, it's emerging out of oversold territory, with plenty of room to run higher.

The ETF you should look at here is the SPDR S&P Aerospace & Defense ETF (XAR).

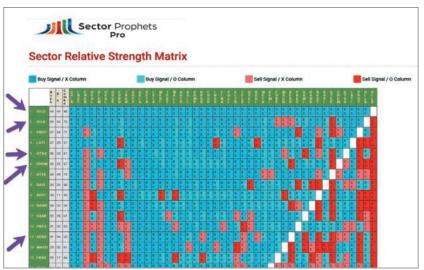

Sector #3 - Oil Service (Part of the #1 broad Energy sector)

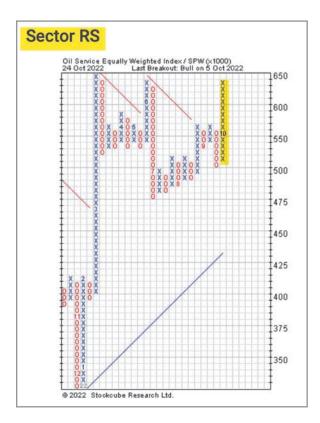

You probably already know how Russia's invasion

(and its moves to deprive Europe of gas and electricity) has impacted the global energy market.

What you might not know is that the Oil Service sector has been ranked #1 for almost three weeks (again, see the Matrix, above).

As you can see on this Relative Strength chart (which shows the performance of the sector versus the weir market), Oil Service is crushing it right now.

(We know that the sector is doing better than the stock market as a whole, because the current column on the chart – the highlighted one at the far right, is a column of X's.)

The ETF to look at is: iShares U.S. Energy ETF (IYE).

Sector #4 - Oil & Coal

This sector is currently ranked #2, just behind Oil Service.

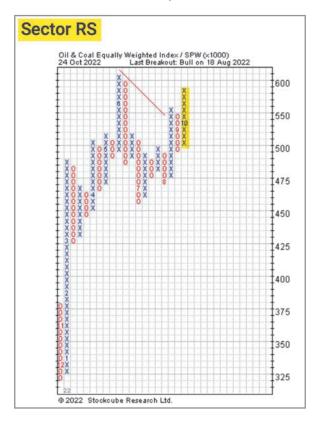

And just like Oil Service, Oil & Coal is crushing the wider market.

We like Invesco Dynamic Energy Exploration & Production ETF (PXE).

Sector #5 - Utility Gas

This sector is ranked #5 out of 45 and is also outperforming the wider stock market on a relative strength basis. (Again, notice that the most recent column is X's.)

We like the iShares U.S. Utilities ETF (IDU).

There you have it! Thanks for reading.

Enjoy a Spontaneous Sex Life Again - Rekindle the Spark!

NEW 1st-of-it's-kind potential cure for Erectile Dysfunction and Peryonie's over 95% Success

IMPLY MEN'S HEALTH
IS QUICKLY GRABBING
ATTENTION AS
BOCA RATON'S #1 MEN'S
SEXUAL HEALTH CLINIC &
LEADER IN THE FIELD.

In 2015, Dr. Joan Katz, a Harvard-trained physician and owner of Simply Men's Health was the first to introduce ED shockwave and revolutionized the treatment of ED with RejuvaWAVE®.

And now again in 2022, Dr. Katz introduces the game-changing RejuvaWAVE Multi-Wave ShockwavesM, the first-of-its-kind therapy, boosting the success rate to over 95% curing ED and Peyronie's Disease and reversing the inevitable aging process.

Turn back the clock with Simply Men's Health most advanced, cutting-edge treatments. Men of all ages can once again enjoy the spontaneous, active sex life they enjoyed in their youth.

ATTENTION MEN! NOT ALL ED SHOCKWAVE IS THE SAME

Since Simply Men's Health pioneered the new standard of care with RejuvaWAVE®, many clinics have popped up offering different versions of shockwave. However, not all ED shockwave treatments are the same. Unfortunately, many men have sought treatment at franchise operations gone, often not owned by physicians, and have been disappointed. Some have even paid thousands of dollars to franchises touting 1000's of procedures performed and got little to no results. We know the genuine

RejuvaWAVE® protocol works and we want you to experience the difference RISK FREE!

If you have tried shockwave treatment at another clinic or at our previous Glades Road location which was shared with another clinic, Simply Men's Health wants you to experience for yourself the genuine RejuvaWAVE® DIFFERENCE performed by our highly trained and certified technicians: Call Simply Men's Health and get one FREE session – absolutely NO obligation – No fee – No purchase! Judge for yourself as Jeff, one of many of our happy patients states:

"I've come to Simply Men's Health. I had gone to a previous place... this one is the REAL deal. Absolutely a completely different procedure. Everything is much better. The procedure working the first time. Completely satisfied."

HOW DOES REJUVAWAVE MULTI WAVE SHOCKWAVE DIFFER FROM OTHER SHOCKWAVE THERAPIES?

The NEW RejuvaWAVE Multi-Wave ShockwavesM protocol is the first-of-its-kind ED treatment combining acoustic pressure waves and state-of-the-art photobiomodulation technology to synergistically treat the root cause of the problem, not just the symptoms. This multi-wave shockwave treatment distinguishes itself from all others by our proprietary multi-modality protocol, the RejuvaWAVE® application technique combined with low-level red and near infra-red laser technology, we use the state-of-the art Storz medical device and lasers. As a result, RejuvaWAVE Multi-Wave ShockwavesM ED treatment has over a 95% success rate curing ED and Peyronie's.

WHAT ARE THE BENEFITS OF REJUVAWAVE MULTI WAVE SHOCKWAVESM?

RejuvaWAVE Multi Wave Shockwave^{5M} NATURALLY restores spontaneous sexual function, gives you harder and longer lasting erections, and increases penile sensation

- 100% SAFE and Non-invasive
- Drug Free, Needle Free, Pain Free
- No downtime, No side effects
- Activates your body's own stem cells and healing power
- Stimulates cellular metabolism and ATP production
- Promotes tissue regeneration
- Dissolves micro-plaque in blood vessels restoring blood flow
- Stimulates growth of new blood vessels increasing blood flow
- Breaks up scar tissue decreasing the curvature of Peyronie's Disease
- Stimulates regeneration of nerve tissue improving sensation and pleasure
- Promotes natural growth in penis size and girth
- Improves sexual performance
- Over 95% patient satisfaction

WHAT IS REJUVAWAVE® MULTI-WAVE SHOCKWAVE LASER PROTOCOL?

This state state-of-the-art, scientifically proven technology combines a proprietary acoustic pressure wave application technique along with photobiomodulation. Photobiomodulation employs a combination of cold, low-level red and near-infrared laser therapy which reduces oxidative stress and stimulates mitochondrial ATP production. Photobiomodulation works synergistically with shockwave to stimulate cellular metabolism, enhance blood circulation, promote tissue regeneration, and stimulate the growth of new blood vessels and nerves in the treated areas.

Unlike pills which lose effectiveness over time, our treatment heals damaged tissue and reverses the hands of time, helping men return to their younger, healthier selves and enabling men to enjoy a spontaneous sex life again. The results have been nothing short of amazing!

"I haven't been able to get an erection in 5 years... After several visits I noticed improvements. After a couple of months, I was able to have a spontaneous sex life again. You gave me my life back." - Bob M.

HOW TO EXPERIENCE THE REJUVAWAVE® DIFFERENCE

Pick up the phoneONE CALL can change your life! We respectyour time and privacy.

Each client receives individualized care from our experienced staff of physicians.

We pinpoint the exact cause of your Sexual health challenge and create a customizedTreatment protocol.

Call today and enjoy a Spontaneous and Active Sex life again.

RESEARCHING "THE BEST OF BOTH WORLDS"

lectro medicine, Herbs, Ozone, diet were part of daily life in 2014. I first heard about Doctor Raymond Royal Rife's scientific work during a conversation with a health coach. He mentioned to me that I should get a device that broadcasts radio frequencies to kill pathogens. The scientific device named the Beam Ray machine was invented by a gifted scientist Raymond Rife, born in 1888 who studied bacteriology at John Hopkins University. Doctor Rife began his experiments using electronic frequencies on viruses and bacteria in 1920. The doctor used powerful microscope to see microbes invisible at the time. He claimed that each microbe has its resonance frequency. With Rife technology, he bombarded the microbes with light frequency, which marked the microbe at an intense level. Doctor Rife claimed that after flooding, the microbes would either explode or shrivel up and die. Hence, I decided that it is worth finding a similar device. I went ahead to search for more information, a quest that led me to meet Dr. RL. Dr. RL's herbal products and knowledge have been priceless and contributed significantly to understanding my husband's recovery journey. When it comes to electricity, frequencies, HZ Etc., Dr. RL is highly knowledgeable helping me through the years and still helps me whenever I need his help, prayers and support. I have since learned other modalities using frequencies even remotely. Despite it being challenging, we took every event that happened in our lives as a lesson, example, and opportunity to explore different ways of thinking and seeing life. Everyone we met was very special to us as they offered their support and brought the knowledge to our lives. Proteolytic, digestive, and pancreatic enzymes were the core of the entire treatment; for they function to digest and break down proteins into amino acid components. These components are essential for the body's immune system. Cancer patients usually need help with their food digestion. Dr, K took it upon him to teach and help me follow Dr. Gonzalez's treatment, which he initially learned from Dr. Kelly. He taught me everything I needed to know about metabolism and rebuild the body through nutrition and detoxification. Dr. K is a mentor and a teacher who helps people like me to get through with knowledge, and thanks to him, I was able to meet and understand enzymes which are one of the most magnificent substances I know. The Journey was full of hope, emotions, and expectations. Cancer is always something that brings fear to our lives because it leaves us without knowing how much time we have. With no clear-cut cure, we are only left to hope that the trials we understand all along

the way will work. Sometimes I felt as if I was in dark tunnels holding on to the hope to see the light with faith as my pillar and desire to see my husband recover. Every day my husband was feeling better, with more energy and strength.

Boston, Massachusetts, was our next stop in our healing journey, a beautiful city full of life. I love life in the city, the trolleys, shopping, the people and long walks exploring the streets. We had gone to see one of the world's most famous Oncologists at Dana Farber Cancer Institute. We wanted to hear his thoughts on treatments available for Multiple Myeloma.

We were referred to Dana Farber by our local Physician as the institute is home to most of the best doctors. I remember getting to the hospital; my heart filled with high expectations. The first impression was a homely place as the staff members were friendly, supportive, and exceptional, which was all we could ask for. I was granted the chance to see a nutritionist for cancer. I wanted to be advised on how I would safely use a combination of herbal products and chemotherapy. Dr. Richardson was so friendly and compassionate to us. He explained the protocol they do, and he mentioned that a transplant was going to be the route, but we had to see when would be the best time for it because it was just a matter of time. However, I felt that if a transplant were to happen,

it would be at God's time. The visit had gone well, and we went to the cafeteria to find out something for my husband, but I was shocked to find only the regular meals. Being a cancer center, I expected the cafeteria to have healthier meals. He only had a salad, after which we went to whole foods to buy all kinds of greens, flaxseed oil, coconut water, and many others that I would make his juices. I used to travel with my blender to make him his vegetable juices any time of the day. While researching in my room, I had come across stories of people healing through alternative and conventional treatments. Since I love everything natural, I decided to contact them directly and ask them how they would treat blood cancer. I was aware that everyone had a different modality and different way of thinking regarding cancer. Through every doctor or patient that I spoke to I have learned so much that I could understand both worlds with the aim to heal and better.

t's human nature to seek out the reasons why we feel anxious. Very often we look at external factors for the root cause; the current pandemic, being unhappy in a job, unhappy with living situation, or conflict with family or significant others tend to be our "go to". We may also look at our past experiences, upbringing, or past trauma, to explain this unrelenting uneasy feeling we have inside.

The truth is that anxiety is a pattern of neuron firing in the brain that can be present from birth and life situations can exacerbate it to the point of dysfunction. Brain neural patterns don't necessarily dictate how we will behave, however, trying to change the environment, situation or behavior won't alter the patterns. Therefore, you can't talk someone out of anxiety. Anxiety is also not reserved for adulthood, it can cause dysfunction and issues in life regardless of age. Adults are unable to "change" their way out of anxiety and for children and young adults, you can't change their routines or discipline them from feeling anxious.

In babies and infants, anxiety neural patterns in the brain may present as:

- Colic
- Tantrums
- Fussiness
- Not a good sleeper
- Sensitive

As a child gets older into the toddler years it may present as:

- Terrible two's, three's, and four's
- Tantrums
- A spirited child
- · Picky or sensitive
- · Difficulty with
- Cranky, fussy, and not a good sleeper or napper
- separation

I know what you are thinking. These symptoms are normal for children this age. And you are correct; they are perfectly normal, developmental behaviors for infants and toddlers. This is why diagnosing anxiety in young children is very difficult and not usually done unless symptoms are severe. In most cases, anxiety

ANYONE CAN SUFFER FROM ANXIETY Neurofeedback Can Help

By Renee Chillcott, LMHC

manifests at an older age when the symptoms are abnormal for the age or stage of development. And even then, parents tend to want to attribute what they observe to behavioral, personality or social causes.

"She didn't study for her test and that is why she's refusing to go to school today". "He's unmotivated to do anything except play video games and that is why his stomach hurts all of the time and he sleeps all day". "She just has too many activities scheduled and that's why she's overwhelmed". "He has too much homework and is up all night studying which explains why he doesn't sleep well".

The reality of the situation is that neither your child's personality nor their hectic schedule is the culprit. It's their brain, or rather, the neural patterns in their brain, that is not allowing them to handle the workload at school, pressure with friends, feeling good, making good food choices, having a normal sleep schedule, and so on. And to make it even harder to diagnose or differentiate, anxiety patterns can look different but produce the same results.

Here is an example of one type of anxiety pattern. Increased BETA and High BETA is located in the central and frontal lobes. This could cause anxiety symptoms that range from OCD, anger control issues, irritability and impulsivity, poor judgement, excessive worrying, feelings of being overwhelmed and depressed, among others.

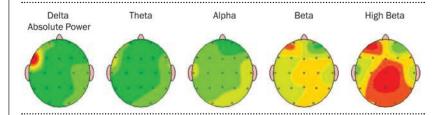

or physical trauma. It's a pattern in the brain that they are born with.

As a child reaches school age, anxiety may look like:

- Worrying about performance, grades
- Worrying about parents or loved ones dying
- More separation anxiety
- Fear of getting sick (vomiting is most popular)
- Fear of getting sick at school
- Social anxiety, difficulty with friends
- Feeling overwhelmed
- Nightmares or unable to sleep/fall asleep alone
- Sleep walking, talking or restless sleep
- Fatigue
- Refusal to go to school or meltdowns when going to
- Frequent trips to the clinic
- · Vocal or motor tics
- Loss of appetite or poor diet
- Somatic symptoms such as stomachaches, headaches, diarrhea, or digestive problems
- Poor grades usually due to missing school or falling behind

As they reach the teenage and adult years, the problem can become more apparent and more severe:

- Continued worry and difficulty handling traumatic events
- Dropping out of extra-curricular activities
- More social interaction difficulties or isolation
- Depression, suicidal or homicidal ideations
- Poor choices when confronted with life decisions (drugs, alcohol, sex)
 - Beginning to develop dysfunctional coping skills or self-medicating
 - Poor school performance/ failing classes, suspensions or expulsions
 - · Poor conduct: lying, stealing, violence
 - · Onset of panic attacks
 - Continued somatic symptoms and fluctuation in weight (gain/loss)
- Manifestation into other anxiety disorders such as: Obsessive-compulsive Disorder, Eating Disorders, Trichotillomania, PICA, Body Dysmorphic Disorders, Phobias, Panic Disorders, Addiction, Social Anxiety, Performance Anxiety, etc.

Very often, we contribute anxiety to traumatic events. As in the case of PTSD (Post-Traumatic Stress Disorder). Therefore, it becomes difficult to recognize the early symptoms of anxiety in children who haven't experienced a traumatic event. However, as mentioned previously, these neuron firing patterns can be present from birth and may not have a root or cause in emotional

www.sflHealthandWellness.com

According to *The Anxiety and Depression Association of America*, "Anxiety and depression are treatable, but 80 percent of kids with a diagnosable anxiety disorder and 60 percent of kids with diagnosable depression are not getting treatment, according to the 2015 Child Mind Institute Children's Mental Health Report."

Many health professionals believe that anxiety is a normal part of childhood and symptoms are not cause for alarm. Others believe that parenting and discipline need to be improved or implemented to treat the symptoms. In severe cases, medication is introduced as a treatment, but unfortunately, many children who suffer with symptoms, are medication resistant or not severe enough to medicate.

Adults can experience similar frustration when treating anxiety with medication. The diagnosis is a broad one and there may be very different neuron patterns causing the anxious feelings. This can cause treatment to be somewhat of a guessing game. Others struggle with side effects and dependency.

Neurofeedback can help. Neurofeedback can not only help reduce the anxiety symptoms specific to you, but it can "retrain" the neural patterns in the brain so that anxiety is better managed or controlled throughout your life. Through Neuroplasticity, Neurofeedback becomes a permanent correction of the anxiety patterns in the brain.

WHAT IS NEUROFEEDBACK?

Neurofeedback, also known as EEG biofeedback, has been studied and practiced since the late 60's. It is exercise for your brain; allowing you to see the frequencies produced by different parts of your brain in real-time and then through visual and auditory feedback, teaches the brain to better regulate itself. Neurofeedback can be used to help detect, stimulate, and/or inhibit activity in the brain safely and without medication. It can help restore a wider "range of motion" in brain states, much like physical therapy does for the body.

While the client sits comfortably watching a movie or pictures appear on the screen (a calm and focused state), the EEG equipment measures the frequency or speed at which electrical activity moves in the areas where electrodes have been placed. This information is sent to the therapist's computer. The therapist is then able to determine what frequencies are out of balance. For example, when the EEG shows that you are making too many "slow" or "sleepy" waves (delta/theta) or too many "fast" waves (high beta), the therapist adjusts a reward band to encourage more balanced activity. This encouragement or "reward" happens through an auditory reinforcement of "beeps" and sometimes through visual reinforcement of changes on the screen.

WHAT TYPES OF CONDITIONS DOES NEUROFEEDBACK HELP?

Symptoms of these conditions, among others, can improve through neurofeedback training:

- Anxiety Sleep disorders Depression ADD/ADHD
- Sensory processing disorder Bipolar disorder
- Seizure disorders Auditory/visual processing
- Chronic pain/Fibromyalgia Migraines/headaches

- Traumatic brain injuries Stroke Cognitive decline
- Peak performance Oppositional defiant disorder
- Rages/mood swings Attention/focus/concentration
- Reactive attachment disorder Autism/Asperger's
- Learning disabilities Obsessive compulsive disorder

WHAT IS AN EXAMPLE OF IMPROVEMENTS I MAY SEE?

At our center, our goal is to teach you how to tune into your own functioning. With children, we also teach the parents how to look at overall functioning rather than piecing together events or moments. We help you open your mind to possibilities with Neurofeedback rather than give too many examples that confuse the process or feel like a placebo. Changes you may experience or observe after a session are indicative of a learning process that will lead to improved functioning.

Examples of those positive changes may be:

- Sleep patterns/quality of sleep
- Energy levels, calmer or more activated
- Ability to focus or concentrate
- Physical symptoms such as pain, headaches, migraines, tics, balance issues
- Mood or emotions
- Motivation and organization
- Feelings of Well Being
- Obsessive behaviors or thoughts
- Memory/cognitions
- Anxiety patterns or trauma patterns
- Coping
- Regulation
- Learning, communicating, and/or performance

WHAT IS A QEEG (QUANTITATIVE EEG) OR BRAIN MAP?

The QEEG is a quantitative EEG. It's also called a brain map and does just that...it gives us a map of what is going on with the entire brain at one time. We attach electrodes to the whole head, 19 spots, and then record the brain waves with eyes open for 5 minutes and with eyes closed for 10 minutes. This recording is then sent to an independent specialist be read and analyzed. They are able to not only give us a summary of significant findings but the report also shows the results of analyzing the data several different ways. The brain activity is not only compared spot by spot over the entire head, but we can also look at connections, symmetry, how different parts are communicating and all of this data is compared to a database of peers (same sex, handedness and age). It can help us see what areas need to be addressed more efficiently than just training spot by spot.

We don't always need this data to make improvements in symptoms but we do recommend it in certain situations. A QEEG can also be helpful information when diagnosing and/or trying to decide the best medication/ supplement recommendations.

Is there enough research?

Neurofeedback has been researched since the 60's. Here are some resources for research. We have several journal articles, studies and books in our office for you to enjoy, however because of the amount of information out there, we cannot possibly have everything. Here are a few resources.

Look up the work of:

Dr. Joe Kamiya and Dr. Barry Sterman (Credited for earliest development of Neurofeedback).

Look for specific researched conditions:

HOW DO I GET STARTED?

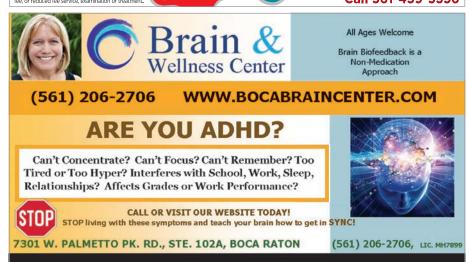

Getting started is easy. The Brain and Wellness Center staff will answer all of your questions, and help you get scheduled. If you are wondering what services are best for you? We can help determine that in a telephone consultation. Call, email or text message us today! Brain and Wellness Center, 7301 W. Palmetto Park Rd., Suite 102A, Boca Raton, FL 33433. (561) 206-2706, e-mail us at info@bocabraincenter.com, or text us at (561) 206-2706 or visit our website at www.BocaBrainCenter.com.

LUNCHTIME FACELIFT - LOOK GREAT THIS VACATION!

A New Procedure Available at ATC can Help Patients Avoid Pricey Cosmetic Surgery

t's evident that that lotions and potions are never going to correct the underlying weakening of the facial, neck and décolletage muscles and collagen fibers. When sagging skin, dullness and lack of elastin are taking a toll on maturing faces, Alma Lasers ClearLift™ is the answer many people have been waiting for.

The Virtually Painless Alternative to **Skin Resurfacing**

ClearLift™ is a non-ablative approach to laser skin resurfacing. ClearLift providers are able to offer patients skin resurfacing treatments that are fast and virtually painless with visible results and no downtime.

The innovative technology delivers a controlled dermal wound deep beneath the skin, (up to 3mm in depth). The outer layer of the skin is left undamaged. All stages of healing and skin repair occur under the intact epidermis.

ClearLift Offers Numerous Advantages:

- Fast Treatment Time no topical numbing is required and treatments can take as little as 20 minutes.
- Virtually Painless patients report a comfortable, skin resurfacing experience.
- No Downtime after a ClearLift treatment, patients can immediately return to their daily life.

Alma Lasers introduced ClearLift to serve the thousands of patients who desired the results of skin resurfacing without the usual post treatment recovery time and pain associated with traditional skin resurfacing.

ClearLift patients report visible improvement in their skin's appearance in as little as one treatment.1

HE CORNEA

lthough people may have heard the word 'cornea' in reference to the eye, many are unaware of what is really refers to. While diseases such as glaucoma and macular degeneration affect the back of the eye, the cornea is in the front of the eye.

In fact, the cornea is the most anterior structure of the eye. It is the clear part responsible for much of the focusing of light waves which enter the eve. When patients place contact lenses on their eye, they are placing them on their corneas. When patients develop an abrasion (scratch) or infectious ulcer of the eve, it is typically in the cornea.

The cornea consists of several layers, but it is simplest to break it down into three: epithelium, stroma, and endothelium. The epithelium is the superficial outer layer of cells. When a scratch occurs on the cornea, the epithelium acts quickly to fill in the scratch. In cases of severe dry eye, tiny dried out "holes" can also appear in the epithelium.

The stroma is the central portion of the cornea, and compromises the bulk of it. It provides the majority of structural support to the cornea. When patients undergo LASIK surgery, it is the stroma that is affected. In LASIK, a laser creates a flap within the stroma. That flap is then lifted and a laser then reshapes the cornea under the flap. For patients who are myopic (nearsighted), the laser flattens the center of the cornea. For patients who are hyperopic (farsighted), the laser removes tissue in a circular pattern to steepen the cornea. The endothelium is By David A. Goldman MD

the most posterior layer of the cornea. Consisting of a layer of cells, these endothelial cells work as microscopic pumps to pump fluid out of the cornea to keep it clear. As we age the number of endothelial cells decline. Typically this is asymptomatic. In conditions such as Fuchs Dystrophy, however, patients are born with a lower number of endothelial cells and at some point may require surgery. Fortunately, the surgical options have improved greatly – less than ten years ago a new procedure was developed called DSAEK. In the past, corneal swelling which did not respond to topical eye drops required a full thickness corneal transplant. With the DSAEK procedure, solely the posterior layer of cells is transplanted. With this newer technique, vision can be restored in weeks instead of months.

This is not to say that a full thickness corneal transplant does not have its place in eye care. Conditions such as keratoconus, where the cornea becomes irregularly cone shaped, and scars of the cornea can significantly limit visual acuity. In these cases, replacing all layers of the cornea can work well to restore vision. In many cases, laser vision correction can be performed over a corneal transplant so that the patient can see well without glasses.

While problems of the cornea, whether inherited of environmental, can significantly disturb vision, there are multiple procedures available to improve vision. As opposed to posterior eye pathology such as glaucoma and macular degeneration, the overwhelming majority of vision problems related to the cornea can be fixed.

Prior to founding his own private practice, Dr. David A. Goldman served as Assistant Professor of Clinical Ophthalmology at the Bascom Palmer Eye Institute in Palm Beach Gardens. Within the first of his five years of employment there, Dr. Goldman quickly became the highest volume surgeon. He has been recognized as one of the top 250 US surgeons by Premier Surgeon, as well as being awarded a Best Doctor and Top Ophthalmologist.

Dr. Goldman received his Bachelor of Arts cum laude and with distinction in all subjects from Cornell University and Doctor of Medicine with distinction in research DAVIDA. GOLDMAN from the Tufts School of Medicine. This

was followed by a medical internship at Mt. Sinai – Cabrini Medical Center in New York City. He then completed his residency and cornea fellowship at the Bascom Palmer Eye Institute in Miami, Florida. Throughout his training, he received multiple awards including 2nd place in the American College of Eye Surgeons Bloomberg memorial national cataract competition, nomination for the Ophthalmology Times writer's award program, 2006 Paul Kayser International Scholar, and the American Society of Cataract and Refractive Surgery (ASCRS) research award in 2005, 2006, and 2007. Dr. Goldman currently serves as councilor from ASCRS to the American Academy of Ophthalmology. In addition to serving

as an examiner for board certification, Dr. Goldman also serves on committees to revise maintenance of certification exams for current ophthalmologists.

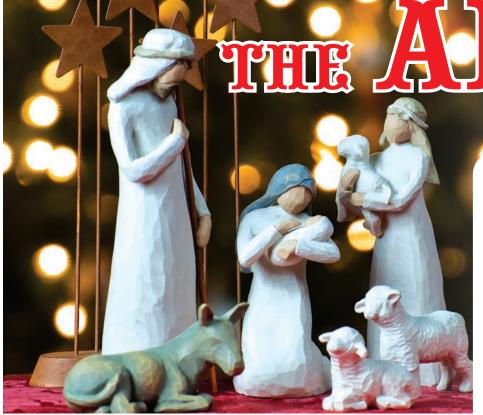

Dr. Goldman's clinical practice encompasses medical, refractive, and non-refractive surgical diseases of the cornea, anterior segment, and lens. This includes, but is not limited to, corneal transplantation, microincisional cataract surgery, and LASIK. His research interests include advances in cataract and refractive technology, dry eye management, and internet applications of ophthalmology.

Dr. Goldman speaks English and Spanish.

Spiritual) /ellness

o you ever find yourself in what seems like a hopeless situation? Is your life so hectic that you wish for just a moment of peace? Do you wish you laughed more, stopped to smell the roses, and enjoyed life more easily? Are relationships in your life broken – do you long for love?

If you answered "yes" to any of the above, then I have the answer for you. If you answered "no" then still read this article, commit it to memory, and bring it back to mind when need it.

Here is the answer: Christmas. Christmas is the season in which we can find all of the things we want (and need): hope, peace, joy, and love.

Many times Christmas is referred to as the Advent Season. In simplest terms, "advent" means "arrival". But when speaking of Christmas, what exactly has arrived?. Sure, we celebrate the arrival of a baby born to a virgin in a small village in the Middle East. The baby's name? Jesus.

But the arrival of Jesus means a lot more than just another birth. You see Christmas is the season when we celebrate the arrival of hope, peace, joy, and love because Jesus brings all those things in a relationship with Him.

We can have hope in a relationship with Jesus. No matter what may come, we anchor ourselves to the truth of Who Jesus is and what He's done for us. The Scriptures remind us of the hope Jesus brings: "The people who walked in darkness have seen a great light; those who dwelt in a land of deep darkness, on them has light shone." And we see it fulfilled: "She will bear a son, and you shall call his name Jesus, for he will save his people from their sins."

Matthew 1:21

We can know peace because of the life we can have in Him. The prophets of old wrote: "For to us a child is born, to us a son is given; and the government shall be upon his shoulder, and his name shall be called Wonderful Counselor, Mighty God, Everlasting Father, (the) Prince of Peace". Isaiah 9:6 And on the night in which Jesus was born, the angels proclaimed: "Glory to God in highest heaven, and peace on earth to those with whom God is pleased." Luke 2:14

RIVAI.

We can have joy in an abundant life in Christ. The angels also said: "Fear not, for behold, I bring you good news of great joy that will be for all the people. For unto you is born this day in the city of David a Savior, who is Christ the Lord." Luke 2:8-14

And we can experience an unconditional love that never runs out. "For God so loved the world, that he gave his only Son, that whoever believes in him should not perish but have eternal life. For God did not send his Son into the world to condemn the world, but in order that the world might be saved through him." John 3:16-17

So during this Advent Season as we celebrate The Arrival, think about all that means for us in our daily lives. As the carols play on the radio, as you see the "The Reason for the Season" bumper stickers, as you drop coins in the red buckets on the way into the store, remember that it's about Jesus and the hope, peace, joy, and love that comes in a relationship with Him.
