SENIORS AGING IN PLACE

For today's seniors, the desire to stay at home is strong. In fact, the modern elderly population is much different from its past counterparts. Almost 90% of people over 65 want to live in their home and community as long as possible, according to a report by the AARP Public Policy Institute and the National Conference of State Legislatures. A whopping 80% believe they will stay in their home for the remainder of their life. Aging in place allows seniors to enjoy all the comforts their familiar home has to offer. Today's options to support seniors in their home offer seniors and their families the peace of mind and support to make staying at home a healthy option

AGING IN PLACE PROVIDES A SENSE OF COMMUNITY

Seniors have spent a lifetime building family relationships and likely years bonding with neighbors. Removing older adults from their long-time homes can make them feel like those connections have weakened. According to research published in *The Gerontologist*, the majority of seniors want to age in place because of the attachment and familiarity they feel with their home and communities.

IT FIGHTS ISOLATION

That sense of community provided through aging in place does more than make seniors feel comfortable. It is also integral for fighting feelings of isolation, a dangerous trend among seniors. Researchers from the

University of Chicago found a link between loneliness and high blood pressure in older adults. The study authors noted that feelings of loneliness can occur even when a senior is surrounded by people. This further demonstrates the importance of the familiarity and sense of community provided through aging in place.

Besides being preferred by seniors, aging in place offers another benefit: savings.

While it may seem that aging at home would be more expensive than moving to a nursing or assisted living home, the opposite is actually true. With help from a home healthcare worker, staying in your home costs about 20% of what a nursing home costs on a monthly basis.

HOME HEALTH CARE CAN HELP

For many families and seniors, home health care is a beneficial choice—a safe and affordable solution that supports the family, while allowing seniors to stay in the comfort of their own homes and communities.

HERE ARE TEN WAYS HOME HEALTH CARE CAN SUPPORT YOU:

1. Home health care professionals can be there when needed. If family and loved ones are a distance away, home health care can give you peace of mind. Trained and qualified professionals can assess safety risks and make simple corrections in the home—from placing a rug on a slippery floor, to recommendations for ambulatory assistance.
2. Home care supports activities of daily living (ADLs). In-home services allow adults to receive day-to-day help with the personal care they need, preserving their dignity and maintaining a good quality of life. Assistance with activities of daily living can include bathing, grooming, and medication reminders.
3. Access to skilled nursing care at home. Skilled medical care can be delivered at home by thoroughly supervised nurses, certified, licensed and knowledgeable about high-technology medical equipment. Home health care can ensure that your loved one's complex medical needs are met.
4. Support with diet and nutrition. Adults age 65 and older, people with chronic conditions, and those recently discharged from a hospital or nursing facility are likely to be nutritionally at-risk. Aging, bed rest, illness, and injury can all contribute to the loss of lean body mass. Home care may include nutritional counseling and home-cooked meals to protect against malnutrition.
5. Medication management. Multiple prescriptions it can be confusing to manage. Home health care professionals can ensure the right medications are being taken at the right times to control health conditions and prevent harmful drug interactions.
6. Home health care professionals provide caring companionship. Research shows that aging adults stay healthier with social interaction. Home health aides can become trusted friends for walks, reading, cards, games, movies, meals, and other social

- activities. Accompaniment on errands such as grocery shopping, medical appointments, and other activities are also added benefits.
7. Home care helps with light household chores. When aging adults struggle the daily demands of housework, such as laundry, vacuuming, dishes, and simple chores home care helps to consistently maintain a safe and healthy living environment.
 8. Home health care clients have comparable or better health outcomes. Research has shown that clinical results are comparable or better with fewer complications when home care is provided to individuals with chronic conditions such as pneumonia, diabetes, or COPD
 9. One-on-one focus and support. Home health care services are truly unique, providing meaningful, one-on-one personal and skilled care that builds strong bonds between professionals and their clients. According to the Cleveland Clinical Journal a person who is seen by a clinician in the comfort of home more readily trusts that the health care team places their needs first.

10. An affordable alternative to facility or hospital care. According to the National Association of Home Care, the average cost of care from a skilled nursing facility is \$544 dollars per day, while the average cost of home health care is \$132 dollars.

OUR PROMISE

Through Trusted HomeCare Home Care Services, you can rest assured that your loved one and family will be safe and secure in a positive environment right at their home. Even if you simply have questions or want to understand how to better care for your elderly loved one experiencing the inevitable process of aging, we are able to help with that.

Declare Your Independence from Hair Loss

by Alan J. Bauman, MD, ABHRS

If you're like many of the men I see, you may not realize that thanks to advances in science and medicine there are numerous effective options for hair loss that are much, much better than anything you'll find in a drugstore or barber shop or touted in an infomercial.

As a nod to July, the month when we celebrate independence, why not join the growing army of men who've freed themselves from the tyranny of balding imposed on them by the rule of their genetics; men who are now pursuing happiness with a full head of healthy, youthful-looking hair that's there to stay.

Losing hair presents a dilemma for lots of men. Ignore what's happening and "live with it" or flounder around for a solution and be constantly on the march to adapt to their head's ever-shifting geography.

Maybe you've tried some of these remedies?

- Shaved your head
- Got a buzz cut
- Perfected your comb-over
- Slicked your hair back with "product"
- Sprayed on artificial hair fibers or pigment

The problem is that these remedies are all temporary and—let's face it—they don't fool anyone.

Am I right?

Tell me if I'm right: You've been worrying about your hair loss for a long time. You've been wondering what could be done, if anything. It's kicking your self-confidence in the butt. You think a transplant is your only recourse. And you're too embarrassed to make that call to a hair restoration doctor to even ask.

...but did you know there are several very powerful non-transplant options you may not have heard of that can give you the freedom to have more hair on your head than you ever dreamed possible?

Read on. I think you'll be pleasantly surprised.

Low-Level LaserCaps

Bauman's low-level LaserCaps—we offer five of them—are drug-free, chemical-free, non-invasive, FDA-cleared, and scientifically proven to improve the

appearance of hair quality, strength, and thickness of thinning hair and to stimulate measurable and visible hair growth.

And another plus: they can be used at home on your schedule.

Proper and consistent use of medical-grade low-level laser light therapy has been scientifically proven to improve hair quality, strength, and thickness, as well as promote hair regrowth.

Our newest and most high-tech LaserCap, the Bauman TURBO LaserCap™, is especially popular. Here's why:

- Usage requires just five minutes per day.
- Its >300 high-quality laser diodes deliver more energy and power to 25% more area of the scalp than any other portable hands-free laser hair regrowth device on the market.
- It's easy to travel with. Its flexible spine lets you fold it flat.
- It has a long battery life, requiring fewer recharges.
- It's adjustable for a perfect fit for you and someone else you'd like to share it with.
- It has a lifetime warranty.

PRP (Platelet-Rich Plasma)

PRP is a comfortable in-office procedure requiring no recovery, downtime, or significant risk. With our methods, which use 10-12 billion platelets per treatment, you can expect hair growth improvements from a single treatment that last a year or more.

Derived from a small sample of your blood, platelets and plasma are separated from other components of the blood, concentrated, then applied into the scalp under local anesthesia to invigorate weak hair follicles.

PDOgro™

Researched and developed right here at Bauman Medical, we were the first hair restoration clinic in the U.S. to use PDO threads to enhance hair growth. PDO, or polydioxanone, is a synthetic, absorbable FDA-cleared material.

Used for decades in surgery, and more recently in aesthetic procedures to reverse the appearance of skin aging, PDO threads placed into the scalp stimulate hair regrowth. This procedure is typically performed

Before and 12 months after PRP by Dr. Alan Bauman

Before and after FUE Hair Transplant by Dr. Alan Bauman

in combination with PRP. Hidden under the skin, the threads dissolve and are absorbed over time, stimulating collagen production, new blood vessel formation, and a release of powerful rejuvenating growth factors.

TED (TransEpidermal Delivery)

TED is ideal for people averse to surgery or having their blood drawn. It's *needle-free, pain-free, requires no anesthesia of any kind*, and is highly effective, especially for people with early androgenic alopecia (male pattern hair loss).

It involves massaging a specialized topical hair growth serum into your scalp, assisted by ultrasonic sound waves and air pressure. The process gently enhances the penetration of the serum into the scalp by temporarily increasing scalp permeability. At the same time, increased blood flow optimizes scalp health and stimulates hair follicles to produce thicker, stronger, healthier hair. This FDA-cleared Class 1 medical device is clinically proven to quickly start minimizing shedding

and improve hair growth and scalp health. TED can also be used to apply Exosome Therapy topically, as well as deliver medications such as finasteride and dutasteride to the scalp.

Hair Transplantation

Alas, in some cases, hair loss is so advanced that a hair transplant is the only way to achieve lasting hair regrowth in areas like a receded hairline, thinning crown, or other areas where hair follicles are severely depleted or gone. *But you won't know that for sure until you've had a consultation.*

The good news is that transplant procedures have become more effective, comfortable, and are 100% natural-looking due to major innovations in techniques and technology.

FUE (follicular unit extraction) is one of Bauman Medical's most

popular hair restoration technologies. Using a variety of techniques that we helped pioneer over a decade ago, we employ several types of FUE, depending on each patient's particular need or situation.

Using robotics, or with the aid of mechanical instruments, we harvest hair follicles directly from the scalp, replacing the older, invasive method of "strip harvesting." FUE hair transplantation allows for the minimally-invasive harvesting of follicles without leaving behind a telltale linear scar and with the added benefits of a shorter, less restricted, and more comfortable recovery.

Learn more

Ready to declare your independence from hair loss? It's easy to get started. Take a minute to call us at **561-220-3480** to schedule your in-person or remote consultation, point your camera at the QR code below, or visit us at **www.BaumanMedical.com**.

About Dr. Alan J. Bauman

Alan J. Bauman, MD, ABHRS, IAHRs Hair Loss Expert

With over 25 years of specialization in hair restoration, he offers an impressive array of state-of-the-art technologies, including proprietary hair restoration procedures, low-level laser light therapy, customized hair growth medications, supplements, and other modalities that produce excellent results. Thanks to his many tools, you may not even need a transplant!

Dr. Bauman's "Hair Hospital," housed in a dedicated 12,000-square-foot building, is recognized as one of the premier hair restoration practices in the country.

As one of approximately 250 physicians worldwide to achieve board certification from the American Board of Hair Restoration Surgery (ABHRS), Dr. Bauman has treated over 33,000 patients. He's also a pioneer in numerous technologies in the field of hair restoration, both for diagnostics and treatment.

In recognition of his expertise, Dr. Bauman was voted "#1 Top Hair Restoration Surgeon" in North America by Aesthetic Everything for the 7th consecutive year, "Top Hair Restoration Surgeon of the Decade", and received the 2022 "Lifetime Achievement Award in Hair Restoration."

Forbes magazine recognized him as one of "10 CEOs Transforming Healthcare in America" for bringing restorative hair treatment into the mainstream and pioneering robotic technologies.

Dr. Bauman is a sought-after guest expert at international scientific meetings and live surgery workshops, and a frequent expert source on national news and educational shows.

ADVANCED TREATMENTS. EXCEPTIONAL RESULTS.
THE ULTIMATE HAIR RESTORATION EXPERIENCE.

Hair Restoration for Men and Women

www.BaumanMedical.com
561-220-3480

Why Choose Bauman Medical? Experience the Difference

The demand for hair restoration services has grown significantly in recent years, leading to an increase in the number of medical professionals offering hair transplant services. While some dermatologists, plastic surgeons, and other medical professionals have received specialized training to offer hair restoration services, for many doctors, it's a sideline. Therefore they may have limited experience and may provide only minimal hair regrowth options beyond transplantation, and most don't even bother to accurately measure and track their patients hair growth.

SILHOUETTE INSTALIFT™

A GAME CHANGER FOR NON-SURGICAL FACIAL CONTOURING AND BODY CONTOURING

LOOKING FOR A NATURAL LOOKING WAY TO COMBAT SAGGING SKIN WITHOUT SURGERY? CONSIDER THE SILHOUETTE INSTALIFT™.

More and more patients prefer to avoid or at least postpone surgery, or simply are not a candidate for surgery due to medical reasons. This is a good alternative for those patients.

First let's discuss what aging really is in order to understand how we can combat it effectively. Aging consists of volume loss and sagging skin. If we want to "naturally" rejuvenate our face and body we need to address both these issues. The Silhouette Instalift™ is the only non-surgical procedure that addresses both issues.

This Silhouette technology is in a class of its own, it's not a filler and it's not your typical thread. It is both, "dual action" means it lifts and volumizes at the same time. It is an advanced micro-suspension technology that uses small (3D) 360 degree cones made from PLLA (also known as "Sculptra") to simultaneously lift skin and build collagen. The lifting effect is immediate while collagen production is gradual and peaks at about 8-12 weeks.

After the patient's needs are assessed, and the entry points are marked, a local anesthetic is injected and the sutures are placed. There is very little discomfort during and after the treatment.

Once the sutures are placed, the skin will be repositioned to obtain the desired lifting effect. The ends of the suture are then cut. The number of sutures applied depends on each individual patient's skin elasticity and condition of the skin. Possible side effects are, as with any procedure that involves needles, bruising and minor pain and swelling. This is an office procedure that takes about 45 minutes and lasts about 18-24 months. The Silhouette Instalift™ was FDA approved in April 2018 for use in the mid-face and was awarded the prestigious 2018 New Beauty Magazine breakthrough award. It has been popular in both South America and Europe for many years.

Silhouette Instalift™ now has different sutures with varying numbers of cones, depending on where on the body it is being used. The 8 cone suture is used on the face, whereas the 12 and 16 cone sutures can be used to lift butts, saggy skin above the knees, elbows and saggy belly skin. It also works well for cellulite.

Why choose Silhouette Instalift™?

- Non-surgical procedure
- Minimally invasive
- Minimal recovery time/no down time
- Immediate lifting effects
- Volumizing in addition to lifting effects due to PLLA collagen stimulation
- Sutures are entirely re-absorbable
- Natural looking

I am so excited to be able to perform this procedure right here in my office. Call today to see if you are a candidate for the Silhouette Instalift™. MD Beauty Labs (561) 655-6325.

Medical Director, Daniela Dadurian M.D.
 * Board Certified Anti-Aging Medicine
 * Board Certified Laser Surgery

Daniela Dadurian, M.D. received her medical degree from the University of Miami School of Medicine. She is certified by the Board of Anti-Aging & Regenerative Medicine and the Board of Laser Surgery. Enjoy a Spontaneous Sex Life Again – Heal at the speed of LIGHT & SOUND Rekindle the Spark!

**NEW 1st-of-its-kind potential cure for
Erectile Dysfunction & Peyronie's combining Shockwave & Laser
over 95% Success**

**SIMPLY MEN'S HEALTH IS QUICKLY GRABBING ATTENTION AS BOCA RATON'S #1
MEN'S SEXUAL HEALTH CLINIC & LEADER IN THE FIELD.**

In 2015, Dr. Joan Katz, a Harvard-trained physician and owner of Simply Men's Health was the first to introduce ED shockwave and revolutionized the treatment of ED with RejuvaWAVE®.

And now again in 2023, Dr. Katz introduces the game-changing RejuvaWAVE Multi-Wave ShockwaveSM. This shockwave treatment is the first-of-its-kind therapy combining both Radial and Focused waves along with Photobiomodulation LASER to boost the success rate to over 95% curing ED and Peyronie's Disease. In addition to treating ED and Peyronies, it enhances performance and reverses the inevitable aging process. Turn back the clock and Men of all ages can once again enjoy the spontaneous, active sex life they enjoyed in their youth.

ATTENTION MEN! NOT ALL ED SHOCKWAVE IS THE SAME

Since Simply Men's Health pioneered the new standard of care with RejuvaWAVE®, many clinics have popped up offering different versions of shockwave. However, not all ED shockwave treatments are the same. Unfortunately, many men have sought treatment at franchise operations gone, often not owned by physicians, and have been disappointed. Some have even paid thousands of dollars to franchises touting 1000's of procedures performed and got little to no results. We know the genuine RejuvaWAVE® protocol works and we want you to experience the difference Risk Free!

If you have tried shockwave treatment at another clinic, Simply Men's Health wants you to experience for yourself the genuine RejuvaWAVE® DIFFERENCE performed by our highly trained and certified technicians: Call Simply Men's Health and get one FREE session – absolutely NO obligation – No fee – No purchase! Judge for yourself as Jeff, one of many of our happy patients states:

"I've come to Simply Men's Health. I had gone to a previous place... this one is the REAL deal. Absolutely a completely different procedure. Everything is much better. The procedure working the first time. Completely satisfied."

HOW DOES REJUVAWAVE MULTI-WAVE SHOCKWAVE DIFFER FROM OTHER SHOCKWAVE THERAPIES?

The NEW RejuvaWAVE Multi-Wave ShockwaveSM protocol distinguishes itself from all others by our proprietary multi-modality protocol, the RejuvaWAVE® application technique combining both Radial and Focused waves using the state-of-the art Storz medical device. As a result, RejuvaWAVE Multi-Wave ShockwaveSM treats the root cause of the problem, not just the symptoms. This multi-wave shock-wave treatment has over a 95% success rate curing ED and Peyronie's.

WHAT ARE THE BENEFITS OF REJUVAWAVE MULTI WAVE SHOCKWAVE SM?

RejuvaWAVE Multi Wave ShockwaveSM NATURALLY restores spontaneous sexual function, gives you harder and longer lasting erections, and increases penile sensation

- **100% SAFE and Non-invasive**
- **Drug Free, Needle Free, Pain Free**
- **No downtime, No side effects**
- **Activates your body's own stem cells and healing power**
- **Stimulates cellular metabolism and ATP production**
- **Promotes tissue regeneration**
- **Dissolves micro-plaque in blood vessels restoring blood flow**
- **Stimulates growth of new blood vessels increasing blood flow**
- **Breaks up scar tissue decreasing the curvature of Peyronie's Disease**
- **Stimulates regeneration of nerve tissue improving sensation and pleasure**
- **Promotes natural growth in penis size and girth**
- **Improves sexual performance**
- **Over 95% patient satisfaction**

WHAT IS REJUVAWAVE® MULTI-WAVE SHOCKWAVE PROTOCOL?

both Focused and Radial waves stimulates cellular metabolism, enhances blood circulation, and stimulates the growth of new blood vessels and nerves in the treated areas. In addition, Cold Laser accelerates healing and potentiates the effects of RejuvaWAVE®. shockwave treatment.

Unlike pills which lose effectiveness over time, our treatment heals damaged tissue and reverses the hands of time, helping men return to their younger, healthier selves and enabling men to enjoy a spontaneous sex life again. The results have been nothing short of amazing!

"I haven't been able to get an erection in 5 years... After several visits I noticed improvements. After a couple of months, I was able to have a spontaneous sex life again. You gave me my life back." – Bob M.

HOW TO EXPERIENCE THE REJUVAWAVE® DIFFERENCE

Pick up the phone ONE CALL can change your life! We respect your time and privacy.

Each client receives individualized care from our experienced staff of physicians.

EVERYTHING YOU WANTED TO KNOW ABOUT EARWAX (but were afraid to ask)

Why do we produce earwax? Why do some people develop more than others? Why? Let's try to answer some questions.

What is earwax?

Earwax, known medically as cerumen, is a naturally occurring sticky substance made up of oil and sweat, mixed with dirt and dead skin cells.

Earwax is natural and helpful

- Earwax is a natural barrier that prevents dirt and bacteria from entering the deeper end of the ear canal. Because it is sticky, it is able to collect microscopic debris that can cause infections.
- Earwax acts a moisturizer and protective coating of the ear canal. Without wax, your ear canal can become irritated and itchy, which can lead to an outer ear infection.
- Surprisingly, earwax acts as an insect repellent. The smell of earwax keeps bugs out of your ears. The stickiness of earwax traps any bugs that might have a bad sense of smell.

Why cleaning your ear canals daily is not necessary

Contrary to popular belief, we do not need to clean our ears with cotton swabs. Keep cotton swabs, paper clips, fingers etc out of your ears. An ear that is too clean is susceptible to infections and to wax impactions.

However, hearing aid users do need to clean their ears periodically. Earwax is the most common reason why a hearing aid will stop working. Please consult with your hearing care professional for advice on your particular needs.

What to do if you have impacted wax?

- Buy an over-the-counter ear cleaning kit from the pharmacy; however, if you are prone to ear infections or you have PE tubes, see your physician before trying any over-the-counter products.
- Do not use cotton swabs (Q-tips), paperclip or any other device you have lying around. This only pushes the wax further down into the ear canal which can impact on the eardrum or worse, puncture the eardrum.
- Do not try ear candling. Besides not being effective, people have experienced burning from the candle, furthering of the impaction, and puncturing of the eardrum.
- If you are not sure what to do, see your Physician or Audiologist for a professional cleaning. Your hearing care professional can look in your ears to determine if the wax needs to be removed or if it is not an issue.

Summer Fundraiser

We are taking ticket orders for the Summer Fundraiser!
The drawing will be August 4, 2023.

Grand Prize: a new set of Phonak Slim premium hearing aids

2nd Prize: TV transmitter

3rd Prize: \$50.00 cash

Tickets are \$5.00 apiece.

We take your hearing needs to heart

What your earwax says about you

Wet or dry?

Wet earwax is more common in Caucasian and Africans.

Dry earwax is more common among Native Americans, Pacific Islanders and Asians.

What color is it?

Dark brown or black colored earwax is typically older, so its color comes from the dirt and bacteria it has trapped. Adults are more likely to have this kind.

Light brown, orange or yellow earwax is healthy and normal. Children tend to have softer, lighter-colored earwax.

Dark brown earwax that is tinged with red may signal a bleeding injury.

White, flaky earwax indicates you lack a chemical associated with body odor.

Super producers

Stress and exercise can increase earwax production. Excess earwax is more common in people:

- with a lot of hair in their ear canals.
- who suffer from chronic ear infections.
- who have abnormally-formed ear canals or osteomata.
- who are elderly, have certain skin conditions or certain learning disabilities

A wide range of normal

For the most part, your ears are self-cleaning. Never insert an object in your ear, including a cotton swab, to remove earwax.

Hearing aids can sometimes get clogged with earwax. Over-the-counter ear cleaning kits and wax guards can help.

Laser Treatment Replaces Gum Surgery

If you've been diagnosed with periodontal (gum) disease, you're not alone. Nearly 80 percent of us have periodontal disease in our lifetime. Sometimes surgery is recommended to save teeth and restore oral health. Now, there's an easier option.

Valerie, actual patient

Introducing LANAP

For decades patients with periodontal disease endured gum pocket reduction surgery. While results are typically good with this surgery, it can be painful, and recovery takes weeks.

Today, there is Laser Assisted New Attachment Procedure or LANAP. LANAP's results mimic gum pocket reduction surgery but without the scalpels and sutures. LANAP patients experience little to no pain. Downtime is a few hours, not days or weeks.

How LANAP Works

The LANAP treatment is a two-step process. During your LANAP visit you rest comfortably. You won't feel a thing.

To begin, we measure the depth your gum pockets. This helps us create a precise treatment protocol, designed specifically for you. Then, we use LANAP technology.

The first pass with the LANAP laser removes harmful bacteria from the pockets of your gums. It's a gentle, yet effective approach with a high success rate for eliminating gum disease.

Second, we change the LANAP laser setting to stimulate healing. On this setting, LANAP speeds gum tissue regeneration for improved oral health.

Better for Your Health

Treating gum is beneficial to your whole body. This is because untreated gum disease increases your risk for a heart attack and heart disease, hypertension, and complications from diabetes.

We Care About You

Every visit to our specialty practice begins with a conversation about you. Your health needs, concerns, and desires for a great-looking outcome matter here.

- We talk and learn about you.
- Review your health history and desired outcome.
- Together we build a treatment plan for your health and appearance.

Dr. Cohen's gentle touch, friendly chairside manner, and consistent follow up get rave reviews.

We Care a Lot

From your first phone call to your last check up, it's all about you. Every visit begins with a conversation. Your unique needs, concerns, and desires for care matter to us.

- Together we review your health history.
- Discuss goals for your health and appearance.
- Make a treatment plan that meets your needs and budget.

We care for you like you are part of our family. Our team keeps everyone in your care circle up to date, and we check in to make sure you feel good once treatment is complete.

Welcome to Great Care

You want a doctor with impeccable credentials and great communication skills. Dr. Cohen's gentle touch, friendly chairside manner, and follow up communication garner rave reviews.

About

Dr. Lee R. Cohen

Dr. Lee R. Cohen, D.D.S., M.S., M.S. is a dual-board certified periodontal and dental implant surgeon.

- NYU, Doctor of Dental Surgery; Management
- University of Florida, Master's of Science in
- Periodontology, served as chief resident
- Emory University, Bachelor's in Biology

ACCIDENTS HAPPEN, LONG-TERM EFFECTS DON'T HAVE TO

Chiropractic care, massage and physical therapy has, for decades, been the optimal course of treatment for soft-tissue injuries most commonly related to auto accidents. Cervical sprain/strain injuries, known also as whiplash, are effectively and non-surgically addressed by chiropractic care. Mid and low back pain, which often surfaces several weeks after an accident, can be alleviated with adjustment and realignment of the spine. Resolving spine and neck injuries through a comprehensive treatment plan can also help prevent serious long-term structural issues like post traumatic osteoarthritis.

What's troubling about soft tissue injuries is that patients frequently do not immediately realize the

extent to which they are injured. First thoughts are usually about how to get the car repaired and how to get to work tomorrow morning. Headaches, tingling, increasing tightness, stiff neck, reduced range of motion and neck or back pain are put on the to-do list after the "important" things are handled. Indeed, many who have discovered the chiropractic lifestyle have done so as a result of lingering pain and unresolved issues from car crash.

Today, getting your body checked out must be on the top of the list after an accident. We all pay our auto insurance premiums. Now to protect the coverage that you have paid for, be aware that you must take action within 14 days of the loss date. **In other words, in order to take advantage of the coverage you have paid for**

through your insurance, you must be assessed within 14 days of the accident.

Even minor fender benders can create trauma to the neck, spine and/or connective tissues. These effects may not be felt or understood for weeks or months after the accident. Seeking immediate assessment after an accident and treatment, if necessary, will greatly reduce the likelihood of long-term and/or deteriorating back, neck and spine problems.

In the unfortunate instance that you or a friend or family member has been in an automobile accident, don't delay and have a full spinal exam and check up at Cobblestone Spine & Joint immediately. We can help walk you through recovery.

OUR NONSURGICAL TREATMENT IS:

NON INVASIVE
Therefore there is no risk of infection.

NO RECOVERY TIME
No down time from normal activities.

ALL NATURAL
Completely natural process for peace of mind.

DRUG FREE
No drugs used at all through the process.

THE CORNEA

By David A. Goldman MD

Although people may have heard the word ‘cornea’ in reference to the eye, many are unaware of what it really refers to. While diseases such as glaucoma and macular degeneration affect the back of the eye, the cornea is in the front of the eye.

In fact, the cornea is the most anterior structure of the eye. It is the clear part responsible for much of the focusing of light waves which enter the eye. When patients place contact lenses on their eye, they are placing them on their corneas. When patients develop an abrasion (scratch) or infectious ulcer of the eye, it is typically in the cornea.

The cornea consists of several layers, but it is simplest to break it down into three: epithelium,

stroma, and endothelium. The epithelium is the superficial outer layer of cells. When a scratch occurs on the cornea, the epithelium acts quickly to fill in the scratch. In cases of severe dry eye, tiny dried out “holes” can also appear in the epithelium.

The stroma is the central portion of the cornea, and comprises the bulk of it. It provides the majority of structural support to the cornea. When patients undergo LASIK surgery, it is the stroma that is affected. In LASIK, a laser creates a flap within the stroma. That flap is then lifted and a laser then reshapes the cornea under the flap. For patients who are myopic (nearsighted), the laser flattens the center of the cornea. For patients who are hyperopic (farsighted), the laser removes tissue in a circular pattern to steepen the cornea. The endothelium is

the most posterior layer of the cornea. Consisting of a layer of cells, these endothelial cells work as microscopic pumps to pump fluid out of the cornea to keep it clear. As we age the number of endothelial cells decline. Typically this is asymptomatic. In conditions such as Fuchs Dystrophy, however, patients are born with a lower number of endothelial cells and at some point may require surgery. Fortunately, the surgical options have improved greatly – less than ten years ago a new procedure was developed called DSAEK. In the past, corneal swelling which did not respond to topical eye drops required a full thickness corneal transplant. With the DSAEK procedure, solely the posterior layer of cells is transplanted. With this newer technique, vision can be restored in weeks instead of months.

This is not to say that a full thickness corneal transplant does not have its place in eye care. Conditions such as keratoconus, where the cornea becomes irregularly cone shaped, and scars of the cornea can significantly limit visual acuity. In these cases, replacing all layers of the cornea can work well to restore vision. In many cases, laser vision correction can be performed over a corneal transplant so that the patient can see well without glasses.

While problems of the cornea, whether inherited or environmental, can significantly disturb vision, there are multiple procedures available to improve vision. As opposed to posterior eye pathology such as glaucoma and macular degeneration, the overwhelming majority of vision problems related to the cornea can be fixed.

DAVID A. GOLDMAN

Prior to founding his own private practice, Dr. David A. Goldman served as Assistant Professor of Clinical Ophthalmology at the Bascom Palmer Eye Institute in Palm Beach Gardens. Within the first of his five years of employment there, Dr. Goldman quickly became the highest volume surgeon. He has been recognized as one of the top 250 US surgeons by Premier Surgeon, as well as being awarded a Best Doctor and Top Ophthalmologist.

Dr. Goldman received his Bachelor of Arts cum laude and with distinction in all subjects from Cornell University and Doctor of Medicine with distinction in research from the Tufts School of Medicine. This

was followed by a medical internship at Mt. Sinai – Cabrini Medical Center in New York City. He then completed his residency and cornea fellowship at the Bascom Palmer Eye Institute in Miami, Florida. Throughout his training, he received multiple awards including 2nd place in the American College of Eye Surgeons Bloomberg memorial national cataract competition, nomination for the Ophthalmology Times writer’s award program, 2006 Paul Kayser International Scholar, and the American Society of Cataract and Refractive Surgery (ASCRS) research award in 2005, 2006, and 2007. Dr. Goldman currently serves as councilor from ASCRS to the American Academy of Ophthalmology. In addition to serving

as an examiner for board certification, Dr. Goldman also serves on committees to revise maintenance of certification exams for current ophthalmologists.

Dr. Goldman’s clinical practice encompasses medical, refractive, and non-refractive surgical diseases of the cornea, anterior segment, and lens. This includes, but is not limited to, corneal transplantation, microincisional cataract surgery, and LASIK. His research interests include advances in cataract and refractive technology, dry eye management, and internet applications of ophthalmology.

Dr. Goldman speaks English and Spanish.

IT'S HOT EVERYWHERE IN JULY

Brent Myers

Have you noticed that Summer has arrived? If you haven't, just wait, you will. This is how I can usually tell that our wonderful south Florida Summer has come: when I bathe, get dressed, walk outside the house thirty feet to my car and when I get in – I feel like someone has rubbed a glazed doughnut all over my face.

Is it just me? I doubt it.

But don't misunderstand my description for complaining. Several years ago I learned a very valuable lesson that has had a profound spiritual impact on my life. There was a July Summer day that I was grumbling about how hot and humid it was and wondering aloud how nice it must be in another part of the country. At that moment, a wise man looked at me and said, "Brent... it's hot *everywhere* in July."

Wow!! Simple, but so true!

He wasn't providing a meteorological analysis of the climate zones of the United States, but instead he was telling me: "Be content."

Too many times in our lives we look at our circumstances and wish things were better – or at least different. But spiritually speaking, we need to learn to be content with the life that God has given us – even if it stinks (for right now.)

St. Paul wrote these words: *"I am not saying this because I am in need, for I have learned to be content whatever the circumstances. I know what it is to be in need, and I know what it is to have plenty. I have learned the secret of being content in any and every situation, whether well fed or hungry, whether living in plenty or in want."* (Philippians 4:11-12)

Paul was sharing the reality of his life – that he had learned to be content. Whether he was poor or rich – regardless of the circumstances of his life – he was content. Oh, and just for a frame of reference... Paul wrote these words while in prison in ancient Rome!

But before we say to ourselves, "Well, that was the great St. Paul and I could never do that." Let's read a bit further: *"I can do all this through him who gives me strength."* (Philippians 4:13) Do you see that?! Paul couldn't do it on his own either!! He understood that his contentment in life – even in prison – came because Jesus Christ enabled him to deal with it.

So the next time life gives you a bad turn or the next time you find yourself complaining... seek to be content. Try to find the reality of the situation you are in – that God is doing something for a bigger purpose than yourself and He will get you through it. Learn to be content.

Socrates is credited with saying: "He who is not contented with what he has, would not be contented with what he would like to have."

Why? Because it's hot everywhere in July.
