We convert your tub to a walk in shower in just one day. No plumbing or demolition. Little to no disruption. A simple shower curtain, the same used on a shower stall, stops any water concerns. Shower doors optional.

It's Like Having A Walk In Shower Without The Cost!

We create the opening that fits your needs. Unlike a cap system, The TubcuT® adapts to you. With our exclusive process, you dictate where we create the opening, how wide and how low, typically just 4" off the floor.

The TubcuT® System is 100% REVERSIBLE

If you sell your home we can reverse The TubcuT® back to a regular tub again, just like brand new! The removed section of the tub can be replaced restoring it to original condition. Save thousands on resale!

Talk Turkey and Your Family's Health History This Thanksgiving

Thanksgiving is traditionally a time to gather with loved ones, express gratitude and enjoy a festive meal. This year, November 28 is also designated as National Family Health History Day. The U.S. surgeon general encourages families to take advantage of this time together to talk about health issues that may run in the family.

Knowing one's family medical history can help in the prevention and early detection of hereditary diseases. By sharing and recording this information, individuals can better understand their potential risks for certain diseases, including cancer, heart disease, diabetes and other conditions that have genetic components.

Genetics and cancer risk

About 5 to 10 percent of cancers are linked to mutations in specific genes that we inherit from our birth parents. In fact, the five most common types of cancer diagnosed in the U.S. are known to have a genetic component. These are melanoma (a form of skin cancer), breast, colorectal, prostate and lung cancers.

Consider skin cancer, for example. People with a first-degree relative who has been diagnosed with melanoma or other types of skin cancer have a 50 percent higher chance of developing it than someone without a family history. A first-degree relative includes your biological parents, siblings and children, who share about 50 percent of your DNA.

Breast cancer is the second most common cancer in American women, representing approximately 30 percent of all new cancer diagnoses among women each year. And although it's rare, men get breast cancer, too.

Mutations that occur in the BRCA1 and BRCA2 genes can significantly increase the risk of breast as well as ovarian cancer. People with a strong family history of breast cancer, especially if it occurs at a young age or in multiple relatives, may carry one of these genetic mutations.

While having a genetic mutation does not guarantee that a person will develop cancer, it does increase the risk.

Genetic counseling and genetic DNA testing are a proactive approach to understanding your health risks and may be recommended for individuals with a family history associated with known genetic mutations.

If someone knows they have inherited a harmful genetic change, they can take steps to reduce their risk of developing cancer or to detect cancer early. Genetic testing can also be appropriate for people who have been diagnosed with cancer. The information may be important for selecting treatment.

Anyone who is concerned that they may have inherited a harmful genetic change should talk with their health care provider.

Genetic counseling will include a discussion of the implications of testing so that someone can give informed consent to the process. Before having testing, people should discuss both the benefits and the possible downsides of genetic testing.

The importance of lifestyle factors

It's important to remember, however, that the majority of cancers arise due to a combination of factors, including environmental exposures (such as smoking or radiation) and spontaneous genetic mutations that occur during a person's life.

There are ways to reduce cancer risk:

- Protect your skin from harmful UV rays from the sun and other sources.
- Don't smoke. The carcinogens in tobacco can damage nearly every organ in the body, increasing risk for cancer and other diseases.
- Maintain a diet high in fruits, vegetables, beans and whole grains and low in red meat, processed foods and sugar.
- Limit alcohol consumption.
- Aim for at least 30 minutes of physical activity daily to help control your weight and avoid obesity and give a healthy boost to your immune system.
- Stay current with screenings. Generally, when cancer is detected in its early stages, treatment is less extensive, outcomes are improved and recovery is faster. Screenings are safe, effective and vital. Talk with your primary health care provider to make the best personal decisions about your health status, the benefits and any risks of testing, and how often you should be screened.

What's your family health portrait?

The U.S. Department of Health and Human Services offers tools like the "My Family Health Portrait," which helps families collect and organize their health information and learn more about the risk for conditions that can run in families.

This holiday season, be sure to pass the pie, along with some details of your family's health history.

THANKS... For *GIVING* Back My Hair

Make the Pilgrimage Down to Bauman Medical This November

by Alan J. Bauman, MD, ABHRS

With all of the Christmas decorations already on display at the store, we tend to neglect the season of thanks. While gift-giving is right around the corner, let's slow it down a bit and celebrate Thanksgiving the Bauman Medical way – by giving thanks to the state-of-the-art hair restoration treatments and diagnostic tools available to all our patients.

And let's face it, as much as we love coming together for a family gathering, Thanksgiving and beyond can be quite a stressful time. With hair loss already serving as a potential stressor in life, our team at Bauman Medical wants to limit as much tension in your life as possible, making us the place to be ahead of Turkey Day.

So before you put the bird in the oven and start mashing those potatoes, let's take a moment to share our thanks for the numerous methods that will have your hair looking as full as your belly this Thanksgiving.

DIAGNOSTIC TOOLS

HairCheck

After you put the turkey in the oven, it's important to check on it periodically. This is similar to our intuitive HairCheck. With the HairCheck, we'll be able to determine your exact hair density quicker than your guests getting up for seconds. With these noninvasive standardized hair bundle measurements, we can compare your affected areas to the more permanent zones. HairCheck is the perfect way to ensure your treatment plan works where needed. It might not be the best in the kitchen, but I know the perfect recipe for effective hair restoration.

HairMetrix

When it comes to Thanksgiving, you can always expect a few interesting conversations to pop up at the dinner table. With AI becoming a huge trend, you can guarantee that it'll be a popular talking point, making HairMetrix a timely tool for your diagnostic evaluations and tracking. Our innovative AI-powered algorithm turns microscopic scalp photos into exact data on the state of your hair quality and quantity. As a result, HairMetrix helps us with precise diagnosis and create the perfect treatment plan for your specific needs. And no matter what stage of the treatment you're in, we continue to monitor your scalp, allowing us to adapt when needed for optimal results.

Before and 6 months after using the Bauman TURBO LaserCap

Before and after FUE Hair Transplant by Dr. Alan Bauman

About Dr. Alan J. Bauman

Alan J. Bauman, MD, ABHRS, IAHRs Hair Loss Expert

With over 27 years of specialization in hair restoration, he offers an impressive array of state-of-the-art technologies, including proprietary hair restoration procedures, low-level laser light therapy, customized hair growth medications, supplements, and other modalities that produce excellent results. Thanks to his many tools, you may not even need a transplant!

Dr. Bauman's "Hair Hospital," housed in a dedicated 12,000-square-foot building, is recognized as one of the premier hair restoration practices in the country.

As one of approximately 250 physicians worldwide to achieve board certification from the American Board of Hair Restoration Surgery (ABHRS), Dr. Bauman has treated over 34,000 patients. He's also a pioneer in numerous technologies in the field of hair restoration, both for diagnostics and treatment.

In recognition of his expertise, Dr. Bauman was voted "#1 Top Hair Restoration Surgeon" in North America by Aesthetic Everything for the 8th consecutive year, "Top Hair Restoration Surgeon of the Decade", and received the 2022 "Lifetime Achievement Award in Hair Restoration."

Forbes magazine recognized him as one of "10 CEOs Transforming Healthcare in America" for bringing restorative hair treatment into the mainstream and pioneering robotic technologies.

Dr. Bauman is a sought-after guest expert at international scientific meetings and live surgery workshops, and a frequent expert source on national news and educational shows.

Trichotest

Much like how we're bound to unbutton our jeans after stuffing ourselves to the brim, the TrichoTest unzips your other "genes." After a quick swab of your cheek, our team can find the best treatment protocol for your needs. Since Trichotest analyzes your unique DNA, we now can analyze and examine your metabolic pathways. These pathways could be the culprit behind your hair loss while also offering insight into how you'll respond to certain hair loss medications, saving you time and money. So don't be afraid to unzip your genes a little bit before turkey day.

HAIR RESTORATION

FUE

When it comes to hair transplants, we can all be thankful for the advancements from the days of pluggy-looking and painful results. The only thing sweeter than a slice of pumpkin pie is the state-of-the-art Bauman FUE (Follicular Unit Extraction) Hair Transplant. With these developments, we can leave the carving for the turkey and, instead, simply harvest grafts with as little as one hair follicle from your scalp. FUE is a much different process compared to the traditional FUT strip harvesting method, delivering you a quicker, more comfortable recovery. And thanks to a little help from our specialized mechanical instrument, you'll walk out of our clinic to Thanksgiving dinner with no linear scar to worry about.

And for those who want to take it a step further, you can opt for the VIP|FUE method and be thankful for not needing to shave the donor area and change your hairstyle ahead of the procedure. You want to talk about discreet? VIP|FUE is the way to go.

TED & Exosome Therapy

Keeping the thanks going, anytime you can avoid needles for a procedure, thanks are in order. With our pairing of TransEpidermal Delivery (TED) and Exosomes, we can express gratitude, all while bringing back your hair in no time. A trending topic in the realm of regenerative

medicine, Exosomes are the backbone for all things involving cellular communication. Just like we chat at the dinner table, cells also communicate both closely or throughout different parts of the body. With the nucleic acids, growth factors, and other proteins found within Exosomes, our cells are able to connect like a family, thanks to our Exosomes.

Coupled with TED, we apply a specialized topical hair growth serum in the treatment zone, which is met with ultrasonic waves and air pressure. In less than half an hour, you'll be thankful for increased scalp permeability and blood flow, which leads to optimized scalp health and stimulated hair follicles.

Bauman TURBO Laser Cap

With the weather beginning to cool down, you might be rummaging through your closet looking for a beanie. Instead of that, to keep you warm, why not opt for the Award-winning Bauman TURBO LaserCap® for a cozy head of hair? FDA-cleared, drug-free, chemical-free, side-effect-free, and non-invasive, this laser cap takes less time for effective hair growth than it does to open a can of cranberry sauce. Spend five minutes resting on the couch with this cap on, and you'll be donning a thicker head of hair come next Thanksgiving.

LEARN MORE

It doesn't need to be Thanksgiving to be thankful for all the modern advancements in hair restoration and diagnostic tools. From myself and the wonderful staff at Bauman Medical, I'm thankful to deliver results that will make you feel as confident as ever. To learn more and get started, be sure to contact Bauman Medical today. Call **561-220-3480** or point your camera at the QR code below to schedule a private one-on-one in-person or virtual evaluation at www.baumanmedical.com.

REVOLUTIONIZING ANTI-AGING WITH HELIX CUSTOMIZED CO₂ + TECHNOLOGY

In the quest for youthful and radiant skin, advancements in technology have continuously pushed boundaries, offering new solutions that are both effective and non-invasive. One such groundbreaking innovation is Helix Customized CO₂+ technology, heralded as a game-changer in the field of anti-aging skincare.

UNDERSTANDING HELIX CUSTOMIZED CO₂+

Helix CO₂+ technology combines the power of fractional CO₂ laser treatment with customizable parameters tailored to individual skin types and concerns. Unlike traditional CO₂ lasers, which were known for their intensity and downtime, Helix CO₂+ delivers controlled micro-pulses of laser energy to target specific areas with precision. This approach promotes collagen production and stimulates skin renewal while minimizing discomfort and recovery time.

THE CUTTING-EDGE OF ANTI-AGING

At Carroll Dermatology, Helix CO₂+ represents the forefront of anti-aging treatments. By precisely targeting

fine lines, wrinkles, and skin laxity, this technology helps to rejuvenate and tighten the skin effectively. Its ability to penetrate deeper layers of the skin stimulates long-term collagen remodeling, resulting in smoother texture and improved overall skin tone.

NON-INVASIVE EXCELLENCE

One of the most significant advantages of Helix CO₂+ technology is its non-invasive nature. Clients can achieve remarkable results without the need for surgical procedures or extended recovery periods. This aspect not only enhances convenience but also appeals to those seeking natural-looking improvements without the risks associated with more invasive treatments.

PERSONALIZED TREATMENT PLANS

Each client at Carroll Dermatology receives a personalized treatment plan utilizing Helix CO₂+. This customization ensures that specific skin concerns are addressed comprehensively, whether targeting sun damage, acne scars, or general signs of aging. The adjustable settings of the Helix CO₂+ system allow for tailored treatments that optimize results while prioritizing client comfort and safety.

EMBRACING INNOVATION

Helix CO₂+ technology exemplifies innovation in skincare by integrating advanced laser technology with a focus on patient-centric care. Its versatility and effectiveness make it a preferred choice among dermatologists and clients alike, seeking reliable solutions in anti-aging and skin rejuvenation.

Carroll Dermatology offers the break through Helix Customized CO₂+ technology stands as a revolutionary tool in the pursuit of youthful and healthy skin. Its ability to deliver significant anti-aging benefits with minimal downtime underscores its role as a cornerstone of modern dermatological practice. At Carroll Dermatology, clients can trust in this cutting-edge solution to achieve remarkable improvements in skin texture, tone, and overall appearance, ensuring they can face each day with confidence and radiance.

For those considering anti-aging treatments, Helix CO₂+ technology represents not just a treatment option, but a promise of transformative results backed by the latest in skincare innovation. If you are seeking the latest technology in anti-aging, reach out to the medical professionals at Carroll Dermatology to determine if Helix is the right fit for you.

Buyer Beware: Low Quality Dental Implants on Market

In recent years, the U.S. market has seen infiltration of clone implants from China, Eastern European and South American countries. Clone implants pose risks because:

- Clone implants are not specifically designed for your mouth.
- Some contain mixed metals that can cause adverse reactions.
- Higher rates of failure which can be painful and costly.

Everything you need to know: Accessible Bathtubs vs Accessible Showers

People with mobility issues must have an accessible bathtub or shower to use at their homes. Accessible bathtubs and showers are each designed to accommodate people who have mobility impairments or other disabilities but there are differences between the two. In this article, you will learn about the features of accessible bathtubs and accessible showers and the differences between the two.

Major Differences

Keep in mind that handicap-accessible tubs and showers are each designed to be as accommodating as possible for people who suffer from disabilities or mobility impairments. They do, however, have different features and benefits that may be suitable for a variety of different preferences and needs.

Accessible bathtubs are created to have features such as grab bars, lower thresholds, and nonslip surfaces to make getting into and out of them much easier for people with mobility issues. They are also much safer than regular bathtubs and some even have built-in seats as well as adjustable jets to provide therapeutic benefits for people who need them.

On the other hand, accessible showers normally also have a lower threshold entry and exit, non-slip services, and guardrails. They are created to make the showering experience for people with mobility issues much easier and even people with mobility aids, such as walkers or wheelchairs, can access these types of showers much easier than a bathtub. Some of these showers even come with seats or built-in benches for added convenience.

Consider Your Needs

The decision between installing an accessible bathtub or an accessible shower will depend upon the person's specific preferences and needs. For instance, if a person loves to soak in the bathtub but has mobility issues, an accessible bathtub with all its different features may be more beneficial. A person who requires a walker or wheelchair to get around may very well appreciate an accessible shower much more than a bathtub.

Each person must consult with their doctor, health care provider, or occupational therapist to decide which option is more suitable for their needs. It is important, also, that the person checks to ensure that the bathtub or shower they choose meets all safety requirements and accessibility standards.

How Can We Make Your Life Easier?

Whether from injury or aging, getting in and out of a bathtub can be challenging. Instead of spending thousands of dollars on a bathroom renovation, you can easily convert your tub into a walk-in shower with the TubcuT® Company.

Our accessible bathtub and shower experts can assist you with all of your bathing accessibility needs. With every TubCut install, we provide the safest and most convenient ways for people to take a bath, even when they struggle with a disability or mobility impairment.

Bed Making Made Easy – With CKI Solutions' Bed MadeEZ®

I wake up each morning to the sweet smile of my husband. He is right there as I amble out of the bed and trip on the dog. He is next to me as we brush our teeth. He waits patiently by my side as I brew the coffee. He is completely gone when I go to change the linens! I am alone in this endeavor.

Changing linens is a pain, literally. Strain to your back from lifting and holding your heavy mattress, frustration as the sheets untuck before you can finish, and occasionally a chipped nail ... bed making is exhausting. And it isn't getting better anytime soon. With the increase in pillow-top mattresses, foam mattresses, and luxury coil mattresses, mattresses are getting heavier by the year.

The Truth About Your Mattress.

- Mattresses now average 12 ½' high;
- They are over 15" thick;
- A king mattress can easily top 300 pounds.

So what can be done? A mattress lifter is the answer. A quick search on Google for "mattress lifter" and you will find the original mattress lifter, the Bed MadeEZ. The product was invented by female-owner and CEO of CKI Solutions, Sam Montross, back in 2012.

- 1** Start by inserting one tip of the Bed MadeEZ at an angle between mattress and box spring

- 2** Keeping the Bed MadeEZ angled slightly towards you, insert it between mattress and box spring.

- 3** Push the Bed MadeEZ in until it reaches the handle and is resting securely on its flat ledge.

What does the Bed MadeEZ do?

This aqua beauty (comes in pink too) does it all it:

- **Lifts and Holds** – as you insert the Bed MadeEZ under your mattress, it lifts the mattress for you and holds it up to 4 inches while you change your linens, giving you the time to make those famous hospital corners too!
- **Tucks** – using the tip, you can quickly tuck sheets, quilts, and blankets easily for a perfectly finished nice, crisp edge, saving your hands and wrists from scraping and strain.

It is **Ergonomically Designed** to eliminate strain. The design includes a large round handle, allowing for versatility in gripping positions for either one or two hands.

Trust is Built In to the Bed MadeEZ.

This patented, trademarked design is:

- **Independently Tested** – to reduce strain on your back and shoulders caused by repeated lifting of a heavy mattress.
- **Recommended by OSHA** – around the world, housekeepers use the Bed MadeEZ to avoid injury and go home less tired.
- **Backed by a Lifetime Warranty**
- **Made in the USA** – and always will be made right here in Florida!

Bed MadeEZ is Found in Major Publications!

This ingenious product has been written about in:

- Reader's Digest – <https://www.rd.com/article/mattress-lifter/>
- Southern Living – <https://www.southernliving.com/bed-madeez-mattress-lifter-7109456>
- Apartment Therapy – <https://www.apartmenttherapy.com/amazon-mattress-lifter-tool-review-37184419>

Easy to Order, Fast Shipping!

The Bed MadeEZ can be ordered right off Amazon and it arrives quick! Simple to understand instructions are included and you can get right to business. The Bed MadeEZ makes changing linens and making the bed a breeze.

Who Benefits from the Bed MadeEZ.

The Bed MadeEZ is a game changer for anyone with:

- Back Injuries
- Arthritis
- A heavy mattress
- Recently Undergone Surgery
- Those undergoing Breast Cancer treatments
- Pregnant Women
- Anyone at all who wants to make their bed quickly, professionally and without heavy lifting and fear of back injuries due to strain.

How Doctors Choose Surgeons

By David A. Goldman MD

When it's time to have an elective surgical procedure how would you choose a surgeon? Most people will ask friends and family, others may do their own internet research. When I needed a hernia repair, I did what all other doctors do – I asked another doctor. Not just any doctor, but in this case the residents who worked with all the doctors in the department of surgery. When a family member needed surgery, I called and spoke to one of the scrub nurses at the local surgery center. While top degrees and awards certainly contain value, there is not always a direct correlation with surgical skill. Scrub nurses, OR technicians, and residents are in unique positions to compare surgeons not on a one-time basis, but on an annual day-in day-out experience. Surgical representatives are often the best because they survey hundreds of doctors within a large geography (and yes, I have relied on the advice of surgical reps many times for my family members).

This is not to downplay the value of resumes, accolades, internet research, and word of mouth. If a personal associate of yours had an excellent experience with a surgeon, you should absolutely trust their opinion. In southern Florida, the population is continually changing, with new patients relocating here every day. In some cases you may not know whom to see for care. Remember that there are multiple sources available for you to check.

So what occurred in my situation? I selected a surgeon based on the advice of residents and fellows who worked with all general surgeons. I had minimal postoperative discomfort and was extremely satisfied with the end result. Of note, a colleague sought out a “renowned” surgeon for the same procedure and had significant pain. When he developed a hernia on the opposite side he saw my surgeon. He couldn't believe how much better the experience was.

In summary, there are many ways to select a surgeon. But, if in doubt, do what the doctors do.

DAVID A. GOLDMAN

Prior to founding his own private practice, Dr. David A. Goldman served as Assistant Professor of Clinical Ophthalmology at the Bascom Palmer Eye Institute in Palm Beach Gardens. Within the first of his five years of employment there, Dr. Goldman quickly became the highest volume surgeon. He has been recognized as one of the top 250 US surgeons by Premier Surgeon, as well as being awarded a Best Doctor and Top Ophthalmologist.

Dr. Goldman received his Bachelor of Arts cum laude and with distinction in all subjects from Cornell University and Doctor of Medicine with distinction in research from the Tufts School of Medicine. This was followed by a medical internship at Mt. Sinai – Cabrini Medical Center in New York City. He then completed his residency and cornea fellowship at the Bascom Palmer Eye Institute in Miami, Florida. Throughout his training, he received multiple awards including 2nd place in the American College of Eye Surgeons Bloomberg memorial national cataract competition, nomination for the Ophthalmology Times writer's award program, 2006 Paul Kayser International Scholar, and the American Society of Cataract and Refractive Surgery (ASCRS) research award in 2005, 2006, and 2007. Dr. Goldman currently serves as councilor from ASCRS to the American Academy of Ophthalmology. In addition to serving as an examiner for board certification, Dr. Goldman also serves on committees to revise maintenance of certification exams for current ophthalmologists.

Dr. Goldman's clinical practice encompasses medical, refractive, and non-refractive surgical diseases of the cornea, anterior segment, and lens. This includes, but is not limited to, corneal transplantation, micro-incisional cataract surgery, and LASIK. His research interests include advances in cataract and refractive technology, dry eye management, and internet applications of ophthalmology.

Dr. Goldman speaks English and Spanish.

Developing Discipline

Here’s a question for you: What is one thing in your life that you are not doing, that if you started doing on a regular basis would make a tremendous positive difference in your life?

Here’s a follow-up question: **WHY ARE YOU NOT DOING IT?**

Answer: most of us are not doing it because we lack discipline.

In ancient times there was once a king named Solomon. The Bible says that he was the wisest man who ever lived. People would come from miles to hear his wisdom and we are fortunate because many of his wisdom is collected in the book of Proverbs in the Old Testament.

In Proverbs 28:25 Solomon says, “A person without self-control is like a house with its doors and windows knocked out.” Discipline is pretty important, huh?

You see this virtue of discipline touches every fiber of our lives. Discipline is the indispensable tool to making your life work: our life, our health, our happiness, our wealth, our family life, our success is all rooted in our discipline. Discipline helps us to get to where we want to go.

You ask any great athlete and they will tell you about the importance of discipline. You ask any successful business man or woman and they will tell you about the importance of discipline. You ask any accomplished musician, actor, writer, salesperson or leader and they will tell you about the importance of discipline.

Spiritually speaking, the same is true: our relationship with God is largely determined by our discipline. You ask any godly man or godly woman and they will tell you about the importance of discipline. Spiritual discipline is the habit of making wise decisions and then living in alignment with them. Our behavior needs to be in alignment with our thinking and that takes discipline.

Prov. 10:17 says, “*People who accept discipline are on the pathway to life, but those who ignore correction will go astray.*” NLT

Here are three “**Disciplines of Being Disciplined**”.

1. Persistence – “Never Give Up”

Prov. 12:24 “Work hard and become a leader; be lazy and become a slave.” Discipline always starts from within; we grow and develop our self-discipline by growing and changing our attitude towards it.

2. Advance Decision Making – “Say No Now”

Prov. 13:16 says, “A wise man thinks ahead, a fool doesn’t and even brags about it.” Be prepared in advance to make the right choices. Don’t wait until it’s too late.

3. Delayed Gratification – “Putting Pain before Pleasure”

You do the difficult now in order to enjoy the benefits later. The Apostle Paul reminds us that, “No discipline is enjoyable while it is happening--it is painful! But afterward there will be a quiet harvest of right living for those who are trained in this way.” Heb. 12:11 NLT

So... let me ask you: What is one thing in your life that you are not doing, that if you started doing on a regular basis would make a tremendous positive difference in your life? And why are you not doing it?
